

Appendix F – Policies and Zoning

Provincial Policy Statement 2020

1.1 Managing and Directing Land Use to Achieve Efficient and Resilient Development and Land Use Patterns

1.1.1 Healthy, liveable and safe communities are sustained by:

- a) promoting efficient development and land use patterns which sustain the financial well-being of the Province and municipalities over the long term;
- b) accommodating an appropriate affordable and market-based range and mix of residential types (including single-detached, additional residential units, multi-unit housing, affordable housing and housing for older persons), employment (including industrial and commercial), institutional (including places of worship, cemeteries and long-term care homes), recreation, park and open space, and other uses to meet long-term needs;
- c) avoiding development and land use patterns which may cause environmental or public health and safety concerns;
- d) avoiding development and land use patterns that would prevent the efficient expansion of *settlement areas* in those areas which are adjacent or close to *settlement areas*;
- e) promoting the integration of land use planning, growth management, *transit-supportive* development, *intensification* and *infrastructure* planning to achieve cost-effective development patterns, optimization of transit investments, and standards to minimize land consumption and servicing costs;
- f) improving accessibility for persons with disabilities and older persons by addressing land use barriers which restrict their full participation in society;
- g) ensuring that necessary *infrastructure* and *public service facilities* are or will be available to meet current and projected needs;
- h) promoting development and land use patterns that conserve biodiversity; and
- i) preparing for the regional and local impacts of a changing climate.

1.1.2 Sufficient land shall be made available to accommodate an appropriate range and mix of land uses to meet projected needs for a time horizon of up to 25 years, informed by provincial guidelines. However, where an alternate time period has been established for specific areas of the Province as a result of a provincial planning exercise or a *provincial plan*, that time frame may be used for municipalities within the area.

Within *settlement areas*, sufficient land shall be made available through *intensification* and *redevelopment* and, if necessary, *designated growth areas*.

Nothing in policy 1.1.2 limits the planning for *infrastructure*, *public service facilities* and *employment areas* beyond a 25-year time horizon.

1.1.3 Settlement Areas

Settlement areas are urban areas and rural settlement areas, and include cities, towns, villages and hamlets. Ontario's settlement areas vary significantly in terms of size, density, population, economic activity, diversity and intensity of land uses, service levels, and types of infrastructure available.

The vitality and regeneration of settlement areas is critical to the long-term economic prosperity of our communities. Development pressures and land use change will vary across Ontario. It is in the interest of all communities to use land and resources wisely, to promote efficient development patterns, protect resources, promote green spaces, ensure effective use of infrastructure and public service facilities and minimize unnecessary public expenditures.

1.1.3.1 *Settlement areas* shall be the focus of growth and development.

1.1.3.2 Land use patterns within *settlement areas* shall be based on densities and a mix of land uses which:

- a) efficiently use land and resources;
- b) are appropriate for, and efficiently use, the *infrastructure* and *public service facilities* which are planned or available, and avoid the need for their unjustified and/or uneconomical expansion;
- c) minimize negative impacts to air quality and climate change, and promote energy efficiency;
- d) prepare for the *impacts of a changing climate*;
- e) support *active transportation*;
- f) are *transit-supportive*, where transit is planned, exists or may be developed; and
- g) are *freight-supportive*.

Land use patterns within *settlement areas* shall also be based on a range of uses and opportunities for *intensification* and *redevelopment* in accordance with the criteria in policy 1.1.3.3, where this can be accommodated.

1.1.3.3 Planning authorities shall identify appropriate locations and promote opportunities for *transit-supportive* development, accommodating a significant supply and range of *housing options* through *intensification* and *redevelopment* where this can be accommodated taking into account existing building stock or areas, including *brownfield sites*, and the availability of suitable existing or planned *infrastructure* and *public service facilities* required to accommodate projected needs.

1.1.3.4 Appropriate development standards should be promoted which facilitate *intensification*, *redevelopment* and compact form, while avoiding or mitigating risks to public health and safety.

1.1.3.5 Planning authorities shall establish and implement minimum targets for *intensification* and *redevelopment* within built-up areas, based on local conditions. However, where provincial targets are established through *provincial plans*, the provincial target shall represent the minimum target for affected areas.

