Re: Minor Variance Application – *Multiple Addresses*
146-226 Charles Bray Crescent
Formerly: 193 Nautical Blvd.
Menkes Developments Ltd.
Town of Oakville, Region of Halton

Glen Schnarr & Associates Inc. (GSAI) are the authorized agents for Menkes Developments Ltd., owner of the site municipality addressed as 146-226 Charles Bray Crescent. Prior to the recent registration of the Plan of Subdivision, the site was addressed as 193 Nautical Boulevard. This address was associated with the Draft Plan of Subdivision Application to create the lots and processed under Town File: 24T-22003/1733. Registration of the plan of subdivision formally created 37 lots to host single detached dwellings and formally assigned the addresses outlined above. A total of 6 of the 37 lots require a Minor Variance Application to address the same zoning deficiency.

For brevity, we are submitting a total of 6 minor variance applications under this single, joint Cover Letter in consideration of the fact that the minor variance request for the 6 lots is the same for each lot. We recognize that each lot will require its own separate and distinct Minor Variance Application form and will be assigned separate Town file numbers. We trust, however, that these applications can be heard together at the same Committee meeting based on the nature of the Minor Variance requests. The Minor Variance request is described below under the “Required Variances” section of this Cover Letter.

The lots subject to this Minor Variance request are addressed as follows:

- 158 Charles Bray Crescent;
- 166 Charles Bray Crescent;
- 170 Charles Bray Crescent;
- 174 Charles Bray Crescent;
- 194 Charles Bray Crescent; and
- 198 Charles Bray Crescent.

Each municipal address has its own, respective application form to accompany the variance request, all of which are submitted under this Cover Letter.

The in-effect Zoning for these 6 lots is Residential Low 6 Special Section 296 (RL6-296). The Special Section is limited to additional permissions for a public school and does not prescribe any amended regulations for buildings or structures beyond those outlined in the RL6 zone. To confirm for the Committee, the in-effect zoning was not amended through a Zoning By-law Amendment in conjunction with the Draft Plan of Subdivision application. This proposal is exempt from Site Plan Approval and a Control Architect was retained by our Client to prepare the drawings to be submitted for Building Permit issuance.

Required Variances

Presently, our Client is proceeding through the Building Permit process to permit for the construction of the dwellings. The Building Permit process includes a zoning review component. Through the Zoning review, it was determined that 6 of the 37 single detached dwellings exceeded the maximum allowable gross floor area for interior private garages as regulated under Chapter 5, Section 5.8.6 b) (Private Garage Maximum Sizes) of the Town's Zoning By-law. The additional area triggering the exceedance is provided behind what was designed as a standard 2-car garage, to allow for a tandem parking configuration or additional garage storage area. That said, the front façade is representative of a standard 2-car garage design.

The wording of the by-law regulation that the applications seek relief from provides:

b) For detached dwellings on lots having greater than or equal to 12.0 metres in lot frontage, the maximum total floor area for a private garage shall be 45.0 square metres.

All of the lots are greater than 12.0m in frontage, making all lots subject to this regulation. The 6 lots requiring relief from this regulation and subject to the Minor Variance requests under this cover are as follows: 5, 7, 8, 9, 14 and 15. We have attached a copy of the plan of subdivision for the information of the Committee for a better understanding of the location of these lots. For further specificity, there are 2 of the 7 models ("The Admiral" and "The Marina") that provide private interior garages that exceed the permission outlined in Section 5.8.6 b). Lots 5 and 7 will host "The Admiral" model and lots 8, 9, 14 and 15 will host "The Marina" model.

The lots hosting "The Marina" model have been sold with a floorplan showing the exceedance in private garage area of ~9 square meters, providing a total of ~54.0 square metres. The lots hosting "The Admiral" model and are not yet sold and currently show an exceedance of ~8 square meters, providing a total of ~53 square metres. We acknowledge that the drawings for The Admiral model show only 53 square metres of total floor area for a private garage at this time, however, it is possible that they could ultimately be designed and sold with the 54.0 square metres design. To protect for this scenario, we are applying for a consistent maximum 54.0 square metres of total floor area for a private garage for the 6 lots, as described above.

The proposed variance for all 6 lots is as follows:

To permit for a maximum total floor area for a private garage of 54.0 square metres whereas the by-law permits a maximum total floor area for a private garage of 45.0 square metres

To assist the Committee in their review of the variance request, we have submitted front elevations for each Model and the main floor plans, inclusive of the garage floorplan. Each model described above provides three options for the front façade treatment. We confirm that the drawings submitted as additional information are the same version as those submitted for the Building Permit review.

Our Client has confirmed that at a maximum, only 6 of the 37 lots will have either of these designs/models, and as a result, are only applying for relief to the by-law for the 6 lots described above.

