

## **Appendix B – Implementation Costs – Reducing Default Speed Limit to 40 km/hr**

| Material Costs             |            |               |             |             |             |
|----------------------------|------------|---------------|-------------|-------------|-------------|
| Sign Type                  | # of Signs | Unit Cost     |             | Total       |             |
| 40 km/h                    | 350        | \$16.00       |             | \$5,600.00  |             |
| 30 km/h                    | 180        | \$16.00       |             | \$2,880.00  |             |
| Sub Total                  |            |               |             | \$8,480.00  |             |
| Labour/Equipment Costs     |            |               |             |             |             |
| Installation               | # of Signs | Labour/Equip. | Estimated   | Total       | Total       |
| Type                       | Required   | (per hour)    | Labour (Hr) | Lab./Equip. |             |
| 40 km/h relocation         | 180        | \$55.80       | 2.5         | \$139.50    | \$25,110.00 |
| 40 km/h Installation (New) | 350        | \$55.80       | 1.5         | \$83.70     | \$29,295.00 |
| 30 km/h Installation (New) | 180        | \$55.80       | 1.5         | \$83.70     | \$15,066.00 |
| Sub Total                  |            |               |             |             | \$69,471.00 |
| Grand Total                |            |               |             |             | \$77,951.00 |
|                            |            |               |             |             |             |