1.1.3.6 New development taking place in *designated growth areas* should occur adjacent to the existing built-up area and should have a compact form, mix of uses and densities that allow for the efficient use of land, *infrastructure* and *public service facilities*.

1.2 Coordination

1.2.1 A coordinated, integrated and comprehensive approach should be used when dealing with planning matters within municipalities, across lower, single and/or upper-tier municipal boundaries, and with other orders of government, agencies and boards including:

- a) managing and/or promoting growth and development that is integrated with *infrastructure* planning;
- b) economic development strategies;
- c) managing natural heritage, water, agricultural, mineral, and cultural heritage and archaeological resources;
- d) *infrastructure, multimodal transportation systems, public service facilities and waste management systems*;
- e) ecosystem, shoreline, watershed, and Great Lakes related issues;
- f) natural and human-made hazards;
- g) population, housing and employment projections, based on *regional market areas*; and
- h) addressing housing needs in accordance with provincial policy statements such as the Policy Statement: Service Manager Housing and Homelessness Plans.

1.4 Housing

1.4.1 To provide for an appropriate range and mix of *housing options* and densities required to meet projected requirements of current and future residents of the *regional market area*, planning authorities shall:

- a) maintain at all times the ability to accommodate residential growth for a minimum of 15 years through *residential intensification* and *redevelopment* and, if necessary, lands which are *designated and available* for residential development; and
- b) maintain at all times where new development is to occur, land with servicing capacity sufficient to provide at least a three-year supply of residential units available through lands suitably zoned to facilitate *residential intensification* and *redevelopment*, and land in draft approved and registered plans.

Upper-tier and single-tier municipalities may choose to maintain land with servicing capacity sufficient to provide at least a five-year supply of residential units available through lands suitably zoned to facilitate *residential intensification* and *redevelopment*, and land in draft approved and registered plans.

1.4.2 Where planning is conducted by an upper-tier municipality:

- a) the land and unit supply maintained by the lower-tier municipality identified in policy 1.4.1 shall be based on and reflect the allocation of population and units by the upper-tier municipality; and
- b) the allocation of population and units by the upper-tier municipality shall be based on and reflect *provincial plans* where these exist.

1.4.3 Planning authorities shall provide for an appropriate range and mix of *housing options* and densities to meet projected market-based and affordable housing needs of current and future residents of the *regional market area* by:

- a) establishing and implementing minimum targets for the provision of housing which is *affordable to low and moderate income households* and which aligns with applicable housing and homelessness plans. However, where planning is conducted by an upper-tier municipality, the upper-tier municipality in consultation with the lower-tier municipalities may identify a higher target(s) which shall represent the minimum target(s) for these lower-tier municipalities;

- b) permitting and facilitating:
 1. all *housing options* required to meet the social, health, economic and well-being requirements of current and future residents, including *special needs* requirements and needs arising from demographic changes and employment opportunities; and
 2. all types of *residential intensification*, including additional residential units, and *redevelopment* in accordance with policy 1.1.3.3;
- c) directing the development of new housing towards locations where appropriate levels of *infrastructure* and *public service facilities* are or will be available to support current and projected needs;
- d) promoting densities for new housing which efficiently use land, resources, *infrastructure* and *public service facilities*, and support the use of *active transportation* and transit in areas where it exists or is to be developed;
- e) requiring *transit-supportive* development and prioritizing *intensification*, including potential air rights development, in proximity to transit, including corridors and stations; and
- f) establishing development standards for *residential intensification*, *redevelopment* and new residential development which minimize the cost of housing and facilitate compact form, while maintaining appropriate levels of public health and safety.

Growth Plan 2019

2.2.1.2 Forecasted growth to the horizon of this Plan will be allocated based on the following:

- a. the vast majority of growth will be directed to settlement areas that:
 - i. have a delineated built boundary;
 - ii. have existing or planned municipal water and wastewater systems; and
 - iii. can support the achievement of complete communities;
- c. within settlement areas, growth will be focused in:
 - i. delineated built-up areas;
 - ii. strategic growth areas;
 - iii. locations with existing or planned transit, with a priority on higher order transit where it exists or is planned; and
 - iv. areas with existing or planned public service facilities

