Subject: [EXTERNAL] Strong opposition to high density development proposal

Dear Town Council Members,

I strongly oppose the proposed high-density development at Neyagawa Blvd and Dundas St W. This project will worsen traffic congestion, overburden public services, and disrupt the character of our community.

Oakville's infrastructure is not equipped for 2,278 new residential units, which will strain roads, schools, and emergency services. Additionally, the environmental impact on 16 Mile Creek has not been properly addressed.

I urge the council to reject this proposal and prioritize sustainable growth that preserves Oakville's livability.

Sincerely,

Michael Markoulakis

Town of Oakville Resident - Ward 4
