Flag Status: Completed

Dear Town Council Members,

I hope this letter finds you well. As a longtime resident and fervent supporter of Oakville's unique charm, I'm reaching out regarding the upcoming vote on housing density proposals. These decisions, as you well, could significantly alter the fabric of our beloved town.

The allure of the \$36MM from the Federal Housing Accelerator Fund is undeniable. Yet, upon a closer look, it becomes apparent that the proposals for four units per property and four-storey buildings near Sheridan College might not be in our best interest. Notably, the push for increased density around Sheridan doesn't directly tie to this funding, raising questions about the necessity of such drastic changes.

Minister Fraser's letter, while advocating for more student housing, doesn't mandate the conversion of family homes into multi-storey student residences. His openness to alternatives suggests we have room to explore solutions that preserve the character of our neighborhoods.

Our town's commitment to procedural fairness and meaningful consultation with stakeholders is paramount. Recent surveys and consultations seem to fall short of capturing the community's concerns and aspirations fully. Furthermore, focusing on densification without considering alternative plans for student housing on Sheridan's own lands misses an opportunity to address the issue without disrupting our residential areas.

As we stand at this crossroads, let's remember what makes Oakville special. Our dedication to family-friendly neighborhoods, the importance of thoughtful development, and the need to maintain a dialogue that reflects our community's values.

I urge the Council to reconsider the current proposals. By voting them down, we can protect the essence of Oakville for generations to come. Let's find solutions that uphold our town's legacy, ensuring it remains a place we're proud to call home.

Thank you for your consideration.

Warmest regards,

S.Wong

Subject: Please vote "NO" -- Four Dwelling Units and Sheridan College Housing Area Proposals

Dear Councillor O'meara,

I was very disappointed when I read your March 22, 2024 reply to the email sent to you by Ann Ferraro one of my neighbours.

Oakville never has been an "affordable" area to purchase housing. It was not "affordable" when I purchased my home 25 years ago and it isn't "affordable" now.

When you pass By-laws that allow for 4 story apartments and town houses to be built in single family subdivisions like College Park and the other single family housing communities within 800 meters of Sheridan College there is an immediate reduction in the market value of all the single family homes just because a four story apartment or town house complex could be built next door. I don't know how much the value of my house would go down 10%, 20%, 30% or more. This amounts to expropriation by regulation. Because this loss of the value only applies to single family homes within 800 meters of Sheridan College it discriminates very unfairly against those of us that own single family homes within 800 meters of Sheridan College. We would sacrifice the extra money that we would otherwise have received when we sell our homes to subsidize the availability of student housing within walking distance of Sheridan College.

I will need all the money that I can get when I sell my house to pay for a retirement home!

Sheridan College currently has lots of room on their current property to build student residences. If they don't have enough land available then the fairest thing would be for Sheridan College to work with all levels of government to buy or expropriate whatever additional land they might need to accommodate the number of students that they admit.

All residents of Oakville benefit from having Sheridan College located in Oakville. All residents of Oakville should share equally in whatever sacrifices need to be made to provide affordable housing for families not just those within 800 meters of Sheridan College.

Yours truly,

Alan R. Boyes

Millbrook Avenue

Cc: Town Clerks <TownClerk@oakville.ca>, Town Clerks <TownClerk@oakville.ca>, Marc Grant <marc.grant@oakville.ca>, Jeff Knoll <jeff.knoll@oakville.ca>, Mayor Rob Burton <Mayor@oakville.ca>, Cathy Duddeck <cathy.duddeck@oakville.ca>, Jonathan McNeice <jonathan.mcneice@oakville.ca>, Ray Chisholm <ray.chisholm@oakville.ca>, David Gittings <david.gittings@oakville.ca>, Janet Haslett-Theall <janet.haslett-theall@oakville.ca>, Peter Longo <peter.longo@oakville.ca>, Allan Elgar <allan.elgar@oakville.ca>, Scott Xie <scott.xie@oakville.ca>, Nav Nanda <nav.nanda@oakville.ca>, Natalia Lishchyna <natalia.lishchyna@oakville.ca>, Tom Adams <tom.adams@oakville.ca>, Cathy Duddeck <cathy.duddeck@oakville.ca>

Dear Ann,

Thank you for writing me. I'd like to respond to your email purely on my own behalf.

Your opening comment "*How did the hard working 'blood, sweat and tears' of the many of us that toiled for decades to finally afford these family homes, in what we thought were safe and secure family oriented neighbourhoods, become the victims of such thoughtless, rash decision making political actions that would see our existing single family dwellings just **unilaterally and arbitrarily** pulled out from under us*" also says those trying to afford a home today are not hard working people who have toiled (or want the same opportunity you had) to afford a family home. The underlying premise of "I did it, why can't you" completely ignores reality. In 1990, the average GTA home would have cost a buyer \$255,020 — the equivalent of what today would be \$514,911 with inflation, according to data from the Toronto Regional Real Estate Board. After steadily decreasing until 2000, it rose by 2010 to \$431,262 — or \$586,473 with today's inflation. Today, the average home price in the GTA is \$1,134,781 — nearly double the price 13 years ago.

In 1990, the median income for an individual aged 25 to 54 in Toronto was \$54,310, when adjusted to 2023 inflation. In 2021, it hasn't increased by even one per cent, now at \$54,643, according to 2021 census data adjusted for today's inflation. So when you deride people for not being able to do what you did decades ago, it is not a fair comparison. We are telling our seniors who are looking to downsize, there is no place for you here. We are telling our children and young people, unless you are rich (beyond what anyone prior to 2013 could have ever afforded) you don't belong here. These are absolute facts and that we are not willing to consider our future generations for home ownership in the way older generations were allotted, it is saddening to me.

I cannot look my 13-year-old daughter in the eyes and tell her I did everything I could to ensure she had a chance to own and live in Oakville where she was raised because she is not rich enough to buy a single-family property that is unattainable for the overwhelming majority in Ontario today.

This is solely my opinion on the matter. Doing what is right is not the same thing as doing what is popular. I do not intend to have a legacy of neglecting youth and seniors on my resume; I do sincerely feel I am in the minority on Council though so you most likely will have the result you are after. I just felt it important to express the opposing view of many who do not have the ability to speak against blocking a future for young and seniors in our community and their hopes and dreams for their futures.

I want to thank you for writing as it does mean a lot to hear from residents on all their perspectives.

Subject: Please vote "NO" -- Four Dwelling Units and Sheridan College Housing Area Proposals

Dear Mayor Burton:

You Have the Ability to put a STOP to These Proposals by Voting "NO"

How did the hard working 'blood, sweat and tears' of the many of us that toiled for decades to finally afford these family homes, in what we thought were safe and secure family oriented neighbourhoods, become the victims of such thoughtless, rash decision making political actions that would see our existing single family dwellings just **unilaterally** and **arbitrarily** pulled out from under us by the Federal Liberals, the Provincial PC's as well as our local Town of Oakville Executive? These neighbourhoods have existed for many decades; were represented to prospective buyers as single family dwellings and promoted by Builders and the Town as desirable places to live and raise a family. Single Family Homes must be kept for families!

No one can deny that the multitude of voices being raised **are not in favour** of these proposals.

Therefore, why would this Executive body choose to ignore these voices?

It is fully within your ability to Vote "NO" and to remove these Proposals from the Table!

Will you stand true to the platform upon which you ran for the office you currently hold and defend the core values which you espoused, and, ultimately make the only right and just decision?

Respectfully,

Ann Ferraro

Subject: Subject 4 units per single detached lot

Dear Mr. Mayor and Council Members,

On Jan 22 2024, Council passed a motion to consider allowing 4 “as-of-right” dwelling units on **ALL SINGLE FAMILY RESIDENTIAL PROPERTIES THROUGHOUT OAKVILLE!**

We are extremely concerned about this proposal and sweeping amendment and the impact it could have on current and long established homeowners in Oakville, such as ourselves.

When we bought our home, we purposely did so in an established neighbourhood with single family dwellings. We have worked hard to maintain our home and neighborhood. I can only see negative consequences on the value and desirability of our home by having 4 unit complexes “inserted” next to me or into our neighborhood.

We certainly understand the need to increase home availability and affordability however the proposal does not seem to fit my understanding of the “Liveable Oakville” our taxes support.

The proposal seems to be too all encompassing. There must be some reasonable and well thought out options to achieve the desired objectives. The potential for coming into “any and all” established single family home neighbourhoods with this sweeping legislation terrifies me and does not seem to be either reasonable or well thought out.

Are the concerns of current and long term Oakville taxpayers going to be taken into account? Does the potential government funding justify the potential negative consequences on current homeowners, neighborhoods and our Town? What other options have been explored?

Ann and Michael Kashty

Respectfully, your short-term thinking to secure 36 Million has the potential to turn college park into a Student Ghetto and the rest of our city into a mishmash of 6 car driveways and traffic.

And if you think the survey will help with your due diligence - it demonstrates your bias in checking the box on a public consultation. The leading questions you asked are NOT representative of a consultation, they are a confirmation of a decision you have already made.

We will remember this at the ballot box.

Dear Sir/Madam:

The responses received from Sean O'Meara have been found to be extremely insulting and alienating. They indicate a basic lack of understanding of the proposals put forward to the residents of the Town of Oakville coupled with an almost dereliction of duty to the residents he was elected to serve. Or am I mistaken, are Councillors expected to vote their personal feelings?

I would ask that these communications be entered into the Record.

Thank you for your attention to this matter.

Sincerely,

Ann Ferraro

To: Sean O'Meara <sean.o'meara@oakville.ca>

Dear Sean:

Thank you for taking the time to respond to my email.

In no way, shape or form should my comments be interpreted as "if I did it, why can't you?" Rather, I ask that politicians at all three levels of government acknowledge the efforts we had to go through to achieve and maintain our middle class dreams.

I sympathize with your concerns for future generations' abilities to afford homes in Oakville, or anywhere else for that matter. Every parent shares this concern, however, the Proposals before the Town in no way address the issue of affordable home ownership. The proposed '3 as of right' and '4 as of right' dwellings, including the fourplexes, are **not** intended to be retrofitted for the purpose of selling

as individual units. They are intended for rental tenancy. Unless you are aware of something further which the residents of Oakville have not been made aware of!

Given the cost of an acquisition, coupled with the expense of a construction retrofit to allow for 3 or 4 self-contained units; the rental costs can be no less than, but, certainly greater than, fair market rents and as such, requiring years to recover the initial capital expenditures alone. Not to mention, finding yourself thrust in the role of now becoming a landlord. How would this possibly be affordable to students or young adults just starting out? Again, the objectives of these Proposals **would not be realized**.

I honestly don't understand how you make the leap to inferring that our position vis-a-vis home ownership is "if I did it, why can't you?" At no time were those words uttered or implied. I am most definitely **not** "deriding" (your word) **anyone** for not being able to do what I did decades ago. I am, however, speaking to the universal hard work, sacrifices and savings required to finally afford your own family home. I am a first generation immigrant that watched first hand what my parents sacrificed and how hard they worked to finally purchase a home for their family. I emulated and modelled my approach to acquiring a home after theirs. My parents were blue collar, unskilled workers with little formal education to speak of. We were far from rich. I strongly suggest you re-read the 3 sentences which make up my message.

There is nothing spoken or tacit about not welcoming seniors looking to downsize that "there is no place for you here". Again, your words. My oldest neighbour is 98 years old and is greatly admired by all of us for her independence and continuing to enjoy her own home!

Many of the residents of our enclave of homes have moved in their elderly and widowed parents and have done so without the need to make additional and costly retrofits to their homes. More still, have had adult children return to live with them due to a challenging employment market; failed marriages; and, in too many cases, due to illness. Again, this was accomplished with minor and manageable modifications to their dwellings. These are truly seamless and cost-effective solutions to housing needs which these Proposals could never effectively address. All these people who find themselves in these situations, just go about their lives quietly, without marching with banners to bring attention to their circumstances. These people are in large the '**silent majority**'.

