

APPENDIX B – Policy Excerpts

Provincial Policy Statement - 2020

The Provincial Policy Statement (2020) ('PPS') is intended to promote a policy led system, which recognizes that there are complex relationships among environmental, economic and social factors in land use planning. The PPS encourages the wise management of land to achieve efficient development and land use patterns by directing growth to settlement areas and by promoting a compact development form.

The subject lands are located within a settlement area, which are to be the focus of growth and development (policy 1.1.3.1). The land use patterns within the settlement area based on densities and a mix of land uses that, among other matters, efficiently use land and resources, appropriately use the infrastructure and public service facilities that are planned or available and are transit supportive.

Part V: Policies

1.1 Managing and Directing Land Use to Achieve Efficient and Resilient Development and Land Use Patterns

1.1.1 Healthy, liveable and safe communities are sustained by:

- a) promoting efficient development and land use patterns which sustain the financial well-being of the Province and municipalities over the long term;
- b) accommodating an appropriate affordable and market-based range and mix of residential types (including single-detached, additional residential units, multi-unit housing, affordable housing and housing for older persons), employment (including industrial and commercial), institutional (including places of worship, cemeteries and long-term care homes), recreation, park and open space, and other uses to meet long-term needs;
- c) avoiding development and land use patterns which may cause environmental or public health and safety concerns;
- d) avoiding development and land use patterns that would prevent the efficient expansion of *settlement areas* in those areas which are adjacent or close to *settlement areas*;
- e) promoting the integration of land use planning, growth management, *transit-supportive* development, *intensification* and *infrastructure* planning to achieve cost-effective development patterns, optimization of transit investments, and standards to minimize land consumption and servicing costs;
- f) improving accessibility for persons with disabilities and older persons by addressing land use barriers which restrict their full participation in society;
- g) ensuring that necessary *infrastructure* and *public service facilities* are or will be available to meet current and projected needs;

- h) promoting development and land use patterns that conserve biodiversity; and
- i) preparing for the regional and local impacts of a changing climate.

1.1.2 Sufficient land shall be made available to accommodate an appropriate range and mix of land uses to meet projected needs for a time horizon of up to 25 years, informed by provincial guidelines. However, where an alternate time period has been established for specific areas of the Province as a result of a provincial planning exercise or a *provincial plan*, that time frame may be used for municipalities within the area.

Within *settlement areas*, sufficient land shall be made available through *intensification* and *redevelopment* and, if necessary, *designated growth areas*.

Nothing in policy 1.1.2 limits the planning for *infrastructure*, *public service facilities* and *employment areas* beyond a 25-year time horizon.

1.1.3 Settlement Areas

Settlement areas are urban areas and rural settlement areas, and include cities, towns, villages and hamlets. Ontario's settlement areas vary significantly in terms of size, density, population, economic activity, diversity and intensity of land uses, service levels, and types of infrastructure available.

The vitality and regeneration of settlement areas is critical to the long-term economic prosperity of our communities. Development pressures and land use change will vary across Ontario. It is in the interest of all communities to use land and resources wisely, to promote efficient development patterns, protect resources, promote green spaces, ensure effective use of infrastructure and public service facilities and minimize unnecessary public expenditures.

1.1.3.1 *Settlement areas* shall be the focus of growth and development.

1.1.3.2 Land use patterns within settlement areas shall be based on densities and a mix of land uses which:

- a) efficiently use land and resources;
- b) are appropriate for, and efficiently use, the infrastructure and public service facilities which are planned or available, and avoid the need for unjustified and/or uneconomical expansion;
- c) minimize negative impacts to air quality and climate change, and promote energy efficiency;
- d) prepare for the *impacts of a changing climate*;
- e) support active transportation;
- f) are transit-supportive, where transit is planned, exists or may be developed; and
- g) are freight-supportive.

Land use patterns within *settlement areas* shall also be based on a range of uses and opportunities for *intensification* and *redevelopment* in accordance with the criteria in policy 1.1.3.3, where this can be accommodated.

