

APPENDIX D – Written Submissions

D. Czerczak – email August 31, 2020

I am a resident that lives on Meadow Marsh Cres and this subdivision impacts us as our backyard faces to the trail and green space. I was reviewing the plans and it looks like 8th line would be extended north right beside the existing trail? Can I get confirmation on the future plans for 8th line. The plan indicates they are leaving original road allowance and it is not clear to me what this means.

I live in Joshua Creek in a single family home. I am opposed to high density development North of Dundas. Specifically high rise apartments. There is already congestion on Dundas, this will only increase. This kind of development devalues Oakville in general. I will also mention the construction dust needs to be contained better. Our Cars are constantly full of dust. There is more dust on patios and in Pools.

Why don't these developers make a decent place for people to live. The current construction is far too close to the road!! Also not a tree or green space in Sight within the last two years in these areas just more construction.

Keep high density unappealing developments out of Oakville!