But again, the Proposals set before the Town do **not** achieve this objective. Seniors **cannot**, more often than not, live in walk-up second, third or fourth storey units! Their highly specialized needs **cannot** be met by these Proposals, no matter how utopian a spin one would like to apply to the scenario. There is a reason why Senior Living requires special considerations and why an entire industry exists around it.

As a grandparent to girls the same age as your daughter and younger, the issue which causes me sleepless nights is whether our planet will be hospitable to our youngest children and their children. Our planet is in serious jeopardy and this reckless densification will assuredly further exacerbate our existing and very real climate concerns. The removal of 40 to 50 year old trees and paving over existing lawns to make way for mandatory parking provisions as required by these Proposals will immediately result in the causing of flood plains due to the lack of water absorbing green spaces. Once flood plains are established, property owners will be faced with the further challenge of not being able to obtain property insurance.

The Federal and Provincial governments would be far wiser and better serving to offer their housing incentive funds to smaller and struggling towns and communities with under-utilized existing spaces. Towns beyond the Golden Horseshoe and in the northern reaches of our province, which could so desperately use the cash infusions to attract, stimulate and sustain a more robust housing economy. Thereby injecting life and opportunity into these communities. This would be a far wiser and

more welcome solution to both affordable housing as well as providing an opportunity for commercial growth and entrepreneurial starts as a result of residential growth.

Continuing to add more density to an already burgeoning densification is just **not the answer**. Adequate, affordable, well-built housing is a multi-faceted challenge and requires serious thought to viable solutions **not** a rash and impulsive implementing of measures in a blind race to hit targets and achieve funding which may very likely create more problems **without effectively solving** existing ones.

I'm sure that at some point over the course of your life, you may have purchased an item that was marketed and represented to be one thing, but, when you got it home, you discovered it just not to be the case. The current situation that single family home owners find themselves in is no different. With the exception that the price tag attached to the item is quite literally an individual's life savings. So why wouldn't these residents be upset?

Subdivisions of Single Family dwellings and detached homes continue to be built in this Town and elsewhere across our province. Is there a billboard anywhere in these areas informing the prospective buyers that there is no longer any such thing as a Single Family Dwelling recognized in the Building or Zoning codes in Ontario? That the reality is that their neighbours may construct a '3 as of right' or a '4 as of right' or even a fourplex on the lot next door. By failing to provide Notice, are the federal, provincial and local governments not engaging in a gross failure of disclosure and misrepresentation? These are serious issues which may certainly yet return to haunt builders and elected officials.

It sounds very much to me that you are struggling with your own personal position and the interests of your constituents. This issue **is not about** more jobs or better paying jobs for new graduates **nor** affordable home ownership or more affordable rental accommodations. It's about more densification to pre-existing single family neighbourhoods (which were never designed, marketed nor purchased with any other intention) and at what cost?

I don't agree with the position you are taking, but I respect the principle upon which you stand. I encourage you to keep standing on principle, but understand, there is a completely legitimate and rational other side to the argument.

Sincerely,

Ann Ferraro

Subject: Four Dwelling Units and Sheridan College Housing

Dear Sirs:

I am an owner stakeholder of a home located in an enclave of homes identified as College Park. We have owned our home in this neighbourhood for 35 years. We are strongly opposed to the Town of Oakville's proposed Sheridan College Housing Special Policy Area.

The proposals outlined in this policy appears to attempt to create a much higher student housing opportunity within close proximity to the Sheridan College campus totally at the expense of the homeowners within the mapped zone. If this proposal were to play out in reality as it is imagined by it's architects, then the resulting outcome would certainly mean the transition from a lovely family neighbourhood into an unliveable student ghetto. One need only visit university campuses across our country where this scenario has been permitted to occur to see what the inevitable outcome actually looks like in reality. The noise and partying; the increased police presence; the garbage; the constant littering; the total absence of any respect for the premises temporarily occupied by any of the students as well as those of their neighbours compounded with a lack of owner ability to keep up with the ensuing constant necessary repairs to internal as well as external property damages all culminates in a rapid physical and aesthetic decay impacting all properties. We are hard pressed to believe that anyone in our neighbourhood, near or far from Sheridan College, would be in favour of such a proposal or any of its authors.

What renders this proposal even more baffling is the fact that Sheridan College has the available lands located within its campus to achieve this very goal. It has the ground space to erect more new student housing and it has the foundational structure to add more floors by building upward on existing buildings. And so, this begs the question: Why? Why is this not the first thought in attempting to find the solution to student housing? Why does the Town of Oakville and Sheridan College eye its immediate neighbours and owners of single family dwellings with this proposal of disruption and ruin to our existing family neighbourhoods? If the answer to this question is proximity; then again it begs the question: Why? Are the students incapable of walking greater distances; riding bicycles or taking the bus?

In this regard the Town of Oakville and our elected officials are exhibiting a fundamental disregard and disrespect for the long-time owners and residents of these single family dwellings and neighbourhoods. People who chose to purchase these homes by investing their life savings and move into these areas did so precisely because they were small, sheltered enclaves in neighbourhoods conducive to raising their children; knowing and recognizing the majority of their neighbours and nurturing an environment we're proud and happy to call home.

The sweeping rezoning reform of existing 40 year old single family dwelling neighbourhoods is not the manner in which to approach these housing matters.

With respect to the rezoning changes to the Livable Oakville Plan proposal; I find it interesting that this proposal again targets only specific neighbourhoods while steering clear of others with much larger and more accommodating lot sizes, i.e. South Oakville. To my eyes, this appears as a two tier representation of the interests of the residents of Oakville: if you reside in South Oakville, you and your properties are sacrosanct. If you reside elsewhere in this Town, your interests and residential homes are fair game. The message becomes very clear, our elected officials work at protecting the interests of the wealthiest homeowners among us.

For reasons outlined above in my statement, I do not support this proposal.

Further, the re-defining of long term existing family neighbourhoods only results in alienating, upsetting and angering those stakeholders.

The reduction of existing green spaces and mature trees replaced with paved surfaces to provide more room for additional parking will only contribute to the potential for more serious future flooding issues with rainwater having no absorption ability. To name only one environmental impact.

A higher density of population in an area never originally designed for such use will only result in ugly looking, quicker to run down, transient neighbourhoods. Increases in population translates into an increase in vehicular traffic and parking bringing with it risks to our children, our elderly and pets. As well as a loss of privacy and enjoyment of property for existing homeowners. Sewage, water services and hydro service were designed and put in place for R1 not R4 densities.

If four storey low rise apartments is the direction this Town would like to take, then, it should seriously look to new building permits to include provision for added residential floors to proposed strip malls, retail spaces and commercial sites. There is undeveloped land still available for achieving these housing goals. That is where the Town should be looking to making changes NOT retrofitting existing 40 year old, established single family housing neighbourhoods.

Thank you for taking the time to hear my concerns. I look forward to hearing our elected representatives speak to this issue on March 4th evening.

Sincerely,

Ann Ferraro

Subject: March 4, 2024 Town Council Meeting - College Park / Housing Accelerator Fund
Date: Friday, March 1, 2024 11:01:36 AM

Dear Councillors

This e mail is with regard to the Council meeting scheduled for March 4, 2024. The purpose of this e mail is to register our objection to the two motions on the agenda concerning the College Park community. Specifically, the two motions at issue provide as follows:

1. Four Dwelling Units Per Detached Residential Property: Modifications to allow up to four dwelling units per detached property town-wide, including changes in definitions and requirements for additional dwelling units, access, and parking.
2. Sheridan College (College Park) Housing Area – Special Policy Area: Establishment of a Special Policy Area to enable increased density, including building heights up to four storeys and expanded medium density housing options.

Lack of Community Involvement

There has been limited opportunity for community members, the very people affected by these proposals, to have their voices heard and considered. The Town of Oakville, has set up the obligatory online survey ostensibly allowing community stakeholders to voice their concerns.

The survey's available responses are designed such that it largely presupposes that respondents are in favour of the proposals. The survey does not ask the fundamental question, "Are you in favour of the proposals?". In fairness, the survey does have the perfunctory free-format sections where respondents are able to provide their input. Having said that, the reality is that narrative, free-format responses to a survey are given less weight as they do not lend themselves to numerical summary and are largely relegated to "footnote status".

Furthermore, holding a virtual town meeting as opposed to "in person" is not inconsistent with a goal of limiting opportunities for community members to voice their concern. This allows councillors to avoid having to respond directly to difficult questions from their constituents. Additionally, it has the potential to create the mistaken impression on the part of councillors that community members are not concerned about the proposals under consideration. In speaking with our neighbours and other College Park community members, they are understandably very concerned about the harmful effect of these proposals.

Student Housing Runs Contrary to "Community Building"

While the Council is careful to avoid stating it, it cannot be disputed that the primary focus of these motions is to use the funds to increase the amount of available student housing. The background to the motions provide that the affected area is the area within 800 metres of the Sheridan College campus. Why limit the affected area to within 800 metres of the Sheridan College campus? The true housing crisis is throughout Oakville. It is not limited to the Sheridan College campus and its immediate area. If the objective of these proposals is genuinely to increase housing for families, there are numerous alternative locations that would

be infinitely more effective in addressing the housing crisis for families.

By their very nature, occupants of student housing are more transient than families. With limited exceptions, transient occupants have no vested interest in building a community, raising a family, coexisting with their neighbours in a peaceful, respectful manner. There are numerous, verifiable instances in the College Park community where student housing has had a negative impact on the community. Furthermore, bylaw enforcement has proven not to be an effective solution. In our experience, bylaw enforcement have seemingly abrogated their responsibilities in this regard by failing to act until repeated complaints from community members.

Improper Use of Funds under the Federal Housing Accelerator Fund (n.b., hereinafter referred to as the "Fund")

Numerous communities throughout Canada have applied to access the financial resources available under the Fund. In a letter to the Mayor Burton dated January 11, 2024, Sean Fraser, Minister of Housing, Infrastructure and Communities characterizes the Fund as "highly ambitious, competitive and over-subscribed...". It is unconscionable that the Council would make an application to access these limited funds for student housing under the guise of creating housing for families. Presumably, other community applicants throughout Canada are planning to use the funds for their intended purpose. It does not matter that the federal Minister is aware of Oakville's intended use of the funds; student housing is not family housing.

*** **

In summary, the proposals should be rejected. We are very concerned about the housing crisis as it affects families and that Town Council is not taking advantage of this opportunity to address the family housing crisis. The proposals under consideration should be rejected and meaningful, effective family housing solutions should be put forward in their stead.

Respectfully,

Shelley and Bradley Price
Queensbury Crescent

Subject: Sheridan College Housing Area Proposals
Date: Thursday, March 28, 2024 10:57:48 AM

Dear Mr. Burton,

Like many others, I too moved into my existing neighbourhood to raise my family (the only home my daughter has known having been born here and still in school). Neighbours to either side of me have children of preschool age. This neighbourhood was built for and inhabited by numerous single families.

I am writing to add to others' voices in the request to strongly consider voting "**no**" to the proposal to allow for the destruction of existing single family dwellings in order to construct four-plexes in the Sheridan College Special Area. While I listened to many speak at the March 4, 2024 Planning and Development Council meeting I remain unclear how this would be the best or most advisable way to meet the goals of the Accelerator Fund. This seems counter to the idea of building more homes, faster and to the principle of using vacant or underused property that should be converted to housing. By this logic I would ask why Sheridan College property or even the Oakville Town Hall property would not be better examples to meet the goals?

Respectfully,

Carlos Iglesias

Subject: No to 4-Storey Apartment Buildings. & Yes to
Single Family Homes !Wednesday, March 13, 2024
Date: 6:41:24 PM

I am writing to you to state that I am saying No to 4-Storey Apartment Building. Single family homes are best utilized by families as the Minister stated.

The Town's actions will impact my family and my neighbours. The character of our community will be destroyed.

You both campaigned on "preserving the character of Oakville", a Livable Oakville.

Keep your promise.