- 1.1.3.3 Planning authorities shall identify appropriate locations and promote opportunities for *transit-supportive* development, accommodating a significant supply and range of *housing options* through *intensification* and *redevelopment* where this can be accommodated taking into account existing building stock or areas, including *brownfield sites*, and the availability of suitable existing or planned *infrastructure* and *public service facilities* required to accommodate projected needs.
- 1.1.3.4 Appropriate development standards should be promoted which facilitate *intensification*, *redevelopment* and compact form, while avoiding or mitigating risks to public health and safety.
- 1.1.3.5 Planning authorities shall establish and implement minimum targets for *intensification* and *redevelopment* within built-up areas, based on local conditions. However, where provincial targets are established through *provincial plans*, the provincial target shall represent the minimum target for affected areas.
- 1.1.3.6 New development taking place in *designated growth areas* should occur adjacent to the existing built-up area and should have a compact form, mix of uses and densities that allow for the efficient use of land, *infrastructure* and *public service facilities*.

1.2 Coordination

- 1.2.1 A coordinated, integrated and comprehensive approach should be used when dealing with planning matters within municipalities, across lower, single and/or upper-tier municipal boundaries, and with other orders of government, agencies and boards including:
 - a) managing and/or promoting growth and development that is integrated with *infrastructure* planning;
 - b) economic development strategies;
 - c) managing natural heritage, water, agricultural, mineral, and cultural heritage and archaeological resources;
 - d) *infrastructure, multimodal transportation systems, public service facilities and waste management systems*;
 - e) ecosystem, shoreline, watershed, and Great Lakes related issues;
 - f) natural and human-made hazards;
 - g) population, housing and employment projections, based on *regional market areas*; and
 - h) addressing housing needs in accordance with provincial policy statements such as the Policy Statement: Service Manager Housing and Homelessness Plans.

1.4 Housing

1.4.1 To provide for an appropriate range and mix of *housing options* and densities required to meet projected requirements of current and future residents of the *regional market area*, planning authorities shall:

- a) maintain at all times the ability to accommodate residential growth for a minimum of 15 years through *residential intensification* and *redevelopment* and, if necessary, lands which are *designated and available* for residential development; and
- b) maintain at all times where new development is to occur, land with servicing capacity sufficient to provide at least a three-year supply of residential units available through lands suitably zoned to facilitate *residential intensification* and *redevelopment*, and land in draft approved and registered plans.

Upper-tier and single-tier municipalities may choose to maintain land with servicing capacity sufficient to provide at least a five-year supply of residential units available through lands suitably zoned to facilitate *residential intensification* and *redevelopment*, and land in draft approved and registered plans.

1.4.2 Where planning is conducted by an upper-tier municipality:

- a) the land and unit supply maintained by the lower-tier municipality identified in policy 1.4.1 shall be based on and reflect the allocation of population and units by the upper-tier municipality; and
- b) the allocation of population and units by the upper-tier municipality shall be based on and reflect *provincial plans* where these exist.

1.4.3 Planning authorities shall provide for an appropriate range and mix of *housing options* and densities to meet projected market-based and affordable housing needs of current and future residents of the *regional market area* by:

- a) establishing and implementing minimum targets for the provision of housing which is *affordable to low and moderate income households* and which aligns with applicable housing and homelessness plans. However, where planning is conducted by an upper-tier municipality, the upper-tier municipality in consultation with the lower-tier municipalities may identify a higher target(s) which shall represent the minimum target(s) for these lower-tier municipalities;
- b) permitting and facilitating:
 - 1. all *housing options* required to meet the social, health, economic and well-being requirements of current and future residents, including *special needs* requirements and needs arising from demographic changes and employment opportunities; and
 - 2. all types of *residential intensification*, including additional residential units, and *redevelopment* in accordance with policy 1.1.3.3;

- c) directing the development of new housing towards locations where appropriate levels of *infrastructure* and *public service facilities* are or will be available to support current and projected needs;
- d) promoting densities for new housing which efficiently use land, resources, *infrastructure* and *public service facilities*, and support the use of *active transportation* and transit in areas where it exists or is to be developed;
- e) requiring *transit-supportive* development and prioritizing *intensification*, including potential air rights development, in proximity to transit, including corridors and stations; and
- f) establishing development standards for *residential intensification*, *redevelopment* and new residential development which minimize the cost of housing and facilitate compact form, while maintaining appropriate levels of public health and safety.

Growth Plan (2019)

The Growth Plan is a long-term plan that intends to manage growth, build complete communities, curb sprawl and protect cultural heritage resources and the natural environment.

The Growth Plan provides policies for where and how to grow, directing population and employment growth to urban areas and rural settlement areas with delineated built boundaries on full municipal services (policy 2.2.1). The subject lands are located within a “Built-Up Area.”

