

Memo

To: Accessibility Advisory Committee

From: Clerk's Department

CC: Jill Stephen, Director of Transportation and Engineering
Andrea Coyne, Manager of Elections, Policy and Print Services
Jill Marcovecchio, Council and Committee Services Coordinator

Date: November 29, 2022

Subject: Submission from enVISION Oakville Peer Support Group to double size of street signage at main intersections, and yellow lines or sections/areas of pavement painted on slopes leading to streets

At the September 8, 2022 Accessibility Advisory Committee meeting the following motion was made, and approved by Council at the October 11, 2022 Council meeting:

That the Accessibility Advisory Committee requests that the submission from Ruth Sheridan, AAC member on behalf of enVISION Oakville Peer Support Group, be referred to the Transportation and Engineering Department for comment:

- a. double the size of street signage at most main intersections to allow the driver and passengers more easily to see the name of the main streets in their municipality; and
- b. yellow lines or sections/areas of pavement painted on all slopes (inclines and ramps) that lead to a street at main intersections, and in the future expanding this project to every slope in all wards, where there is a possibility of uneven joints between the concrete and the asphalt.