Say Yes to Single Families Homes for

Families. signed,

Subject: Opposition to Zoning by Law Amendments
College Park and SHERidan College Oakville

Date: Friday, March 8, 2024 7:00:29 PM

Good evening Sir/Madam

I am a resident of College Park and wish to register my strong opposition to the proposed Zoning By Law Amendments and Sheridan College Housing Area Special Policy Area 42.15.62 and 42.15.63m Ward 1-7. I own and live in a detached home in Mc Craney Street East

I have attended a large section of the videoconference broadcast on 4 March 2023 at 6h30 where other residents registered their objections. In particular I agree with the objections presented by residents Dennis Gasparotto and Dan Pastoric

I wish to register my opposition in particular to

1. Four Dwelling Units per Detached Residential Property

I am particularly concerned with increasing the density in an already very busy area, where there is already a parking problem. The level of noise will increase, as will the traffic, services would be insufficient, variances to buildings are likely to be granted if the residential zones are changed, trees might be affected, birdlife, walkability, privacy, etc. I am also concerned about a deterioration on the value of my property. As a new Canadian I have worked extremely hard to provide for a peaceful and quiet neighborhood for my family and to build equity in my property. I am opposed to a change in the residential zone be granted. I came to live in Oakville because I want a livable community, not a high density area in my neighbourhood. Single use homes should be destined to single use families, as Minister Fraser has indicated.

2. Sheridan College Housing Area – Special Policy Area

I am opposed to my neighbourhood peace and quite being sacrificed to cater for accommodation for Sheridan College, therefore I am opposed to a change in the residential area that allows the construction of either 4 storey buildings of Four Dwelling Units per detached Residential Property. Sheridan College has plenty of vacant land and can accommodate the building of multiple storey apartments for its student body and also for others who wish to live in high density buildings. Transport is right in front of Sherida College and that would be the ideal ground to this initiative. Perhaps the Town can collaborate to build apartments on Sheridan College grounds. I am opposed to this proposal in the manner in which is has been presented, ie affecting my home directly. Please build apartments either on Sheridan College Ground or in the vacant land that Mr Dan Pastoric showed during this presentation.

I trust my opposition will be registered and duly recorded.

I wish to remain informed of any developments directly. I did not receive the letter sent to residents about these proposed changes and had to find out through the grapevine.

The Town should review its stakeholder consultation and engagement processes, these do not work properly.

There's been zero consultation and very poor communication.

I trust this will be corrected

Many thanks and kind regards,

Cecilia Jofre

Subject: A few more points for the please vote "NO" -- Four Dwelling Units and Sheridan College Housing Area Proposals
Date: Monday, March 25, 2024 9:50:26 PM

If you both don't mind I want to add a few comments to this conversation.

I'm a visible minority, young mother of 3 kids (10, 7 and 3 year olds), my littlest one goes to the Sheridan college daycare and my husband and I just recently bought this single family residence home in this quiet neighborhood with all our lifesavings and lots of debt to raise our family here, in a single detached family home neighborhood. Its a decision that we didn't take lightly, we bought this home in a troubled market time and this was the dream we bought into.

1. Upon moving to Oakville and this area we realize that there are very little amenities/public programs/etc available for us. The recreational centers, libraries, swim times, extracurricular public programs etc. are booked up solid. Have you ever tried registering for a zumba class. or registering your child for the scout programs/ a swim class/gymnastics class, and they tell you that the registration opens in 6 months on this specific day and **they warn you that the class fills up within minutes that its posted...** I was literally trying to type my daughter's name in while the page was refreshing and telling me its already full. Its crazy, there are no amenities.... how can we be planning to do more densification here when there are no amenities. We voted for you ... as councilors in hopes that you would help improve the quality of life of Oakville residents, do something about this issue please.... even the schools have portable modular/seacan classrooms to cope.
2. I am one such family resident that has moved in my elderly and widowed parent (mom) in with us.... without needing to make major modifications to our home ... I am the **'silent majority' Ann is referencing.**
3. The homes in our area are not old enough to be torn down and re-built... this is a waste of material and an environmental waste. Why don't we plan to build new.... the Canadian dream is not to live on top of each other and fight each other to get a spot to sit in a park/get a class for our kids in a afterschool program. Canada has land, the Federal and Provincial governments would be far wiser and better serving to offer their housing incentive funds to smaller and struggling towns and communities with under-utilized existing spaces. Towns beyond the Golden Horseshoe and in the northern reaches of our province, which could so desperately use the cash infusions to attract, stimulate and sustain a more robust housing economy. Thereby injecting life and opportunity into these communities. This would be a far wiser and more welcome

solution to both affordable housing as well as providing an opportunity for commercial growth and entrepreneurial starts as a result of residential growth. Let's invest into figuring out how that could work. Continuing to add more density to an already burgeoning densification is just **not the answer**. Adequate, affordable, well-built housing is a multi-faceted challenge and requires serious thought to viable solutions **not** a rash and impulsive implementing of measures in a blind race to hit targets and achieve funding which may very likely create more problems **without effectively solving** existing ones.

4) I wholeheartedly agree with this as well: I'm sure that at some point over the course of your life, you may have purchased an item that was marketed and represented to be one thing, but, when you got it home, you discovered it just not to be the case. The current situation that single family home owners find themselves in is no different. With the exception that the price tag attached to the item is quite literally an individual's life savings. So why wouldn't these residents be upset? We just bought the demand and buyers show that there are still many willing to buy and are buying. ...there was no billboard anywhere in these areas informing us the prospective buyers that there is no longer any such thing as a Single Family Dwelling recognized in the Building or Zoning codes in Ontario? That the reality is that their neighbours may construct a '3 as of right' or a '4 as of right' or even a fourplex on the lot next door. By failing to provide Notice, are the federal, provincial and local governments not engaging in a gross failure of disclosure and misrepresentation? These are serious issues which may certainly yet return to haunt builders and elected officials.

I too respect principled people, that is why I'm hoping you can be honest with yourself when valid points are made on the other side... showing that we have not thought this out all 100% and we have to vote NO to four dwelling units, etc.

Sincerely,
Cynthia
(A resident in the Sheridan College Housing Area)

Dear Ann,

Thank you for writing me. I'd like to respond to your email purely on my own behalf.

Your opening comment "How did the hard working 'blood, sweat and tears' of the many of us that toiled for decades to finally afford these family homes, in what we thought were safe and secure family oriented neighbourhoods, become the victims of such thoughtless, rash decision making political actions that would see our existing single family dwellings just unilaterally and arbitrarily pulled out from under us" also says those trying to afford a home today are not hard working people who have toiled (or want the same opportunity you had) to afford a family home. The underlying premise of "I did it, why can't you" completely ignores reality. In 1990, the average GTA home would have cost a buyer \$255,020 — the equivalent of what today would be \$514,911 with inflation, according to data from the Toronto Regional Real Estate Board. After steadily decreasing until 2000, it rose by 2010 to \$431,262 — or \$586,473 with today's inflation. Today, the average home price in the GTA is \$1,134,781 — nearly double the price 13 years ago.

In 1990, the median income for an individual aged 25 to 54 in Toronto was \$54,310, when adjusted to 2023 inflation. In 2021, it hasn't increased by even one per cent, now at \$54,643, according to 2021 census data adjusted for today's inflation. So when you deride people for not being able to do what you did decades ago, it is not a fair comparison. We are telling our seniors who are looking to downsize, there is no place for you here. We are telling our children and young people, unless you are rich (beyond what anyone prior to 2013 could have ever afforded) you don't belong here. These are absolute facts and that we are not willing to consider our future generations for home ownership in the way older generations were allotted, it is saddening to me.

I cannot look my 13-year-old daughter in the eyes and tell her I did everything I could to ensure she had a chance to own and live in Oakville where she was raised because she is not rich enough to buy a single-family property that is unattainable for the overwhelming majority in Ontario today.

This is solely my opinion on the matter. Doing what is right is not the same thing as doing what is popular. I do not intend to have a legacy of neglecting youth and seniors on my resume; I do sincerely feel I am in the minority on Council though so you most likely will have the result you are after. I just felt it important to express the opposing view of many who do not have the ability to speak against blocking a future for young and seniors in our community

and their hopes and dreams for their futures.

I want to thank you for writing as it does mean a lot to hear from residents on all their perspectives.

Sean

Sheridan College Housing Area Special Policy Area

To: Mayor, Council Members, Appropriate Town Staff

From: **Douglas Hanson**

I would like to submit my comments regarding the changes to the Zoning By-Law Amendments as proposed in the Town-wide and Sheridan College Housing Area Special Policy Area.

Description of My Neighbourhood: **Pallatine Drive**

The neighbourhood is made of an assortment of housing styles. From Bungalows, Back-split Semis, Two Story Semis, and Detached Two Story Homes. Most all are single family homes with some college student rentals. **This** Community is home from families with small children to retirees. It is a quiet, safe, and peaceful environment.

With many schools and playgrounds nearby, it is an idyllic place to raise families and enjoy one's retirement.

The residential street is 23 feet wide, two lanes wide with a deep ditch on both sides with no curbs or sidewalks.

Other than garages and garden sheds, there are no added dwellings on the properties.

All the homes are landscaped surrounded by a large mature tree canopy.

This Community has existed for 50 years

The Proposed Addition of Added Dwellings to the Side of Existing Homes:

There is no room on the existing Lot Size to accommodate an added dwelling that could be considered as suggested and outlined in your Survey Options. The existing Lots Sizes simply do not allow that space.

In addition, there would be no additional parking available to accommodate the proposed increase in tenancy.

Those current homes that have additional rooms currently used for rental do not have sufficient parking space resulting in streetside parking.

The Proposal to Allow 4 Story Apartment/Condo Dwellings:

As I understand the Proposal, these suggested sized dwellings would extend over and be confined to cover 3 current Lots. This would dramatically alter the look, feel, and enjoyment of the area.

Here are some reasons why this proposed Amendment to the existing By-Laws **should NOT go forward**:

1. The proposed 4 story dwellings could house 15 – 20 units. It would require parking either underground or on the Lot surface. Just ONE of these structures would dramatically increase the volume of traffic at all hours of the day as tenants come and go to work, schools, or colleges.
2. The infrastructure of the entire street would have to be upgraded to accommodate the not just ONE of these 4 story Dwellings, but several.
3. Traffic volume would dramatically increase to unpredicted numbers.
4. With added traffic in a small area and street, noise levels and more importantly safety to older retired adults with mobility problems and small children would dramatically increase.
5. **There are 4 school campuses in this area within walking distance** of those who live in the area with school-age children. The surrounding streets are already overrun with school buses and cars as they transport students to and from school. In addition, many parents park on the side residential streets as they drop off, walk them to school, and return in the afternoon to pick them up.
6. The additional volume of traffic created by these apartment size structures would be climatic.
7. If these Amendments go through, there will be tremendous pressure **by Developers** on existing home-owners to sell their properties. No one desires the continual harassment that would follow such a decision. Even today, I personally receive 2 – 3 phone

calls and door knocks from Real Estate Agents trying to get me to sell my **Home**.

8. This would be extremely disruptive to existing Home Owners. And, if it turns out that one does sell, the pressure on their neighbours to sell the adjacent lots so they could build 4 story structures would be unsettling.
9. In a quiet Community where all are neighbourly and help each other, this could cause friction and distrust amongst those who do not intend to sell no matter what.
10. Property Values will decline. NO perspective buyer will want to buy a house surrounded by 4 story structure. The curb appeal and esthetics will be gone. Many current home owners have upgraded their driveways, curbing and landscape.
11. The government is providing funding to build AFFORDABLE homes. None of these apartments/condos will be affordable. The current average rent in Oakville for a 1-bedroom apartment is \$2,419 and a 2-bedroom is \$3193. The average student or new-comer cannot afford these prices.
12. **Environmental** concerns. Rebuilding the road, gas, water, and electric infrastructure to support the proposed amendments would cause considerable time and disruption to the landscape. I have 3 large mature Maple Trees in my backyard which would be lost if an apartment building were built on my current property.
This would occur on all lots similarly effected causing significant loss of the tree canopy.