Section 2.2 – Policies for Where and How to Grow

2.2.1 – Managing Growth

2.2.1.2 Forecasted growth to the horizon of this Plan will be allocated based on the following:

- a. the vast majority of growth will be directed to settlement areas that:
 - i. have a *delineated* built boundary;
 - ii. have existing or planned *municipal water and wastewater systems*; and
 - iii. can support the achievement of *complete communities*;
- c. within *settlement areas*, growth will be focused in:
 - i. *delineated built-up areas*;
 - ii. *strategic growth areas*;
 - iii. locations with existing or planned transit, with a priority on *higher order transit* where it exists or is planned; and
 - iv. areas with existing or planned *public service facilities*;

2.2.1.4 Applying the policies of this plan will support the achievement of *complete communities* that:

- a) feature a diverse mix of land uses, including residential and employment uses, and convenient access to local stores, services, and *public service facilities*;

- b) improve social equity and overall quality of life, including human health, for people of all ages, abilities, and incomes;
- c) provide a diverse range and mix of housing options, including second units and *affordable* housing, to accommodate people at all stages of life, and to accommodate the needs of all household sizes and incomes
- d) expand convenient access to:
 - i. a range of transportation options, including options for the safe, comfortable and convenient use of active transportation;
 - ii. public service facilities, co-located and integrated in community hubs;
 - iii. an appropriate supply of safe, publicly-accessible open spaces, parks, trails, and other recreational facilities; and
 - iv. healthy, local, and affordable food options, including through urban agriculture;
- e) ensure the development of high quality compact built form, an attractive and vibrant public realm, including public open spaces, through site design and urban design standards;
- f) mitigate and adapt to climate change impacts, build resilience, reduce greenhouse gas emissions, and contribute towards the achievement of low-carbon communities; and
- g) integrate green infrastructure and low impact development.

2.2.6.3 – Housing

To support the achievement of complete communities, municipalities will consider the use of available tools to require that multi-unit residential developments incorporate a mix of unit sizes to accommodate a diverse range of household sizes and incomes

North Oakville East Secondary Plan

7.3.3 RESIDENTIAL NEIGHBOURHOODS

Residential neighbourhoods as designated on Figure NOE1 (Community Structure) are comprised of a range of residential densities including significant areas appropriate for ground related housing and live/work opportunities:

a) Neighbourhood Centre

Neighbourhood Centres are located in the centre of each neighbourhood, within walking distance of most residents. While predominately residential in character, Neighbourhood Centres will permit a range of uses. These uses will be permitted throughout the area but will be focused at a central activity node for the neighbourhood. Neighbourhood Centres have denser development than other parts of the neighbourhood but are predominantly ground related, and, in addition to residential development, will include a range of convenience and service commercial, civic, institutional and live-work functions in buildings at a scale and with a design appropriate to the area.

b) General Urban

General Urban areas, while predominately residential, also provide for live-work functions. Development will be at lower densities than those found in the Neighbourhood Centre.

c) Sub-urban

The least dense and most purely residential context is found in areas in a neighbourhood termed "Sub-urban". While live-work functions are permitted, these areas are primarily residential in nature.

7.3.5 NATURAL HERITAGE AND OPEN SPACE SYSTEM

The Natural Heritage and Open Space System for North Oakville East is part of a larger system which is intended to extend through all of North Oakville. It forms a central feature of the North Oakville East Planning Area. It is comprised of two components, a Natural Heritage component and an Open Space component.

a) The Natural Heritage component of the System is comprised of the following key areas as identified by the policies in the Plan:

iii) High Constraint Stream Corridor Areas

High Constraint Stream Corridor Areas include certain watercourses and adjacent riparian lands, including buffers measured from the stable top-of-bank or meander belts. These areas are located primarily inside Core and Linkage Preserve Areas, but are also found outside such areas. They must be protected in their existing locations for hydrological and ecological reasons.

b) The Open Space component of the Natural Heritage and Open Space System includes open space areas such as stormwater facilities, cemeteries, public parks and schools. The Open Space component of the System will be designed, where possible, to connect to, and enhance the Natural Heritage component of the System.