2.2.1.4 Applying the policies of this Plan will support the achievement of *complete communities* that:

- a) feature a diverse mix of land uses, including residential and employment uses, and convenient access to local stores, services, and *public service facilities*;
- b) improve social equity and overall quality of life, including human health, for people of all ages, abilities, and incomes;
- c) provide a diverse range and mix of housing options, including second units and *affordable* housing, to accommodate people at all stages of life, and to accommodate the needs of all household sizes and incomes;
- d) expand convenient access to:
 - i. a range of transportation options, including options for the safe, comfortable and convenient use of *active transportation*;
 - ii. *public service facilities*, co-located and integrated in community hubs;
 - iii. an appropriate supply of safe, publicly-accessible open spaces, parks, trails, and other recreational facilities; and
 - iv. healthy, local, and affordable food options, including through urban agriculture;
- e) ensure the development of high quality *compact built form*, an attractive and vibrant *public realm*, including public open spaces, through site design and urban design standards;
- f) mitigate and adapt to climate change impacts, build resilience, reduce greenhouse gas emissions, and contribute towards the achievement of low-carbon communities; and
- g) integrate *green infrastructure* and *low impact development*.

2.2.6.3 To support the achievement of complete communities, municipalities will consider the use of available tools to require that multi-unit residential developments incorporate a mix of unit sizes to accommodate a diverse range of household sizes and incomes.

North Oakville East Secondary Plan

7.3 COMMUNITY STRUCTURE

7.3.1 PURPOSE

Figure NOE1, the Community Structure Plan, establishes a range of components which define the general arrangement of land use and activity for the Planning Area.

Each component of the Community Structure Plan has its own function which is described in the following sections, together with the ultimate population, housing and employment targets.

7.3.2 URBAN CORE

The Urban Core designations reflect the most urban part of the North Oakville East Plan Area. These areas provide for the densest development and the highest order activities including a full range of residential, retail and service commercial, entertainment, cultural, business and institutional uses. Mixed use development is encouraged. Ultimately it is intended that Urban Core lands will become true mixed use urban areas. The primary focus of this development is along Trafalgar Road, with the north side of Dundas St. and the intersection of Neyagawa Boulevard and Burnhamthorpe Road having an important, but more secondary role.

7.6.6 NEYAGAWA URBAN CORE AREA

7.6.6.1 Purpose

The Neyagawa Urban Core Area designation on Figure NOE2 is intended to allow the creation of a secondary core area at the intersection of Neyagawa and a new east-west Major Arterial/Transit Corridor. The intent of this Core Area is to permit the provision of convenience commercial, institutional and employment uses to serve adjacent neighbourhoods, as well as related residential development.

7.6.6.2 Permitted Uses, Buildings and Structures

- a) The permitted uses shall be the full range of office, commercial including retail and service commercial, accommodation, health and medical, institutional and medium and high density residential uses.
- b) Permitted uses shall be primarily located in medium and high density residential, office and institutional buildings. Both mixed use and single use buildings shall be permitted and this may include single use retail and service commercial buildings in accordance with the provisions in Section 7.6.6.3c).
- c) The total retail commercial development in this designation shall not exceed a total of 31,000 sq. metres of gross leaseable floor area and may include supermarkets. Other commercial development such as financial institutions, service stations, restaurants and service commercial uses shall not be subject to this floor area limit. No single user or retail store shall exceed a maximum of 7,000 sq. metres of gross leaseable floor area.

7.6.6.3 Land Use Policies

- a) Development will be focused at the intersection of Neyagawa Blvd. and Burnhamthorpe Road and visually connected by establishing coherent streetscapes along adjacent sections of Neyagawa Blvd. and Burnhamthorpe Road through a number of design features and mechanisms, identified in the applicable urban design guidelines, including provisions for landscaping, signage, street furniture and other features of the public right of way, and guidelines for siting and massing of adjacent buildings. Development will also be physically connected by road, transit, pedestrian and bicycle linkages.
- b) A mix of uses shall be permitted at the following heights and densities:
- Minimum density - FSI of 0.5 with the exception of service station sites and as set out in Subsection c);
 - Maximum density - FSI of 2;
 - Medium Density Residential Density – Notwithstanding the foregoing, where medium density residential uses are permitted such development shall have a minimum density of 25 units per net hectare and a maximum density of 75 units per net hectare;
 - Minimum height - 5 metres for a commercial building and generally 3 storeys for other development; and,
 - Maximum height - 8 storeys.
- c) Where the minimum standards are not proposed to be achieved with the initial development proposals, the applicant shall be required to submit an intensification plan demonstrating how the ultimate density and other objectives for the site can be achieved. The intensification plan shall address:
- the provision of local roads and small blocks;
 - the means to achieve a safe pedestrian and transit friendly streetscape with the initial uses;
 - the siting and orientation of buildings within the block and to the street for the initial development and longer term intensification;
 - the siting and orientation of parking for the initial development and changes to parking to accommodate the intensification process;
 - the ability to achieve both short term and longer term intensification, the former potentially through intensification around initial buildings or reserved sites and the latter through possible redevelopment of the initial buildings themselves.