In closing, this proposal to amend the current By-Laws is not conducive to this neighbourhood for the reasons outlined above. This is an established mature neighbourhood surrounded by long established schools and churches.

The community is home to retirees as well to young families with school-age children.

Like all the communities within this area, members retire and move away, and new young families move in to begin their families and their lives.

THE CYCLE OF LIFE OF A COMMUNITY CONTINUES

Subject:

Re-Zoning for 4 storey buildings and 4 as of right buildings

Date:

Thursday, March 21, 2024 10:06:36 AM

JUST SAY NO TO BAD POLICY

All: I write today in protest of these proposed changes to housing legislation in Oakville. These changes will fundamentally change the character, features and function of our neighbourhood.

- We are an enclave of single-family dwellings, a featured selling point when we bought our homes. Our collective ability to raise a family without undue fear of traffic, trucks and strangers helped to develop the nature and character of our subdivision. Either of these proposed zoning changes will fundamentally alter our daily lives.
- The student ghetto problem will be real and should not be discounted in any way. Any parent with a child that has gone to university is fully aware of what a student ghetto is, what it looks like and how it reflects on the town that it is located in.
- The financial impact on current homeowners will be devastating. As the inevitable student ghetto develops, the impact on home values will be significant. For those that have paid down their mortgage, the equity in their homes acts as an anchor for their retirement and future financial planning. Whatever equity they thought they had in their property will be severely diminished and their retirement plans will be devastated. For those who are paying off their mortgage, raising kids and paying their taxes, they will wake up one day to the sounds of a new construction project and find that their property value has sunk accordingly. They'll be over-mortgaged on a house without the value they were planning on. Banks don't like that and either do homeowners.
- Green spaces are important! Every home in our neighbourhood has a tree in front of it and many have them in their backyard. Every home has a front yard and a back yard – all green spaces. When a four-storey building goes up, trees go down – there's just no way around it. Rainwater flows and storm drainage will be affected. In addition, parking pads and increased street parking will become the norm. We currently restrict this type of vehicle storage because it's unsightly and dangerous for children.
- Infrastructure remediation will be prohibitively expensive.
- The Housing Accelerator Fund is just that. A **rush** to solve a problem without consideration of other issues. Let's not be part of a poorly thought-out change to our Livable Oakville Plan. Let's continue to solve our housing problems through long term, thoughtful planning and not chase diminishing government dollars that will not have an appreciable long-term effect.

Thanks for your time,
Dan Ferraro
College Park Resident

Subject: Sheridan College Housing Area
Date: Thursday, February 29, 2024 2:09:31 PM

To Whom It May Concern,

Our family does not agree with proposed Sheridan College Housing Area Special Policy. We believe this would impact our neighbourhood in a negative way and will destroy community that we now have, along with a look and appeal that currently is.

Below is the letter I have sent to Mr. Knoll and Mr. Grant to voice my displeasure.

If you require any other action and/or clarification on my part, please let me know.

Regards,

Darko Radman
Martindale Avenue

Dear Mr. Knoll and Mr. Grant,

I am a resident in the College Park area that Sheridan College Housing Area will impact. Regardless of how phrased this proposal is, the bottom line is that overcrowding our neighbourhood is not something that any of us would enjoy. The whole reason for buying house in this area is to enjoy quite and not populated neighborhood. How would you feel if someone builds 4 storeys housing on each side of your home? Essentially this is what you are proposing. How would that even look? 4 storeys housing - single detached home -4 storeys housing, because I don't want to sell my house? How is that even esthetically pleasing?

Having a blanket policy to let anyone do whatever they want leads to anarchy.

Never mind about services, transportation, crime, parking, etc.

I urge you not to proceed with this proposal. If housing is needed for Sheridan College, Sheridan College should build a residence for students, they have enough land to do so.

Regards,

Darko Radman

Subject: Keeping Oakville Livable - Vote No to "4-storey apartment buildings". Vote Yes for keeping existing Single Family Homes
Date: Sunday, March 24, 2024 10:35:30 AM

To Mayor Rob Burton and Members of the Oakville Town Council,

Once more I write to you as a concerned resident of Oakville where I have resided for 41 years. The matter at hand—the proposal to convert single-family homes into four-storey apartment buildings near Sheridan College—is one of significant consequence, not just for the present but for the enduring character of our town.

The Core Issues at Stake:

- **Preservation of Community Character:** The fabric of College Park has been woven through decades of families making their lives here. The introduction of four-storey student apartment buildings threatens this tapestry, potentially altering our community beyond recognition.
- **Misalignment with Ministerial Intentions:** The Minister of Housing, Infrastructure, and Communities has emphasized the importance of retaining single-family homes for families, particularly those surrounding Sheridan College. The current proposal to intensify density with four-storey apartment buildings seems to diverge from this guidance, aiming to replace family homes with transient student housing.
- **Misalignment with the Premier of Ontario:** The Premier has come out to state the conversion of single family homes into 4-storey apartment buildings is wrong, 1000% wrong. Destroying single family homes wasn't the intent when looking to increase housing.

A Constructive Way Forward:

- **Adherence to the Minister's Vision:** It is crucial to realign our actions with the Minister's recommendations, focusing on mid- to high-rise solutions on Sheridan College's land. This approach not only preserves the existing community structure but also aligns with the broader goals of sustainable and sensible urban development.
- **Listen to the Premier:** Single family homes should be for families. Don't change the character of existing communities to tear down single family homes for 4-storey apartment buildings.
- **Enhanced Consultation and Transparency:** Engaging the community through a more transparent and inclusive consultation process will ensure that all voices are heard and considered. This process should aim to provide clear, comprehensive information, enabling stakeholders to contribute meaningfully to the discussion.
- **Re-evaluation of the Federal Funding Utilization:** It appears that the Town Staff's proposal for four-storey apartment buildings is not a prerequisite for securing the Federal Housing Accelerator Fund. It is unsettling on the grayness of what is fact and convenient inclusion. This revelation necessitates a re-evaluation of the initiative, focusing on options that do not compromise the integrity of our residential areas.

Conclusion:

In closing, I urge the Council to consider the lasting impact of the proposed changes on the community. The decision before you is not just about housing density; it's about preserving the

essence of what makes Oakville a place we are proud to call home. By focusing on solutions that respect the character of our community and align with ministerial guidance, we can find a path forward that serves the best interests of all Oakville residents.

Vote No to “4-storey apartment buildings” and continue supporting single family homes.

Let us work together to ensure our actions today pave the way for a future where Oakville continues to thrive as a vibrant, family-oriented community. I trust that the Town Council will act as stewards of our collective legacy, making decisions that honor the voices of its residents and the fundamental principles that define our town.

Respectfully,

Dan Pastoric

From: [REDACTED]
To: [Rob Burton: Town Clerks](#)
Subject: Urgent Appeal for Reconsideration of Current Housing Motions
Date: Thursday, February 29, 2024 9:01:10 PM

To the Members of the Town Council of Oakville,

Dear Council Members,

I write to you as a long-standing resident of Oakville, deeply invested in the future and well-being of our community. The decisions before us concerning housing and development near Sheridan College are of monumental importance, poised to significantly alter the fabric of our town. These changes could be our legacy, impacting Oakville's character for generations to come.

Upon careful examination of the proposals to permit four units per property as-of-right and to allow four storeys within 800 meters of Sheridan College, it has become apparent that these measures, while potentially transformative, have not been afforded the depth of consultation and transparency required under the Ontario Planning Act. This act mandates rigorous procedural standards to ensure decisions are made in an open, fair, and equitable manner, reflecting the following key components:

- **Public Participation:** Ensuring meaningful engagement with residents and stakeholders.
- **Consistency and Conformity:** Actions must align with provincial policies and municipal official plans.
- **Accountability:** Decision-making processes must be clear and accessible to the public.

The information presented during the Town's meeting on January 22nd, particularly the discussion surrounding the letter from Minister Sean Fraser, highlights a critical disconnect between the proposed initiatives and the broader objectives outlined by the Federal Housing Accelerator Fund (HAF). It is noteworthy that the potential \$36MM in funding, while substantial, does not encompass the proposed densification initiative around Sheridan College, raising questions about the alignment of these proposals with our community's long-term interests.

Moreover, the Minister's letter calls for a nuanced approach to increasing housing density, emphasizing the need for clarity and consideration of alternative plans that might better serve the community's needs without compromising the character of our residential areas. This advice seems to have been overlooked in favor of a narrow interpretation that risks undermining the very fabric of our community.

The current process, lacking in transparency and comprehensive stakeholder consultation, fails to meet the standards of due process as outlined in the Ontario Planning Act. By pushing forward without adequate engagement, we risk not only the ire of our community members but also potential legal entanglements that could delay any development indefinitely.

As a dedicated resident of Oakville, I have witnessed many changes over the years. However,

the approach currently being taken represents a departure from the values of consultation, transparency, and respect for community that Oakville has long stood for. It is, without doubt, the most concerning tactic I have observed to date.

In light of these considerations, I strongly urge the Town Council to reject the current motions and instead commit to a process that embodies the high standards of due process, consultation, and transparency mandated by the Ontario Planning Act. Such an approach will not only ensure that our community's development aligns with both our values and legal obligations but also preserves the integrity and character of Oakville for future generations.

Thank you for your attention to this matter. I trust that you will act in the best interests of our community, respecting the voices of its residents and the legal frameworks that guide our collective decision-making.

Sincerely,

M.Fitzpatrick

Subject: Chers membres du Conseil Municipal,
Date: Thursday, February 29, 2024 9:04:39 AM

Chers membres du Conseil Municipal,

Je m'adresse à vous avec une pointe de frustration, non seulement à cause des propositions d'augmentation de densité qui nous préoccupent tous, mais aussi parce que cette conversation n'a pas lieu dans notre belle langue française. C'est un peu une gifle, non? On se demande où est passée notre belle diversité linguistique.

Concernant les fameuses propositions, c'est clair comme de l'eau de roche que l'appât du gain proposé par le Fonds d'Accélération du Logement Fédéral de 36 millions ne devrait pas nous aveugler. On ne parle pas juste de rajouter quelques logis ici et là; on parle de transformer notre petit coin de paradis en quelque chose de méconnaissable. Et puis quoi encore? La proposition de densifier autour de Sheridan sans consulter le peuple, c'est du n'importe quoi.

Je vous implore, avec toute la passion que je peux rassembler, de voter contre ces propositions. On est capables de trouver des solutions plus astucieuses qui respectent l'âme de notre communauté. Ne laissons pas le chant des sirènes du financement nous éloigner de ce qui fait vraiment l'essence de notre ville.

Avec toute ma considération,

J Gagnon

Translation:

Dear members of the Town Council,

I am reaching out with a hint of frustration, not only because of the density increase proposals that concern us all, but also because this conversation is not happening in our beautiful French language. It feels a bit like a slap in the face, doesn't it? One wonders where our linguistic diversity has gone.

As for the infamous proposals, it's crystal clear that the lure of the \$36 million from the Federal Housing Accelerator Fund should not blind us. We're not just talking about adding a few homes here and there; we're talking about transforming our little slice of heaven into something unrecognizable. What's next? Proposing to densify around Sheridan without

consulting the people is nonsense.

I implore you, with all the passion I can muster, to vote against these proposals. We are capable of finding smarter solutions that respect the soul of our community. Let's not let the siren song of funding drift us away from what truly makes the essence of our town.

.....

I am writing to express my objection to more housing density in the proposed area around Sheridan college. This area is already too dense from a traffic perspective. It takes 40 minutes to get from the GO station to River Oaks area during weekday commutes. It should take about 5 minutes. The traffic in that area is way too congested already. There is no way to expand Trafalgar any more. It cannot handle more housing density.

We have exceeded our growth goals as set out by the province. There is no need to grow further in already established areas. These areas cannot handle the growth.

What happened to Oakville's goals of being Canada's most liveable city? What happened to the TOWN of Oakville. You are turning Oakville into an overcrowded city.

