

Appendix C – Public Comments

Matt Caine – email dated December 8, 2015

We received a Notice of Complete Application, for a Proposed Zoning By-law Amendment and Proposed Plan of Subdivision. An application made by Graydon Banning Ltd.

Could you help me understand this notification, and what we would need to do to be involved?

Due to our near/adjacent high power radio towers, we should certainly be consulted and contribute to the process before a by-law is passed or before the approval authority gives or refused to give approval to the draft plan of subdivision.

There are health concerns for the workers, contractors, and any involved in such a project. Not to mention future residence living in surrounding area. Along with the impact any construction would have on our existing and federally regulated business.

From our experience through the growth and development in our area, it's hazardous to not include our company with any planning or decision-making process, with great risk in both the health of those workers involved, and for saving extra expense for any construction project in our area. For example, we had meetings and provided detailed reports of the effects of our radio towers on construction with the new hospital planning committee, advising and helping their project.
