REPORT SUMMARY

PROPERTY DESCRIPTION: 268 AND 270 ROBINSON STREET, BEING PART OF LOTS B AND C IN BLOCK 16, REGISTERED PLAN 1, TOWN OF OAKVILLE, REGIONAL MUNICIPALITY OF HALTON, PIN 24780-0011 AND PIN 24780-0012

EASEMENTS/RIGHTS-OF-WAY: NONE REGISTERED ON TITLE.

COMMENTS: NOTE LOCATION OF FENCES.

ELEVATION NOTE

ELEVATIONS ARE REFERRED TO CANADIAN GEODETIC VERTICAL DATUM-1928 (1978 RE-ADJUSTMENT), AND WERE DERIVED FROM GEODETIC SERVICES OF CANADA BENCHMARK No. 19, HAVING A PUBLISHED ELEVATION OF 87.302 metres.

BEARING NOTE

BEARINGS ARE ASTRONOMIC AND ARE REFERRED TO THE SOUTHEASTERLY LIMIT OF ROBINSON STREET AS SHOWN ON PLAN 20R-1860, HAVING A BEARING OF N38'00'00"E. LEGEND

OAKVILLE PLANNING DEPARTMENT

TOWN OF OAKVILLE

SCHEDULE A 268 ROBINSON

REASONS FOR VARIANCES

LOT COVERAGE

The proposed residences result in a total lot coverage of _57.23% whereas the bylaw only permits no limits on coverage for the lot unless it is a semi detached house in which case the coverage is limited to 35%.

In this instance where there is a semi the lot coverage is calculated for the entire two units compared to the overall lot size.

There are many homes townhouses and multi unit buildings along this transitional street that exceed this allowable coverage including the new three storey multiunit building being built immediately east of the proposed development.

The lot coverage is therefore not out of character and the home itself accounts for a coverage of 42.25% and the covered porches and the carport cause the rest of the coverage issue on the site.

The design also carefully implements stepping back of the home as it goes from one storey to three storeys and thus this reduces any visual impact related to coverage mass and scale on the site.

SIDE YARD SETBACK EAST SIDE

The existing carport AT 270 Robinson was approved for a minor variance of 0.05 and thus in our opinion is a legal non conforming previously approved setback Building considers the extent of renovation to effectively be a new building and has there for asked that this side yard setback be approved.

The rest of the east side complies for the most part to the 1.2M required side yard other than the small triangle of the building that relates to the building not being parallel to the side lot line For the individual lot the east side yard is 0.00 as it is a demising wall situation and the west side yard s

SIDE YARD SETBACK WEST SIDE

Similar to the east side yard due to the angular location of the home there is a very small wedge of the proposed building that does not comply and thus we have asked for a side yard setback of 0.96 M whereas the bylaw requires 1.2M

It is our opinion that this request is minor and has no visual impact on the street or neighbours in fact the side yard at the street is much larger and results due to our intent to protect the heritage house.

FRONT YARD SETBACK

Like the carport the existing house has an existing front yard setback of 4.01M to the exiting covered porch. We are removing this covered porch and replacing it with a wider one that would have been more representative of the original house and this results in the setback being reduced by only 3.95 M to a setback of and again this is technical as it effectively already exists but building is considering the whole home to be a new structure.

This is interesting as heritage considers it a renovation due to our efforts to save the existing house or a portion of it

REAR YARD SETBACK

The proposed rear yard setback for this portion of the semi detached unit is 6.27M on one side and the east side is 6.43M whereas the bylaw requires 7.5M. This setback only relates to a one storey covered porch and thus has no impact on neighbours . The lot is also well treed and tree planting will be increased for privacy. We have provided the largest possible setback adjacent to the only home abutting the lot and thus there is little impact

The need for the covered porch is in fact related to providing outdoor privacy due to the overview form the new condo building being built next door to the east.

PARKING SPACE SIZE

Due to the existing carport and the existing house the parking space sizes are slightly under the required sizes and there is no way of adjusting these. In fact the front yards have been used for parking of two cars for many many years so this is more or less a technical variance

The one in the carport is related to the need for side door and stairs in this location and thus the space length does not comply but a car can still be parked easily in this space.

CONCLUSIONS AND OPINION

It is therefore my position that each of the variances is minor and meets the intent of the official plan and the bylaw and that there are no undesirable impacts as a result of these variances.

In fact the outcome is the character of the street has been maintained due to the preservation of both sides of this semi detached unit.

Heritage department has reviewed these designs and is very happy to provide their approval from staff as a full heritage application is not required on this site as the house is only listed and not designated and was not on the list of desired houses to be designated. In fact the house could be torn down totally and replaced with a higher full three storey structure that meets the bylaw and the impact on scale and mass and character of the street would be much greater.

Yours Truly William R Hicks B Arch, OAA, MRAIC