Subject: Changing the Character of Oakville

Date: Thursday, February 29, 2024 10:19:45 AM

Dear Oakville Town Council,

As long-time residents of Oakville, our family has deeply cherished the community spirit, safety, and quality of life this town offers. We have proudly raised five children here, contributing to the community and believing in Oakville as an ideal place for families to thrive. However, the recent motions before the council have caused us great concern.

We understand the pressure to address housing shortages and the opportunities presented by the Federal Housing Accelerator Fund. Yet, the proposals to permit four units per property as-of-right and four storeys within 800m of Sheridan College significantly alter the fabric of our community. Such changes risk displacing the very essence of what makes Oakville special to us and many long-standing residents.

These motions, while aimed at increasing housing density, do not directly benefit from the mentioned \$36MM funding, nor do they align with the Minister's emphasis on improving housing options for students in a way that preserves family homes. The town's interpretation to convert family homes into student apartments seems a departure from fostering a community where families can continue to grow and prosper.

We urge the council to reconsider these motions, taking into account the voices of those who have built their lives here. Let's explore alternative solutions that enhance our town without sacrificing the character and unity of our community. Oakville's legacy should be one of thoughtful growth that respects its residents' values and the town's heritage.

In closing, we ask the council to vote down these motions, remembering the families who have dedicated themselves to Oakville, envisioning a future where our children and grandchildren can also call this town home.

Sincerely,

James S.

Subject: Say No to 4-Storey Apartment Buildings. Say Yes to Single Family Homes
Date: Wednesday, March 13, 2024 12:07:00 PM

ATTENTION COUNCILLORS

I am writing to you to state that I am saying No to 4-Storey Apartment Building.

We have been living in this neighbourhood for over 30 years and have enjoyed the community feeling and safety. Single family homes are best utilized by families as the Minister stated.

The Town's actions will impact my family and my neighbours. The character of our community will be destroyed.

You both campaigned on "preserving the character of Oakville", a Livable Oakville.

Keep your promise.

Say Yes to Single Families Homes for Families.

Jeanne Soondarsingh

Anita,

We need your help to save single family homes and the long standing community of College Park in Oakville. Please talk to Minster Fraser before it is too late.

I am currently a resident of College Park for the past 26 years. We bought a house in Oakville after moving from Newfoundland for better job opportunities for both myself and wife . We have raised two children in this community and have never regretted choosing Oakville as a place to live and work.

I watched the Oakville town council meeting on March 4 and was very disheartened with the process and lack of information transparency. I feel more preparation should have been provided from the town of Oakville and more answers supplied. I did take interest in Councillor Elgar's facts that Oakville as a town has increased their population and housing beyond what was initially expected. Also the residents that did speak on our behalf came very prepared with presentations, research and valid concerns.

At the meeting I am unsure the need for the special interest groups being present as I feel their comments were not applicable to our discussions. I am concerned for the environment as well however I have a right to keep our neighborhood environment such as trees, pathways to walk our dogs intact as much as their right to save the farmlands.

I understand that the 4-unit dwelling is being proposed to all of Oakville. As we now have 3 units being allowed as requested by our provincial government. However, the 4-unit complex within 800 m of Sheridan College is where my issues resides.

1. **The federal minister Fraser stated "single family homes are best utilized by families"** If this is correct why are we even considering putting in 4 unit apartments within 800 m of Sheridan College. **PLEASE CONTACT YOUR COUNTER PART TO LET HIM KNOW WHAT IS HAPPENING**
2. A Sheridan College representative should have been present at the town's meeting last night to address our concerns and let us know their plans for housing the students they are responsible for. They need to work with the surrounding community as partners to solve the housing issues for their students.
3. How much money is the town of Oakville receiving to increase the housing units ? Is it 25M, 30M ? And are the 4 storey complex within 800 m of

Sheridan College necessary to receive this money? These concerns were never directly answered.

We as community residents have a right to know how this money will be used to develop our infrastructure and that this FEDERAL program should not be tearing down single family home in our communities to build 4 storey buildings.

Thank you
Jim & Donna Young
Parklane road
Oakville

SAY NO!

Anita,

I am following up on my previous letter which is attached that I dropped off to your office

And

I was wondering what was our response ?

AND how can you help us

Is there any time you can meet with our resident association either in person or by video so we can voice our concerns. As this is a Federal program we are trying to get clarity on the rules the federal minister put on the town council to receive the HAP funding.

The town is saying that the Minister Frazer requested the changes to rezone within 800 meters of Sheridan College thus potential tearing down hundreds of single families homes for 4 story building ---where generations that grown to build this community of College Park.

See attached what this community will look like.

Federal Minister Fraser have said Single family homes should be used for Single

WE NEED YOUR HELP; I NEED YOUR HELP.

We have a petition with Hundred of names of your constituents who do not support this rezoning as part of the federal HAP program

Please reach out to the Homeowners association If you can meet with us .

REVISED

To: Oakville Town Council

**RE: Proposed Official Plan and Zoning By-Law Amendment,
Town-Wide and Sheridan College Housing Area Special Policy
Area.**

42.15.62 and 42.15.63, Ward 1-7

I have two major concerns regarding the above Zoning By-Law Amendments affecting the area where my wife and I live and own a real estate residential property.

1st CONCERN

What I can discern from the proposed changes is that we can expect to see changes in the **frontages** of residential single dwelling properties most notably as they are modified to accommodate the increased occupancy level.

Driveways will be **widened**.

More cars will be visible. **More roadside parking** will become evident

Extra Walkways will be introduced alongside the houses.

More wear and tear on the property will occur due to increased population density over and above what was originally intended.

As to the **rear view** of the affected properties, we will see surrounding us from our rear and side upper level windows :

- **New structures** where previously the view was our neighbours' gardens
- **Reduced care of gardens** as properties are re-orientated toward student accommodation.

ALSO

Whole neighbourhoods consisting at present of Detached Residential Properties will acquire a **less attractive look** as 4-storey buildings are erected. The overall appearance of such areas will be **degraded**.

Under the new by-law can we expect to see our neighborhood houses **BULLDOZED AND REPLACED WITH 4 STOREY APARTMENT STYLE BUILDINGS? IF YES, THEN THIS IS UNACCEPTABLE IN MY VIEW.**

2ND CONCERN

As a result of the new zoning by-law amendment it seems obvious to me that the **market value** of the residential property-owners houses **will decline** within the affected areas and to those houses in the vicinity. The market values will **fail to increase** at the same rate as those in the non-proximate areas.

ARE HOMEOWNERS AFFECTED IN THIS WAY TO BE COMPENSATED FOR SUCH DECLINES IN MARKET VALUE? IF NOT, THEN WHY NOT?

WHY SHOULD WE NOT SUE FOR THE DECLINE IN MARKET VALUE?

QUESTIONS

1. Why are affected homeowners and those in the nearby vicinities not given a chance **to VOTE** on these decisions? Not just given the option to comment through submissions to the council.
2. Why are the **existing zoning bylaws** not disclosed in the communication regarding the proposed amendment. You are expecting the public to make informed comments or input on the proposal aren't you?
3. Why are no **pictorial illustrations** provided to inform affected homeowners and nearby neighbours of what their residential and commercial areas may look like with the passage of time?
4. Why is there such a thing as the Sheridan College Housing Area Special Policy Area. It's not a law but simply a policy that has wide significant

effect on local homeowners. Why does it require lifting of zoning restrictions to the detriment of homeowners?

5. Does not the college have space to erect **more halls of residence** for students **on its own campus** or acquire space **elsewhere at appropriate locations** and to do so without penalizing the local residents by re-zoning their residential areas?

Recommendation

Retain the existing Zoning By-Law with allowance for limited number of student lodgings and room rentals subject to the existing statutory precautionary requirements. This, in addition to Sheridan College's development of additional halls of residence **on their own existing land**,

should be sufficient to meet the requirements of the Sheridan College Housing Special Policy Area.

Specifically, in our neighbourhood, we ask that you retain the existing Zoning bylaw RL 5.0 (Residential Low) for the homes on both sides of White Oaks Boulevard extending from Huron St. to Erin St. on the south and west and Freeman Crescent on the north side up to the northern juncture of White Oaks Boulevard with Trafalgar Road.

Respectfully from:

Lawrence Falconer and Agnes Falconer, owners and residents of the following property for over 30 years: **Freeman Crescent. OAKVILLE ON**

Subject: Re: Item 6.2 - own-initiated Official Plan and Zoning By-law Amendments – Four Dwelling Units Per Property and Sheridan College Housing Area
Date: Thursday, February 29, 2024 1:38:14 PM

In the past two days, we have learned that we will not be allowed to attend, in person, the Oakville Town Council meeting on March 4. We understand that the council felt threatened by another group at a previous meeting. We have no respect for their platform, nor their actions at a municipal level.

The Zoning By-law items, tabled for Monday, are indeed a municipal concern. We request that this meeting be opened to all Oakville residents. If the council believes that there is not adequate public space, then the meeting should be moved to a larger venue. If the council is concerned for their safety, then police protection should be requested.

We are concerned, after reading the letter from Housing Minister Mr. Sean Fraser to Mayor Burton, that council is rushing the process. Money is the focus, rather than the well-being of safe, established, single-family dwelling communities such as College Park.

Mr. Knoll and Mr. Grant, you were visible in College Park during the past municipal elections as you sought our votes. Why haven't you reached out to College Park residents during this life changing zoning by-law agenda? We trust that you have read our letter of disapproval submitted earlier this week. Our community feels threatened and nervous. We respectfully ask that you will fight for the residents of College Park. We also ask that serious considerations be given to moving this back to a public, in-house meeting. If it is too late to secure a larger, safer venue, then we respectfully request that this motion be tabled until we can meet in person.

Thank you,
Mark and Cheryl Baber

Subject: Oakvilles HAF application
Date: Thursday, March 28, 2024 2:59:17 PM

Dear Mr. McNeice,

I am writing you for further consideration regarding the planning departments proposed by-law amendments. These proposal have highlighted to various housing issues that Oakville faces as well as the rest of Canada. With the introduction of the HAF program in which Oakville is in the process of applying to, many other municipalities have applied and been awarded funding. Many of these municipalities that have had successful applications presented generic plans that the federal housing ministry accepted. Why does Oakville Council view its application to the federal government for HAF require specific details, such as the Sheridan College Housing Area? Is it part of a transit hub or corridor? If it is or will be deemed as such, then why have so many other similar areas in Oakville been ignored? What has driven the thought process for targeting this area only. It seems non-transparent. The rezoning proposal seems poorly planned and rushed, just to make the HAF deadline. If this council's intent is to appease the federal government with the amendments, but not really follow through with them to the extreme, that is one thing. Unfortunately, this council will not be in place for ever and future councils could see what has been amended and then activate a strong, heavy handed approach to neighbourhoods, such as College Park. Your actions may be honourable, but you can not guarantee what is in store for the future.

There are two towns in this country that I have a personal connection with since my sister has lived in one and currently lives in the second one along with my father. Surrey BC has been awarded HAF and government site states: "The agreement with Surrey will see the City commit to seven local initiatives "that enable a variety of housing forms and densities to meet the diverse needs of the community," according to the federal government.". Amount: \$95.6M. Then on March 5, 2024 CMHC's website states; "Today, the Government of Canada and the City of Airdrie announced that they reached an agreement to fast track more than 900 homes over the next three years. This work will help spur the construction of more than 3,500 homes over the next decade.". Amount: \$24.8M. This is similar to what I hear is the potential amount that Oakville may receive. The total as of March 25, 2024 is \$3.74B out of the \$4B allotted.

They both do not list targeted area of their respective communities and yet they have been awarded HAF.

Please explore more creative options than the housing by-law amendment; Sheridan College Housing Area-Special Policy Area and vote no.

Thank you for your service to our town.