7.4.7 NATURAL HERITAGE COMPONENT OF THE NATURAL HERITAGE AND OPEN SPACE SYSTEM

7.4.7.1 Natural Heritage Designations

The Natural Heritage component of the Natural Heritage and Open Space System, reflecting an alternative Greenlands System as intended by the Regional Plan, is comprised of lands designated "Natural Heritage System Area" on Figures NOE1, NOE2 and NOE4 and "Core Preserve Area", "Linkage Preserve Area", "Optional Linkage Preserve Area", "High Constraint Stream Corridor Area" and "Medium Constraint Stream Corridor Area" on Figure NOE3. It also includes watercourses and features designated as "Other Hydrological Features" on Figure NOE3, to the extent that they are maintained after development occurs, in accordance with the policies in Section 7.4.8.

The Natural Heritage System Area designation is comprised of the following key areas:

c) High Constraint Stream Corridor Areas

High Constraint Stream Corridor Areas as designated on Figure NOE3 include certain watercourses with associated riparian lands, including buffers measured from stable top-of-bank and meander belts. These areas are located primarily inside Core and Linkage Preserve Areas, but are also found outside such areas

They must be protected in their existing locations for hydrological and ecological reasons in accordance with the directions established in the North Oakville Creeks Subwatershed Study.

7.5 COMMUNITY DESIGN STRATEGY

7.5.1 PURPOSE

This section outlines general design policies for North Oakville East, as well as specific policies for the Neighbourhoods as designated on Schedule NOE1, and the Trafalgar Urban Core Area, Neyagawa Urban Core Area, the Dundas St. Urban Core Area, Employment Districts, and existing development.

7.5.2 MASTER PLAN

a) The North Oakville East Master Plan in Appendix 7.3 to the Official Plan is intended to illustrate graphically the design of the North Oakville East Planning Area and how the policies and Figures of the North Oakville East Secondary Plan are to be implemented. The spacing, function and design of intersections of Local Roads with Major Arterial/Transit Corridors (i.e. Regional arterials) shown on Appendix 7.3 have not been approved by the Region, and such intersections shown on Appendix 7.3 and on any subsequent area design plan, plan of subdivision, or other development plan, are subject to Regional approval.

b) Prior to the commencement of the development of any:

- i) neighbourhood in accordance with the neighbourhood boundaries established on Figure NOE1 and, where applicable, the portion of the Dundas Urban Core that abuts the neighbourhood;
- ii) sub-area within the Trafalgar Urban Core Area identified on Figure NOE1, except that lands in any sub-area on one side of Trafalgar Road may proceed independently of the lands in that sub-area on the other side of Trafalgar Road;
- iii) part of the Neyagawa Urban Core Area; or
- iv) sub-area within the Employment Area or the Transitional Area identified by the Town, in consultation with all affected landowners, based on boundaries created by Arterial, Avenue or Connector roads

or natural features, provided that a sub-area may include adjacent Employment and Transitional Areas.

The Town shall determine, after consultation with all affected landowners in the specific area, whether proposed plans of subdivision or other development plans for the affected lands are generally consistent with the Master Plan in Appendix

7.3. Where such plans are determined to be generally consistent with the Master Plan, development may be permitted to proceed without the preparation of an area design plan.

- c) The Town shall require the preparation of an area design plan to the satisfaction of the Town, prior to draft plan approval or approval of other development plans in a specific area identified in subsection b), where:
 - i) proposed plans of subdivision or other development plans for the area are not generally consistent with the Master Plan in Appendix 7.3;
 - ii) the Town after consultation with all affected landowners, determines that an area design plan is required to address coordination issues between landowner plans;
 - iii) the Town, after consultation with all affected landowners, determines that an area design plan is required to address coordination issues between areas identified in 7.5.2 b) i) to iv); or
 - iv) any significant development is proposed in the Transitional Area designation.
- d) The area to be addressed by the area design plan will include, as applicable, one or more of the areas identified in subsection b).
- e) The area design plan will be designed to demonstrate conformity with the policies and Figures of the Secondary Plan and will provide details including:
 - i) the size and location of schools, neighbourhood parks, village squares and urban squares;
 - ii) the location, size and general configuration of stormwater management ponds;
 - iii) the detailed road pattern;
 - iv) the specific boundaries of neighbourhood land use categories and other designations;
 - v) the density and distribution of housing types;
 - vi) how the proposal addresses the Town's Implementation Strategy;
 - vii) the location, alignment and boundaries of Medium Constraint Streams;
 - viii) co-ordination with land uses and road patterns for lands outside, but adjacent to the lands which are the subject of the area design plan; and
 - ix) the requirements for Transitional Areas as set out in Section 7.6.9.3 a).
- f) Such area design plans shall be prepared in accordance with terms of reference approved by the Town and the applicant(s), by a consultant approved by the Town and the applicant(s), and retained by, and at the cost of, the applicant(s).