Based on this information, the Town will consider a reduction in the minimum density on specific sites to the following minimum densities:

- 0.25 for retail and service commercial uses provided the interim development also complies with the design policies of Section 7.5.16 b) and the land use policies of this section; and
- 0.3 for all other uses.

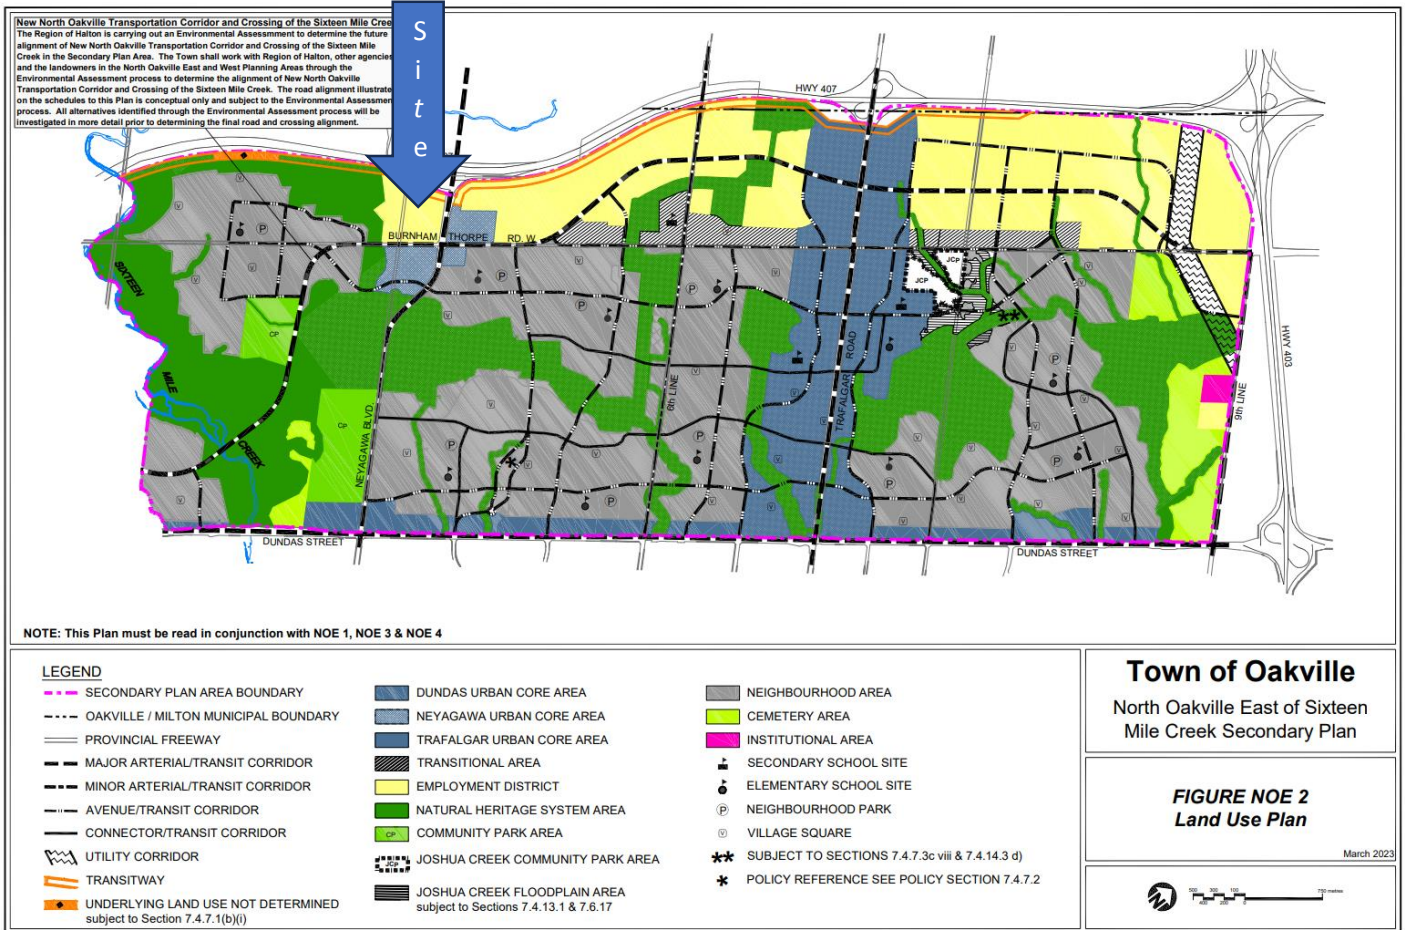

7.7.2.2 a) TRANSIT

- v) The Town will encourage the Province to proceed with the Environmental Assessment and detailed design of the 407 Transitway and the related terminals at the Regional Road 25, Neyagawa Blvd. and Trafalgar Road interchanges and in such studies explore opportunities to minimize the width of the corridor in order to maximize development lands. The terminals should be designed to provide for connections between interregional, regional and local transit service. In addition, they should be designed to provide for mixed use development which is integrated with surrounding existing and/or proposed uses

7.9.3 LANDOWNERS AGREEMENT(S)

In order to ensure the appropriate and orderly development of the Secondary Plan area, and to ensure the costs associated with the development of the Secondary Plan are equitably distributed among all landowners, development within the Secondary Plan area shall only be permitted to proceed when a significant number of landowners in the Secondary Plan area have entered into a cost sharing agreement or agreements amongst themselves to address the distribution of costs associated with development in a fair and equitable manner. Individual developments in the Secondary Plan area shall generally not be approved until the subject landowner has become a party to the landowners' cost sharing agreement.