Kind regards,

Mark Baber

To: [Rob Burton: Town Clerks](#)
Subject: Sheridan College Transit Hub?
Date: Thursday, March 21, 2024 7:48:41 PM

Dear Mayor Burton,

I am personally writing you to consider the negative impact that the proposed By-Law Amendment, Sheridan College Housing Area-Special Policy Area would have on my neighbourhood, College Park. I am asking you to consider viable alternatives to this proposal. I want to share with you my thoughts and observations while understanding the challenges the town is facing in our future.

I understand that Sheridan College has been deemed a transit hub. Oakville Transit and Go Transit services the college for the benefit of its students who commute to it; therefore, it falls under provincial guidelines of 800 metres surrounding them to be utilized for higher density housing. As I understand, this is the Oakville Planning Department's rationale for creating the aforementioned By-Law proposal; however, I do not find this sound logic. An area such as the Oakville Go Train station qualifies as a public transit hub for the general population to use. Oakville Transit and Go Transit enter Sheridan College grounds as a bus stop for the students. It is not a transit hub for the general public.

The planning department has developed this By-Law Amendment proposal, but is failing to acknowledge that Go Transit and Oakville Transit are currently servicing Sheridan College's Trafalgar Campus. These transit systems are declaring that there is not a need to disrupt the surrounding communities since students are able to commute from where they live in Oakville or from a distance to attend the college. Therefore, there is no need to require Sheridan College Students to live within 800 metres (walking distance) of the college in order to attend classes at Sheridan.

Recently a new system using Presto cards, allowing travel from Oakville Transit onto Go Transit means collaboration exists between transit systems in the GTA. Sheridan College in 2019 halted its U-Pass system which allowed students, who paid a fee, to have unlimited use on several transit systems including Oakville Transit. Sheridan College, Municipal and Provincial governments should pursue reinstating this, which would be a huge benefit to students in travelling to the campus, and alleviate the requirements placed on the town of Oakville to supply housing for Sheridan College Students within 800 metres. The empty lands surrounding the Go Transit bus depot at HWY 407 & Trafalgar Road would be suitable for more affordable housing/student housing to be erected, since there is already access to Go Transit buses heading to and from Sheridan College. The 800

metres is a very short distance that I find ridiculous as a requirement for adults to travel while attending a post-secondary institution. Walking is healthy for all of us. On a personal note, my own commute from Newmarket to Downtown Toronto, while attending George Brown College's St. James Campus was 3 hours per day for 3 years. I had to live within my means to achieve a post-secondary education.

Consider that a student riding a bus entering the Sheridan College property is no different than any other person getting on or off the bus at Trafalgar Road at Upper Middle Road. This is not a transit hub, where a rider transfers from one mode of transportation to another. They simply have come to the bus stop that delivers them to their destination. For example, if I wanted to take the bus to the Oakville Go Station, I would travel on the bus through 4 stops heading south along Trafalgar Road. While riding the bus, it would enter Sheridan's Trafalgar Campus as a convenient stop for the college. It is one of the bus stops heading to my destination. I or anyone else of the general public would not be getting off the bus, rather, we would continue riding it until arriving at the GO. Oakville Go Station is a transit hub for the general public and not a specialized destination, as is Sheridan College.

I respectfully point out that the general public do not daily use Sheridan College as a destination. It should not be considered a transit hub for the general public; therefore, the By-Law amendment proposal should be dropped because it does not qualify under the parameters laid out by the federal or provincial governments involving transit hubs.

Thank you very much for your service to our town, as well as your time and consideration in this matter. I do realize the enormity that these proposed amendments place upon you.

Thank you,

Mark Baber

1225 Trafalgar Road
Oakville, ON
L6H 9H3

Oakville Town Council,

It is with significant concern that we state our opposition to the by-law Amendments Town-wide and Sheridan College Housing Area Special Policy Area Town-initiated 42.15.62 and 42.15.63, Ward 1-7.

We disagree with the plan as it currently exists. Three dwellings on a single residential property are too many. Four will increase further the town's density. This increased density will make further demands on already overburdened public infrastructure—hospitals and medical facilities, schools, green space, transportation, water, and sewer services.

Your bylaw states that each structure must have one parking space. What is the plan for all those families who have two cars? It is obvious from the building north of Upper Middle Road that narrow streets and one car garages are not an effective solution.

A significant part of the problem around Sheridan College has been caused by an influx international of students. Where is Sheridan's responsibility in the proposed plan? There are significant open lands around Sheridan College. Why is there no building slated for that area? It seems that the responsibility for Sheridan's housing issues is being placed solely on the Oakville tax payers.

We send this letter to express our concern about increasing the number of houses per lot and to comply with the rules of appeal as set out in the letter included in our tax bill.

Mayor, Councilors:

<https://www.cbc.ca/news/canada/toronto/ontario-housing-funds-1.7152800>

Are you surprised at the Federal Government? I'm not. Remember my skepticism about the tranche payments. I'd be nervous about seeing any money.

Ask yourselves: would you have been interested in increasing the fourplex as-of-right, or even given the concept a consideration, had it not come with a large \$ inducement? Now Oakville may well end up with fourplexes scattered around the community and no money to finance any infrastructure they may require. It goes from bad to worse. ***Sigh***.

Mayor, Councilors:

If the Global News report about the Province legislating fourplexes holds true, it

transfers my objections to the acceptance of the fourplex condition made by the Federal Minister of Housing for the issuing of the \$25 million FGAG up a level of Governance to the Province.

Attached is my email to Mr. Crawford, MPP. It will be interesting to see how much zoning discretion will remain at the Municipal level.

On the face of it, it would appear as if the Province has preempted your responsibilities with regard to the fourplexes on residentially zoned lots. It may also have taken away some of your authority, depending on the drafting of the legislation.

Ontario risks \$357M in housing funds without revised plan: feds

Federal housing minister calls province's action plan a 'disappointment'

CBC News · Posted: Mar 22, 2024 3:53 PM EDT | Last Updated: March 22

The Ontario government could lose \$357 million in federal funding for affordable housing if the province does not resubmit its action plan to meet federal housing targets by the end of the day Friday, federal housing minister Sean Fraser said in a letter. (Katherine Holland/CBC)

[comments](#)

Ontario risks losing \$357 million in federal funding for affordable housing without a revised action plan to meet federal housing targets by the end of the day Friday, the federal housing minister said.

In a letter addressed to Ontario Housing Minister Paul Calandra on Thursday, federal Housing Minister Sean Fraser wrote that Ontario's draft action plan for 2022-2025 fails to meet commitments made to the federal government in 2018.

"Speaking frankly, the proposed Action Plan is a disappointment," Fraser wrote in the letter.

In response to Fraser, Calandra said that "it is unacceptable that you would choose to threaten our most vulnerable."

He told the minister that "withholding funding would simply be a punitive measure that will benefit no one."

'Ontario is lagging desperately behind': minister

The federal government signed the National Housing Strategy (NHS) Action Plan in 2018, a 10-year bilateral housing agreement for the delivery of over \$5.8 billion in cost-shared investments in Ontario, the federal letter says.

Fraser wrote that the province's action plan fails to meet commitments of the agreement.

"Ontario is lagging desperately behind all other provinces and territories," he said.

In his response, Calandra said the economic landscape has shifted since the 2018 agreement, citing the rising costs of building materials, supply chain disruptions, gaps in the labour market and higher interest rates.

The provincial minister also wrote that Ontario's social housing stock is the oldest in the country and "in the greatest need of repair and renovation"

"By focusing on the repair backlog, Ontario has successfully staved off the risk to both affordability and availability of units for tens of thousands of families and overachieved on the NHS repairs target," Calandra wrote.

- [Liberals detail \\$40B for 10-year national housing strategy, introduce Canada Housing Benefit](#)

Ontario housing minister fires back

Calandra said the province has exceeded the overall nine-year repairs target by 170 per cent.

Ontario also has the highest share of households in core housing need compared to other provinces and territories of the country, he added.

While the federal NHS allocates funds according to population, Calandra wrote that Ontario's core housing need is at 44 per cent — "well above our population share of 38.5 per cent."

Under the partnership, Ontario agreed to expand the number of new affordable housing units in the province by 19,660 and set annual targets through publicly available three-year action plans, the letter says.

The province also agreed to report on progress on both the annual and nine-year target, according to the letter.

The federal housing minister added that the lack of progress in the province "jeopardizes the completion of both Ontario's housing targets, and Canada's national target."

Premier Ford says it's a 'massive mistake' to impose fourplexes across Ontario

LAURA STONE > QUEEN'S PARK REPORTER

TORONTO

PUBLISHED MARCH 21, 2024

UPDATED MARCH 22, 2024

Ontario Premier Doug Ford speaks during a press conference in Milton, Ont., on March 8.

NATHAN DENETTE/THE CANADIAN PRESS

Ontario Premier Doug Ford is ruling out a policy to automatically allow fourplexes to be built across the province, arguing that it would be a big mistake to force them upon municipalities.

Canada's most-awarded newsroom for a reason

\$7.99 PER WEEK **\$1.99** PER WEEK FOR 52 WEEKS

Mr. Ford, who has made housing a key priority of his government, said Thursday that some residents don't want multiplexes in their neighbourhoods and his government is focused on building single-dwelling homes and townhouses.

"I can assure you 1,000 per cent, you go in the middle of communities and start putting up four-storey, six-storey, eight-storey buildings right deep in the communities, there's going to be a lot of shouting and screaming," Mr. Ford said in Richmond Hill, Ont., where he was making a prebudget announcement.

"That's a massive mistake."

The federal government has been pushing cities to change their zoning bylaws to allow fourplexes to be built "as of right" – ending exclusionary single-family zoning as a prerequisite for accessing the Housing Accelerator Fund, which sends millions to municipalities to address the housing shortage. Mr. Ford was responding to a proposal from the Ontario Liberals to implement such a policy across the province.

Federal Housing Minister Sean Fraser released a statement Thursday panning Mr. Ford's comments, noting the province's own housing task force recommended as-of-right zoning for multiplexes.

"Ontario had an opportunity to demonstrate their commitment to building more homes and to take the housing crisis seriously. They could have adopted their own housing task force's recommendation to allow people to build up to four units on their own land without having to go through lengthy application processes," Mr. Fraser's statement said. "Instead, they chose red tape and the status quo."

Fourplexes are typically in two or 2½ storey buildings – not six or eight – and the provincial task force said the province should allow units up to four storeys on a single residential lot.

Mr. Ford, who will release his budget next Tuesday, announced that his government will spend \$1.8-billion on housing infrastructure, including more money for water systems. His government has repeatedly called on Ottawa to send more money to provinces for infrastructure costs. The provincial government has said it wants to

Federal Conservative Leader Pierre Poilievre has also railed against municipal “gatekeepers” who prevent houses from being built and has said he would issue financial penalties or withhold funds from cities that do not increase homebuilding by 15 per cent annually. His office did not respond to a request for comment about Mr. Ford’s remarks.

Dozens of cities, including Toronto and Mississauga, have loosened zoning rules to allow such properties and to access tens of millions in federal money. Others, such as Windsor, Ont., have rebuffed Ottawa’s request to open all neighbourhoods to what planners call gentle density, arguing residents should decide and raising concerns about the impact on sewers and other infrastructure.

Ontario Municipal Affairs and Housing Minister Paul Calandra told reporters at Queen’s Park that the province won’t “micromanage” municipalities on their housing plans, and that cities have been calling for more infrastructure to get homes built. He said uptake on cities’ current ability to build three units hasn’t been as successful as many would have liked, with fewer than 21,000 units built.

“We have to do a heck of a lot better than that, and we’ll let municipalities make those decisions,” he said.

Opposition parties accused Mr. Ford of being the kind of politician he has long derided: a NIMBY, short for “not in my backyard,” who doesn’t want any change around him.

Ontario NDP Leader Marit Stiles said she supports the fourplex as-of-right policy and called Mr. Ford’s comments “frankly outrageous” and “deeply insulting.”

“He’s sending a message to Ontarians that if you can’t afford a single-family detached home you’re not welcome in your community or your neighbourhood. It shows once again how completely out of touch this Premier and his government are,” she said.