- g) In the preparation of the terms of reference, the Development Review provisions of Section 7.8 of this Plan will be used as a guide.
- h) A proposed plan of subdivision or other development plan shall be considered to be inconsistent with the Master Plan, as referenced in subsection c) i), if it does not conform to the General Design Directions in Section 7.5.4, or results in coordination issues between areas identified in subsection b. The following will generally not be considered to be inconsistent with the Master Plan, provided that the Town determines that the plan of subdivision or other development plan conforms with the policies and Figures of the Secondary Plan:
 - i) modifications to, or relocations of portions of the road pattern;
 - ii) modifications to Medium or Low Constraint Stream Corridors or Hydrologic Features “A” and “B”;
 - iii) relocation of public facilities including parks, schools and stormwater ponds; or
 - iv) reconfiguration of the neighbourhood land use categories generally in accordance with the neighbourhood land use category requirements of Table 1. However, any reconfiguration of neighbourhood land use categories proposed by a plan of subdivision or other development plan that necessitates significant changes to the distribution of neighbourhood land use categories on other land ownerships, in order to maintain general conformity with Table 1, will require the preparation of an area design plan.
- i) The approval of an area design plan by the Town shall not require an amendment to this Plan.

7.6 LAND USE STRATEGY

7.6.1 PURPOSE

The land use designations on Figure NOE2 establish the general pattern of development for the existing and future use of the North Oakville East Planning Area during the planning period. The policies for these designations are set out in this section.

7.6.7 NEIGHBOURHOOD AREA

a) Purpose

The Neighbourhood Area designation on Figure NOE2 is applicable to areas intended for the development of residential neighbourhoods. Each neighbourhood is identified on Figure NOE1. The neighbourhoods will each include a neighbourhood central activity node, a five minute walk from most residences, which will include public facilities that serve the neighbourhood. Live/work units and limited commercial uses will also be encouraged to locate in this area.

b) Land Use Policies

Each neighbourhood will be developed with a mix of development based on the following land use categories. The land use categories, Neighbourhood Centre, General Urban and Sub-urban, shall be represented in each neighbourhood, with the exception of Neighbourhood 14, generally in accordance with the percentages in Table 1 to this Secondary Plan.

7.6.7.1 Neighbourhood Centre Area

a) Purpose

The Neighbourhood Centre Area land use category on Appendix 7.3 will generally be used for areas located central to each neighbourhood. It is intended to accommodate a range of medium density residential , mixed use, live/work units and limited commercial and civic uses focused at a central neighbourhood activity node to serve neighbourhood residents.

b) Permitted Uses, Buildings and Structures

- The permitted uses shall be medium density residential, mixed use and small scale convenience retail, personal service, restaurants and business activity, as well as public and institutional uses including village squares. Business activity may include a range of small scale uses including offices, medical clinics, workshops for artisans and artists studios.
- Permitted uses shall be primarily located in mixed use or medium density residential buildings. Both mixed use and single use buildings shall be permitted and this may include convenience commercial buildings in accordance with the provisions in Subsection c) below.
- Notwithstanding the above, a minimum of one mixed use or non-residential building, in accordance with the provisions of Section 7.6.7.1c) is required at the intersection of each neighborhood activity node identified on Figure NOE1.

c) Land Use Policies

- Mixed-use development will be focused at neighbourhood activity nodes, identified on Figure NOE1, which will include a transit stop and other public facilities which serve the neighbourhood such as central mail boxes, or mail pickup facilities. In addition, convenience commercial facilities or similar uses will be encouraged to locate in these areas.
- A mix of uses shall be permitted at the following heights and densities:
 - Minimum density - FSI of 0.5 for mixed use;
 - Maximum density - FSI of 2 for mixed use;
 - Minimum density - 35 units per net hectare for residential;
 - Maximum density - 150 units per net hectare for residential;
 - Minimum height - 2 storeys; and,
 - Maximum height - 6 storeys (OPA321).