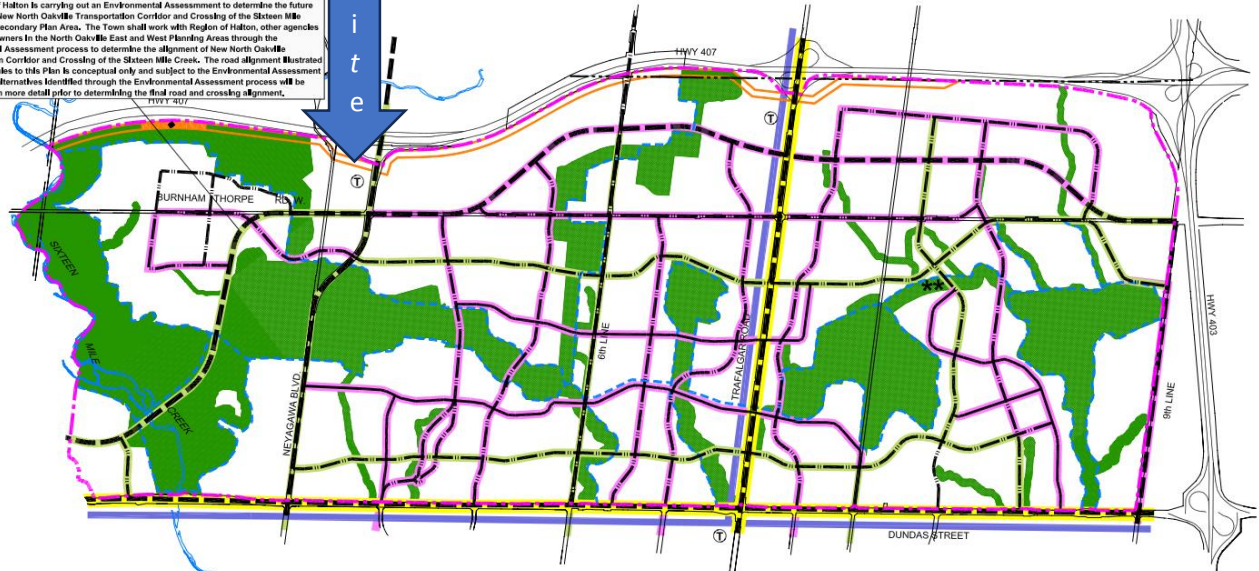

NOE2 Land Use Plan

NOE4 Transportation Plan

New North Oakville Transportation Corridor and Crossing of the Sixteen Mile Creek
 The Region of Halton is carrying out an Environmental Assessment to determine the future alignment of New North Oakville Transportation Corridor and Crossing of the Sixteen Mile Creek in the Secondary Plan Area. The Town shall work with Region of Halton, other agencies and the landowners in the North Oakville East and West Planning Areas through the Environmental Assessment process to determine the alignment of New North Oakville Transportation Corridor and Crossing of the Sixteen Mile Creek. The road alignment illustrated on the schedules to this Plan is conceptual only and subject to the Environmental Assessment process. All alternatives identified through the Environmental Assessment process will be investigated in more detail prior to determining the final road and crossing alignment.

Site

NOTE: Actual transit routing will be determined by Oakville Transit through periodic service updates.

North Oakville Zoning By-law

Section 7.0

Future Development Zone

7.13 Future Development (FD) Zone Regulations (2012-001) (2022-007)

7.13.1 Permitted Uses

- i. The uses as permitted in Section 4.3.1.
- ii. Infrastructure for which an Environmental Assessment has been completed or which are required as a condition of approval under the Planning Act, subject to the following provisions:
 - a. Notwithstanding any other provision of this By-law, any *building or structure* for the purpose of providing or sheltering infrastructure shall not be subject to Section 7.13.2;
 - b. Any *building or structure* used for a *general office use, public works yard, or warehouse* shall not be permitted.
- iii. The *use* of legally existing *buildings and structures* by new *accessory uses*.

7.13.2 Permitted Expansion of Legal Buildings and Structures

The existing *lot coverage* on the day of the passage of this by-law, for all existing *buildings or structures* and existing *accessory buildings or structures*, may be increased by a maximum of 10% subject to regulations of this section and section 5.