Liberal MPP John Fraser said Mr. Ford leads a “NIMBY Conservative government” and labelled him a “NIMBY Premier.”

“They’ve been focused on taking care of their friends and insiders instead of focusing

Mike Moffatt, assistant professor at the Ivey Business School at Western University in London, Ont., and founding director of the PLACE Centre, a housing think tank, said he was surprised and disappointed to hear Mr. Ford's comments.

"We need all housing types if we're going to address this crisis," Mr. Moffatt said in an interview.

"It's so important for the province to set minimum standards for all municipalities. Because otherwise every municipality wants some other municipality to solve the problem."

Some provinces reject \$6-billion housing program announced by Trudeau ahead of federal budget

From: [REDACTED]
To: [Rob Burton: Oakville Council 2023](#)
Cc: [Town Clerks](#)
Subject: Transparency
Date: Monday, March 11, 2024 10:45:16 AM

Mayor: Councilors:

I have made it clear that I do not agree with the adoption of the as-of-right placement of fourplexes by Oakville Council. My only qualifier is that the uptake may not be immediate but will gather momentum over the next 5 to 10 years.

The main counter-argument against says to me, “Chill. Relax. Look, it’ll be just like the Province’s mandated three-plexes. Going nowhere.”

I believe this reflects Oakville’s position, which gives rise to another concern – transparency. My conscience would not allow me to rely on the “tiny uptake” argument and still accept the Federal money without advising the Minister that this is the case. Therefore, if the existing acceptance of the Federal Government’s Accelerator Fund is not rescinded by Council, the only ethical way forward is to include an advisory note along the lines, “ We have adjusted the Zoning bylaws to accommodate the as-of-right requirement as shown in Appendix X, but Council’s consensus opinion is that there will be very little uptake to increase dwelling stock through the insertion of fourplexes in residentially zoned areas.” If this issue has not already been passed through the hands of Accountability and Transparency gatekeepers in the Town, perhaps it should be.

With this caveat, the ball will then be in the Minister’s court as to whether he accepts Oakville’s application for funds. There can be no blow-back that the Town has not been transparent.

On the matter of phased tranches of the allocated funds, I hope it is abundantly clear to everyone that if conditions, such as particular achievement goals by specified dates, some of which may relate to fourplexes, that qualify the requirements of each future tranche, then there is a strong possibility that if the conditions are not met, the Town will receive nothing, or receive only partial payments. Therefore, there has to be a high degree of confidence that any Federal requirements are met or the pot of gold may disappear and the infrastructure funds to place fourplexes may just vanish.

Subject: Fourplexes in Oakville
Date: Thursday, March 7, 2024 1:30:35 PM

Mayor, Councilors:

At the 4th March meeting the Town Clerk requested that all correspondence to the Town on the FGAF be forwarded to their office. Below are all four emails (oldest first and then in date order) I have previously sent, consolidated in this one email. I am uncertain of whether any of the opinions I previously sent found their way to the Town Clerk and apologize if this a repetition of what they have already received.

I still think that the acceptance of the fourplex condition is a Faustian bargain that sells the soul of Oakville. The original approval had \$36 million shining brightly, now it is about 30% lower at \$25 million. The first tranche is peanuts. But the important information that was not asked about, nor shared by staff, is what the Town has to do to get the subsequent tranches? Are they just automatic dependent of just a date schedule or are there benchmark goals that have to be achieved to receive them? If the latter, what are the goals and are they tied to a timetable? Are the goals readily achievable? If they are missed, the Town has sold out Oakville's character for a mess of pottage. Bear in mind that a new Government in Ottawa will likely be able to mess with the tranches through delays and/or changes in requirements, if not full-on rescinding the legislation. There has to be a clear statement in the final staff submission about the logistics and conditions attached to the future tranches of the Federal FGAF.

To give a dollar perspective; council approved \$5 million as play money to develop a downtown *one-third-of-a-billion-dollar* (my estimate) redevelopment cultural hub plan. No housing in this outlay.

I reiterate that all emphasis by the planning department has been on the adaption of existing buildings, with some potentially misleading graphics. A clear statement, rather than the inferred situation (as couched in the definitions) that demolition and total-rebuilds are just as likely and total redevelopment of lots should be included in the presentation.

Apart from the whole jurisdictional issue (see an earlier email, below, as to who has the last say), the Committee of Adjustment will have some challenges. For example, if the "front door" is placed on the side of the building then the side yard separation can be just one meter as matters are now presented. With a driveway going down the back and parking at the rear all setback requirements are easily met. Developers can be creative and devious. Also, do not expect rebuilds to be like the creative shots shown at the meeting by a delegate (such wishful thinking). Expect a dull rectangular block with a flat roof. If aesthetic standards are to be met for any new development then this should be clearly stated as part of the up-front package.

One other aspect I would mention again: the Property Standards Bylaw. No sign of it was mentioned

at the meeting, except for a delegate's very clear example of the mature tree that was removed and gravel flung down as a parking spot. That's what the Town will be facing. Reinforcement of the recently revamped bylaw needs to be revisited, and reference made at this early stage as part of this exercise. More inspectors, with sharp teeth, will be needed.

As far as the Sheridan area is concerned, The College has clearly got to the Federal Government to include this. Oakville must have been asleep at the switch to find itself in this position. Cannot the Town use any funds received from the Feds and expropriate some of the Sheridan land to build student housing through request for proposals (RFPs) on land leased from the acquired land owned by the Town. QED.

I detected a certain complacency amongst some of the Council members, perhaps arising out of an impression that because the uptake of triplexes has no take up then it follows, in some people's minds, that fourplexes will follow the same route. This is the big bet. My opinion is that fourplexes are passed the tipping point for redevelopment of detached houses, maybe not immediately, but over a five to ten year horizon. Council seems to be betting that fourplexes will not take off. If I am wrong there is little impact, but if Council is wrong then it, you, have ushered in a major retrograde paradigm shift in Oakville. I hope you can live with that, because we certainly will have to.

Subject: Four is four letter word

Mayor, Councilors:

Fourplexes insertion into residential areas, madness. Site building coverages, toast. Side yard distances, fire hazards when reduced. Height restrictions, shadows and voyeurs' delight when towering over the neighbours. Parking, either pave over paradise to add to climate change or allow 365/24/7 street parking: you choose. (Just look at your own recent parking bylaw. BTW, where do you put the snow?)

I cannot understand why the number of units on a lot cannot be tied to the size and shape of the lot, *maintaining all the present standards* QED.

There is a maxim: if you are going to be a refugee be the amongst the first to leave. Similarly, if the foursome rule wins then I will consider becoming the first to develop my lot and beggar the neighbours, for their property values will certainly diminish. (No, I won't do that but how many will take that attitude? Also, have you considered what happens if a locus storm of Developers descend on Oakville, what will you do?) You may have more housing but no votes on those streets if you do

not fight tooth and nail to dismiss this community wrecker. Or is this your swansong?

There is also the consideration of devaluation of surrounding houses after a fourplex is plonked on their street. With lower market values the taxable valuation goes down and Oakville's revenues may well reduce. Has anyone done that calculation? You may have to have a detailed actuarial analysis since this will be a slow, irreversible erosion of all the financing of all the values Oakville has attempted to achieve.

This is a wedge issue on the type of community you wish Oakville to be. Get it wrong and you will have undermined the community you have striven to create. Fourplexes forced into existing residential streets is a major downhill paradigm shift that changes our living environment forever.

Do not support any wild fourplex insertion into existing neighbourhoods. Just say NO. Stop being bought away from the principles you have established (and go out on a high note?).

Michael Young

PS. I've not even touched on infrastructure overload.....

Feb 7th 2024:

Councillors:

When I wrote to you on 25th January (see below) I endeavoured to be factual and rational. I have reflected on the issue and my view point has become more visceral.

The Federal Government accelerator fund is politely spoken of as an "incentive". I see it as a simple ~\$60 [I got this wrong] million bribe. This is not unknown in the development industry paradigm – incentives that is.

The deal struck is Faustian in nature. It sells the soul of Oakville. You had the delivery of housing covered. Now, acceptance of the poorly defined as-of-right opens the door to severely undermine the cohesiveness of our community to reduce Oakville to a bunch of fragmented, mixed-character neighbourhoods. To use a more modern metaphor of the offer, I can see a parallel with the thrust of the plot of the movie Indecent Proposal.

Overly dramatic, probably. Doomsdayism, possibly. But are you absolutely sure I am incorrect? Oakville will live with the consequences of your decisions forever.

At 86yo, I will not have to live with the effects of your actions. Others will have to. I hope, if you choose to stay in Oakville, that you will not, in your middle-to-old age, seriously regret the decisions all but four of you have made? Maybe there is still time to change direction.

Michael Young

PS; My credentials to discuss this subject: I am an Engineer (Civil) immigrant from England. I have lived in Oakville for over 50 years. I came to Canada to build over 60 low cost, modular, factory made houses in Hamilton in 1971-73. The architect was Diamond and Myers. We were building 2 houses a day at the end of this exploratory project. I went on to act as a Project Manager at the Province's Ontario Housing Corporation, spent two years in the Deputy Minister of Housing's Office and managed the Ontario's Western Region's public housing portfolio. I know something about the delivery of and policy around housing . Lest you think I am a left wing activist, you might be interested to know I went on to be responsible for the all physical aspects of design, building, outfitting, maintenance and security of the large Canada-wide network of branches as a Vice President for one of the major Chartered Banks. That's all before I went to OCAD.

Subject: Four is too much

Mayor, Councilors:

I watched the video of the Planning and Development Council Meeting discussing their response to the Federal Government's Accelerator Fund offer.

Council abandoned its aspirational core value to make Oakville the most livable town in Canada when it accepted "four as-of-right". Council gives the impression of putting gelt before principle without looking 5 to 10 years down the line.

Firstly, to my knowledge, no one has defined what the Government's "as-of-right" means. It was not clearly expressed at the meeting. Why has this lack of clarity not been challenged with the Minister? Nor did we get a legal opinion as to how a court might interpret "as-of-right". Oakville Council has assumed anyone building a fourplex of any sort will be subject to all the various codes and bylaws, but this has not been clarified, and comprehensively stated, making it a grey area. One assumes at one's peril. You are running on a hope and a prayer as Councilor Edger succinctly expressed it.

When height and building setbacks in the bylaws/codes are applied a minimum sized lot can be established that will accommodate a four unit development. Therefore, anyone with a lot less than these dimensions does not qualify for the as-of-right designation. They are excluded contrary to the Minister's requirement and owner's expectations from his as-of-right declaration. I hope the staff work will make this clear. Also it is important that the staff look at irregular shaped lots as well. My house sits on a trapezium shaped lot with the front at 40 feet and the back 80 feet. Further, and surprisingly, it is possible for a town house on a freehold titled lot to be subject as-of-right

designation by gutting and creating four apartments, or even demolished and rebuilt. Take a look at YouTube for multitudes of examples of small homes/houses.

I found it surprising there is a thought in Council that because the uptake of the Provincially-dictated, limited-scope three-unit approach has been low, the same is will apply to fourplexes. Developers are patient. Why go for a proscribed three unit approach when it will be possible for four units of any configuration is just around the corner? That would be nuts. To think otherwise is extremely naïve. If I was thirty once more and in the building industry I would be licking my chops at the prospects. This would involve demolition and total rebuilds, not the building tweaks the Council seems to be considering. I've seen such redevelopments occurring in Switzerland and England. It's coming. The economics of creating a three unit (with two units in an existing house and a third detached) offers no real financial incentive. I suggest that a fourplex is well beyond the tipping point of good breakeven returns.

The 800 meters from Sheridan College is vague. Is this a radius from a central point on the Sheridan campus or is projection of parallel lines to the boundaries of Sheridan, which would add about another 100meters in all directions. Once more, there is a paucity of definitions that have to be filled in by staff.

I thought the remarks about a change of the Federal Government was brushed off too lightly in the meeting. Does the legal department wish to take on the Federal Government?