Four Tests of a Minor Variance

Section 45(1) of the Planning Act, as amended, identifies the four tests which must be satisfied prior to approval of a minor variance. The following section provides an analysis demonstrating how the variances satisfy these tests.

1. The variance maintains the general intent and purpose of the Official Plan.

The Livable Oakville Plan (2009 Town of Oakville Official Plan) applies to all lands within the town except the North Oakville East and West Secondary Plan areas. The subject lands are designated as Low Density Residential as shown on Schedule F – South West Land Use. The proposed variances do not change the proposed use of land and maintains the intent and purpose of the Official Plan in this respect.

Part C, Section 6 of the Livable Oakville Plan contains relevant urban design objectives and policies. The variance request maintains the intent and purpose of the Official Plan as related to Urban Design objectives and policies by continuing to provide for dwellings which are designed with architectural excellence and are diverse enough to avoid sameness however remain compatible with the neighbourhood. We note that these dwellings also were subject to Architectural Control Guidelines and town review of same and remain generally consistent with the principles and visions of the Urban Design Brief (March 2022) which was approved through the subdivision process. The Urban Design Brief was required to satisfactorily address the land use and design policies of the Town of Oakville Official Plan prior to its approval.

In conclusion, the variance maintains the general intent and purpose of the Official Plan.

2. The variance maintains the general intent and purpose of the Zoning By-law.

It is our opinion that the variance request maintains the general intent and purpose of the Zoning By-law 2024-014. The Zoning By-law works to generally regulate the use of a lot in terms of uses permitted and minimum and maximum lot and building regulations.

The residential lots were designed through the subdivision process to allow the dwellings to comply with

all the relevant zoning standards including building height, maximum lot coverage and minimum required setbacks. The proposed dwellings fully maintain compliance with the existing zoning regulations, save and except for the private garage area exceedance. We acknowledge that the zoning standards are meant to ensure that the proposed development is compatible with the surrounding existing development. We do not feel that the additional floor area, which is allocated to the rear of the garage area, offends nor frustrates the intent of the by-law regulation pursuant to Section 5.8.6 which is meant to regulate garage sizes to create cohesive and compatible facades and frontages.

As exhibited in the supporting architectural materials, the front façade of the models appear as only a two-car garage from street view as the floor area exceedance is added to the rear to allow for a tandem parking configuration. Meaning, the cars would be able to be parked side by side (which is permitted as of right under the by-law), and with the additional area at the rear, could also be parked tandem. It is conceivable that this idea of a tandem parking scenario in a detached dwelling was not contemplated when writing the Town-wide by-law and therefore, affords no acknowledgment or flexibility for this scenario.

We confirm that other than the floor area exceedance, the private garages meet all other relevant zoning standards (including those associated with garage width) and no other relief to the by-law is required.

Therefore, we are of the opinion that the variance maintains the general intent and purpose of the Zoning By-law.

3. The variance is desirable for the appropriate development or use of the land.

The permission for the garage floor area increase would not propose a deviation from the intended use or development of the lands as previously reviewed and considered by the Town of Oakville through the Subdivision process or the Architectural Control review process and therefore remains desirable and appropriate development for the lands. The request simply provides buyers with more flexibility for storage areas based on their individual/family needs.

4. The variance is minor in nature.

It is our opinion that the variance is minor in nature. The variance contemplates a modest increase of 9m² to accommodate a tandem parking scenario, which is characteristic for these models (however not in the Town of Oakville). This additional area could also be used practically for additional garage storage, providing more options for the user. Additionally, if this space was not allocated to the garage portion of the dwelling, it would have been allocated to the interior of the dwelling, not simply omitted structurally from the overall design. This is simply a design choice from our Client to provide for additional storage area in the garage (for cars, or general storage) rather than additional living area for the occupants.

Submission Deliverables

- Six (6) Minor Variance Application Forms for the lands municipally addressed as:
 - o 158 Charles Bray Crescent;
 - o 166 Charles Bray Crescent;
 - o 170 Charles Bray Crescent;

GSAI

Glen Schnarr & Associates Inc.

- 174 Charles Bray Crescent;
 - 194 Charles Bray Crescent; and
 - 198 Charles Bray Crescent
- One (1) copy of additional information (Architectural set):
 - Set of Drawings for “The Admiral” including Main Floor Plan and Options A-C for Front Elevation; and,
 - Set of Drawings for “The Marina” including Main Floor Plan and Options A-C – Front Elevation.
- One (1) copy of the approved Draft Plan of Subdivision showing the Lot Numbers referenced herein.

We look forward to appearing on the next available Committee of Adjustment hearing date. Please contact the undersigned and/or Martha Hadid of Menkes Developments Inc. in order to facilitate the fee payments to deem the applications complete and prompt circulation.

Yours very truly,