- The zoning by-law shall establish minimum and maximum setbacks and implement densities and other standards to ensure that development achieves the minimum standards required as a basis for the creation of this centre area. In particular, on-street parking will be permitted and may be utilized to meet parking standards for commercial and other non-residential development, and in such circumstances, live/work buildings may require no additional parking for the “work” component.
- The Town will require that a variety of building types be developed throughout the Neighbourhood Centre Area land use category in each neighbourhood. The location of building types shall be controlled through the zoning by-law. In this context, notwithstanding the permitted uses and maximum permitted density and height, consideration may be given by the Town to limited areas of housing, which may include public, convenience commercial or similar uses on the ground floor, with a minimum density of 150 units per net hectare and a maximum density of 250 units per net hectare located in proximity to the Core Preserve Area. However, the Town shall be satisfied that the development is appropriate to the context and may require the submission of studies, models and/or plans which address that consideration. In addition, the Town shall be satisfied that the total number of units and population for the plan of subdivision is the same as, or greater than, that which would be required by land use category distribution in Table 1.

7.6.7.2 General Urban Area

a) Purpose

The General Urban Area land use category on Appendix 7.3 is intended to accommodate a range of low and medium density residential development.

b) Permitted Uses, Buildings and Structures

- The permitted uses shall be low and medium density residential uses and home occupation and home business uses.
- Permitted uses shall be located in low or medium density residential buildings.

c) Land Use Policies

- A mix of housing types shall be permitted at the following heights and densities:
 - Minimum density - 25 units per net hectare;
 - Maximum density - 75 units per net hectare; and,
 - Maximum height - 3 storeys.
- The Town will require that a variety of residential building types be developed throughout the General Urban Area designation in each neighbourhood. The location of building types shall be controlled through the zoning by-law. In this context, notwithstanding the minimum density, consideration may be given by the Town to limited areas of housing at a minimum density of 20 units per net hectare in areas abutting the Core Preserve Area designation or other significant open space features. In this addition, notwithstanding the permitted uses and maximum permitted

density and height, the Town may also give consideration to limited areas of housing with a minimum density of 75 units per net hectare and a maximum density of 250 units per net hectare located in proximity to the Core Preserve Area and to the Neighbourhood Centre Area. However, the Town shall be satisfied that the development is appropriate to the context and may require the submission of studies, models and/or plans which address that consideration. In addition, with respect to any development which results in a density exception, the Town shall be satisfied that the total number of units and population for the plan of subdivision is the same as, or greater than, that which would be required by land use category distribution in Table 1.

- Home occupations and home businesses shall be permitted in dwellings and accessory buildings in accordance with the regulations of the zoning by-law.
- The zoning by-law shall establish minimum and maximum setbacks, and implement densities and other standards to ensure that development achieves the minimum standards required as a basis for the creation of this residential area.
- Village squares may also be permitted within the General Urban Area designations subject to the provisions of Section 7.6.13.

7.6.7.3 Sub-urban Area

a) Purpose

The Sub-Urban Area land use category on Appendix 7.3 is intended to accommodate a range of low density residential development.

b) Permitted Uses, Buildings and Structures

- The permitted uses shall be low density residential uses and home occupation and home business uses.
- Permitted uses shall be located in low density residential buildings.

c) Land Use Policies

- Residential uses, which shall primarily consist of single, semi-detached and duplex residences, shall be permitted at the following heights and densities:
 - Minimum density – 15 units per net hectare;
 - Maximum density – 35 units per net hectare; and,
 - Maximum height – 3 storeys.
- Notwithstanding the minimum density, consideration may be given by the Town to some very limited areas of housing at a minimum density of 10 units per net hectare in areas abutting the Core Preserve Area designation or other significant open space features. However, the Town shall be satisfied that the total number of units and population for the plan of subdivision is the same as, or greater than, that which would be required by land use category distribution in Table 1.

- Home occupations and home businesses shall be permitted in the dwelling and accessory buildings in accordance with the regulations of the zoning by-law.
- Village squares may also be permitted within the Sub-urban Area designations subject to the provisions of Section 7.6.13;

7.9.3 LANDOWNERS AGREEMENT(S)

In order to ensure the appropriate and orderly development of the Secondary Plan area, and to ensure the costs associated with the development of the Secondary Plan are equitably distributed among all landowners, development within the Secondary Plan area shall only be permitted to proceed when a significant number of landowners in the Secondary Plan area have entered into a cost sharing agreement or agreements amongst themselves to address the distribution of costs associated with development in a fair and equitable manner. Individual developments in the Secondary Plan area shall generally not be approved until the subject landowner has become a party to the landowners' cost sharing agreement.