7.13.3 Maximum Height

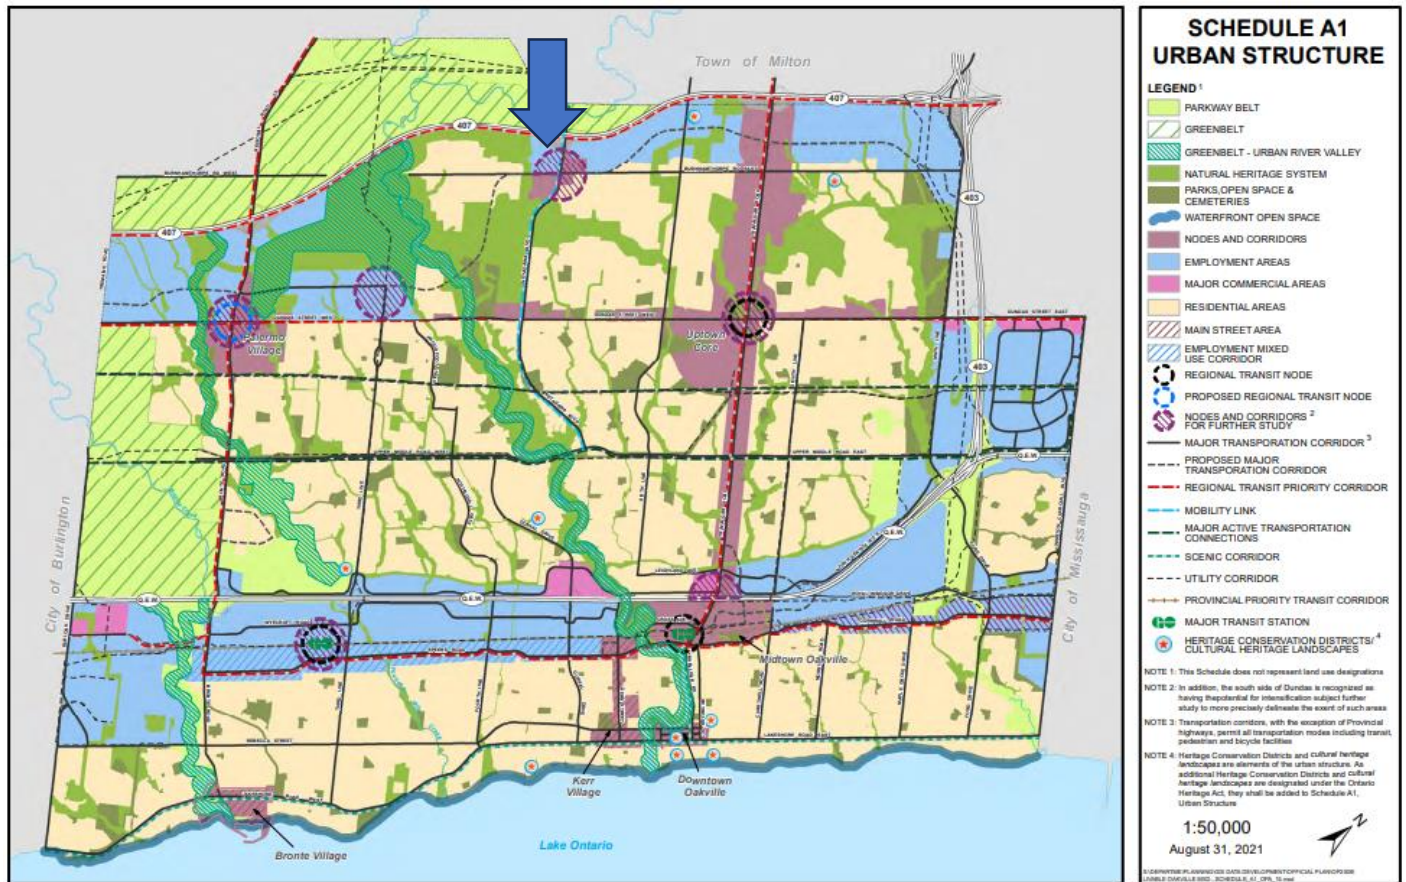

10 metres except for *agricultural buildings*

7.13.4 Minimum Yards

Front Yard and Flankage - 9 m
Side Yard - 2.4 m
Rear Yard - 7.5 m

(Performance zones relocated by 2012-001 and 2013-065)

Livable Oakville Plan – Schedule A1

3.6 Nodes and Corridors

Nodes and Corridors are key areas of the Town identified as the focus for mixed use development and intensification.

Nodes and Corridors shown on Schedule A1 – Urban Structure are referred to in this Plan as Growth Areas and corridors and include Midtown Oakville, Uptown Core, Palermo Village, Kerr Village, Bronte Village, Downtown Oakville, Trafalgar Road Corridor (QEW to Dundas Street) and the corridors along Dundas Street and Speers Road. This Plan also identifies Nodes and Corridors through the defined terms intensification areas and intensification corridors.

Nodes and Corridors are identified in the North Oakville Plans as the Health Oriented Mixed Use Node as well as urban core areas and include Trafalgar Urban Core Area, Dundas Urban Core Area and Neyagawa Urban Core Area.

The Nodes and Corridors identified in this Plan and in the North Oakville Plans comprise the Town's strategic growth areas as that term is defined in the Growth Plan, 2017.

Midtown Oakville is identified as an Urban Growth Centre in the Growth Plan and is planned to accommodate a significant portion of Oakville and Halton's required intensification.

Bronte GO Station is identified as a Major Transit Station Area by the Growth Plan and is intended to accommodate transit-supportive growth and intensification.

The remaining Nodes and Corridors each have a unique existing and planned character, scale and potential to accommodate growth. Downtown Oakville, Kerr Village and Bronte Village are intended to develop as mixed use centres with viable main streets.

They are recognized in the urban structure as Main Street Areas for their distinctive character and are intended to accommodate lesser amounts of intensification.

This Plan, along with the North Oakville Plans, provide detailed policies for the development of the identified Nodes and Corridors.

For those areas identified on Schedule A1 – Urban Structure as Nodes and Corridors for Further Study, future review shall provide updated and new policies to delineate boundaries, the mix of land uses and the intensity and scale of development.