The last minute rush to get a reply to the Minister and the lack of public consultation smacks of a sloppy administration. Hopefully, the staff report will be a lot more rigorous and the embedded judgement will be exercised with the view to improve the life of Oakvillians. The cavalier attitude imputing a "symbolic" stance to the Minister (I hope he does not watch the demeaning comments about him in the video) suggest to me the whole matter was never taken as seriously as it should and this may account for the rushed ending to this part of the process.

When the Staff report is in, good luck with giving a highly qualified response to the Government that is dependent on their acceptance of the application of bylaws and codes to the as-of-right freedoms. I look forward to seeing the staff report.

I thought that Councilor Elgar was closest to having to have a realistic grasp of what Oakville is getting into.

Michael Young
Ward 6

Feb 26th 2024

Mayor/Councilors:

Merriam-Webster defines As-of-right as a legal term:

as of right

idiom

law

: according to what is legally correct

The problem lies in what legal jurisdiction is at play.

Is it:

1. Does the Minister's proclamation and requirement that the as-of-right condition for receiving the Federal monies represents the application and, by inference (and/or contractually), the acceptance of the Doctrine of Paramountcy? Does the Federal requirement take precedence? If so, what conditions are attached to the as-of-right demand?
2. Or: Provincial law is applicable. Does this amount to establishing the position the Ontario Land Tribunal will take in any challenge to the prevention of an as-of-right development by a municipality where the zoning bylaws and their associated restrictions are not met? Is there any guaranty the municipal bylaws will be recognized as paramount, being mindful that this whole issue arises out of the need for more housing?
3. Or: The Municipal zoning laws apply and must be met? This would be the ideal situation, but it cannot be assumed it would apply. Further, if any fourplex development is submitted to the committee of adjustment, what latitude will be granted to the developer? This will further mean that the as-of-right proclamation by the Minister of Housing is qualified by the requirements of the local bylaws. On some smaller lots a fourplex would have to be not much larger than a sizable dolls' house to meet the requirements. In other words small lots fall outside of having an as-of-right designation.

In short, if a proposed development does not meet the local zoning and other bylaws, where is the legal remedy, and the determination of the meaning and application of as-of-right, adjudicated? In the absence of a clear answer to the question as to who has clear legal jurisdiction then all debate is moot.

I am hopeful that this legal jurisdiction issue has been resolved in discussions/ negotiations by staff off line and will be revealed at the Council meeting. If not, does anyone else have a clear answer to this core matter? If so, please let us all know.

Michael Young

March 4th 2024

Mayor, Councilors:

I note that the Additional Dwelling unit definition is defined as: "means one or more habitable rooms containing separate kitchen and bathroom facilities for private use as a single housekeeping

unit which is contained within a detached dwelling, semi-detached dwelling, linked dwelling or townhouse dwelling. “

Please note this definition does not exclude a purpose built fourplex. Therefore, it is inferred that demolition and new construction is permitted. The report makes reference to such new build approaches in other municipalities but is silent on the subject of purpose-built fourplexes in this report. Why? Seems like a downplaying of this option open to developers. If it is intended to only refer to existing dwellings then the word “existing” should be inserted in the definition.

I note that no alterations and/or additions deemed required to the Property Standards Bylaw. Is this really so? I am surprised. I would have thought that guard rails against poorly maintained multi-occupancy buildings is essential and should be covered, or, at the very least, referenced at this early stage in this whole process.

I find the conceptual sketches in circulation misleading. They do not appear to show the required side and back yard setbacks in proportion to the size of the building(s). The sketches, at the very least, must reflect reality to insulate against a challenge using the sketches as a sign of flexibility contrary to the statement : “These permissions would allow for the conversion of detached dwellings within the existing residential low zoning regulations, which would continue to apply, such as setbacks, built form and height requirements.” I would further note that the “additional building, detached” would not necessarily be a single storey unit as envisaged in the sketches.

Subject: Affordable Place to Live
Date: Thursday, February 29, 2024 9:26:06 AM

Dear Town Council,

As a young resident deeply invested in our town's future, I urge you to reconsider the current proposals to increase housing density. While the allure of federal funding is undeniable, our focus should diverge towards creating sustainable, high-rise affordable apartments on Sheridan Campus.

Our lives as students revolve around studying and socializing. Having affordable housing options directly on campus could significantly enhance our educational experience, fostering a stronger sense of community and making our day-to-day logistics much more manageable.

The proposal to convert single-family homes into multi-unit dwellings or to push for four-story buildings near Sheridan overlooks a crucial opportunity to directly address the housing needs of students. By voting down these proposals and instead advocating for high-rise student accommodations on campus, we can ensure a balanced approach to development that respects the character of our town while meeting the genuine needs of its younger residents.

Let's prioritize solutions that truly reflect the needs of all community members, especially those of us whose voices are often overshadowed.

Sincerely,

Mollie M

Subject: Special zoning for Sheridan College area
Date: Sunday, March 31, 2024 5:55:06 PM

Dear Councillor Longo,

Reading your campaign material, I see we share many of the same goals for Oakville. We are just across the river in Ward 5, backing onto Sheridan College.

We particularly share your desire to control growth, protect residents from unwanted development applications and facing pressure from developers. You understand that we are a town of neighbourhoods.

The strong, safe, established, family oriented neighbourhoods surrounding Sheridan College are being threatened by the motion to allow the building of 4 storey apartment buildings with no parking on any lot to alleviate Sheridan's student housing problem. Many young families have moved in, no doubt attracted partly by the lovely splashpad and park equipment put in by the Town. They are busy not only adding value to their homes but also building relationships in our welcoming neighbourhood.

The neighbourhoods surrounding Sheridan serve a purpose in keeping a situation from developing like in Brampton, Kingston and Waterloo. London just put in new tenant rules to stave off the creation of a student ghetto. A student ghetto is marked by parking issues, transient tenants who have no vested interest in the neighbourhood, absentee landlords, and poor upkeep and the exodus of caring ratepayers.

The Town, if this motion is adopted, will be faced with trying to put the genie in the bottle. Our neighbourhood has worked hard on the issue of illegal rooming houses and absentee landlords. We have welcomed the development of legal basement apartments as a means of helping housing to be affordable. We are the Town's partner in keeping Oakville the most livable town and finding solutions to issues. We noticed that not one councilor volunteered their neighbourhood for this special Zoning at the March 4th meeting. Council knows what that would mean for their part of Oakville.

There are much better solutions to the student housing issue and we feel that they need to be seriously considered by the Planning Department. The Federal Government is offering low cost loans for college and university residences in the Fall and Sheridan has an approved master plan showing residences. Sheridan has not made any overture to address their issue since 2009. They have the means to supervise their tenants and we know that their grounds upkeep is excellent.

There is no need to do a blanket special bylaw when a redevelopment of, for example, the Rabba's strip mall, could receive zoning to allow rentals above retail. Each application could

be considered separately and this would allow for your and our priorities to be respected.

We ask that you please vote no on the motion to allow 4 storey apartment buildings to be built among our family homes. Let's keep Oakville a town of neighbourhoods.

Subject: Re: 4 storeys as a right in 800 metres of Sheridan
Date: Thursday, March 28, 2024 1:33:35 PM

Dear Councillor Lishchyna,

I am writing to ask you for a response to my email which is also included below.

I know you have stated that when talking to ratepayers the message you got was Oakville is a great place to live, work and raise a family and you agree that we need to continue to work towards having the most livable town in Oakville. I feel that you understand the idea of neighbourhood.

Further to my previous email, with your experience, you know it is important that the Town keep control of development. The adoption of the special zoning will take control out of the Town's hands and put it in the hands of the developers. There is already an undercurrent that developers may have too much input and, whether this is true or false, it is there.

The Town can consider applications for zoning on an individual basis. There are lands that do not disturb wonderful family neighbourhoods. This would allow Oakville to continue to be a great place to live, work and raise a family.

My area is turning over rapidly to young families and I want them to have what I had, a safe Oakville family neighbourhood, complete with new splash pad and park equipment and caring neighbours. I want my Oakville not to be dealing with a student ghetto by trying to put the genie back in bottle.

Please reply so that we can perhaps continue to talk about this important issue for Ward 5 and 6.

Myra and John Willis
Parklane Road.

On Mon, Mar 25, 2024 at 11:20 AM, Myra Willis

Dear Councillor Lishchyna,

I live in Ward 5 on Parklane Road backing onto Sheridan College but the issue also affects your Ward 6. Some issues are hard to contain geographically like the growth of a "student ghetto".

As you are aware, student housing issues can create "student ghettos" like in Brampton, Kingston, is developing in Waterloo, and has London cracking down on number of

tenants.. The neighbourhoods around Sheridan have kept this from happening.

We have fought hard to keep rooming houses out (we did have some rather nasty occurrences with student rooming houses). We also welcomed homes with legal basement apartments to help offset the high cost of homes for new buyers.

Sheridan failed to build any residences in Brampton. The issue of building residences in Oakville has not been addressed by the College since 2009. It is time for Sheridan to come to the table and take ownership of this issue. The residences are on the approved master plan plus the Federal Government will be offering low cost building loans for residences to colleges and universities. It's the perfect opportunity for them to act and not put it on the Town and ratepayers to grapple with its problem.

With building approved on campus residences and other options being available (ratepayers have excellent ideas), there is no benefit for Oakville or the College in allowing our neighbourhoods to be destroyed by 4 storey apartments with no parking and no cap on how many students can be packed into them. In fact, it will create problems that the Town will have to deal with like Brampton that found 25 in a basement. A high turnover of transient students with no personal attachment to their surroundings, no parking and absentee landlords spells disaster.

Our new neighbours are families who deserve to raise their families in the safe, family oriented area that we had moved into for our family. We are a family neighbourhood and Oakville is neighbourhoods

We ask you to vote no.

Subject: Concerns Regarding Proposed Amendments to Official Plan and Zoning By-law- Four Dwelling Units Per Detached Residential Property
Date: Friday, March 1, 2024 2:21:43 AM

To whom it may concern,

I am writing to express my deep concerns regarding the proposed amendments to the Official Plan and Zoning By-law, specifically regarding the allowance of four dwelling units per detached residential property.

As a member of the community, I believe it's crucial to consider the long-term implications of such amendments on our neighborhood's quality of life. While the intention may be to increase housing opportunities, I fear that the proposed changes will have several detrimental effects on our community.

Firstly, adding four dwelling units per property will lead to a significant increase in population density. This rapid population growth will strain our existing infrastructure, including transportation, schools, and healthcare facilities, ultimately diminishing the quality of life for current residents.

Moreover, the focus on providing housing primarily for students raises concerns about the transient nature of the new residents. This influx of temporary occupants may disrupt the sense of community and neighborly trust that currently defines our neighborhood.

Additionally, the increased turnover of residents could lead to a lack of investment in maintaining properties, further deteriorating the overall aesthetic appeal of our area.

Furthermore, the environmental impact of these amendments cannot be ignored. Clearing land for additional dwelling units will result in the loss of green spaces and mature trees, exacerbating issues related to air quality and urban heat island effect.

Moreover, the anticipated rise in vehicular traffic will contribute to pollution and noise, diminishing the tranquility of our neighborhood.

In considering the long-term financial implications, it's essential to recognize that catering primarily to student housing may not attract the affluent homeowners needed to sustain property values. Instead, the influx of transient residents could lead to a decrease in property values over time, as the neighborhood becomes perceived as less desirable due to overcrowding and associated issues.

In addition to these concerns, I would like to highlight several other potential issues that could arise from the proposed amendments:

1. Strain on Public Services: The increased population density could overload public services

such as waste management, emergency response, and utilities, leading to longer wait times and decreased service quality for residents.

2. **Parking Shortages:** With more dwelling units per property, there may be a shortage of parking spaces, leading to congestion on residential streets and difficulty finding parking for both residents and visitors.

3. **Loss of Privacy:** Additional dwelling units could lead to a loss of privacy for existing residents, as more people occupy the same amount of space, potentially impacting sightlines, noise levels, and overall sense of security.

4. **Impact on Schools:** An influx of new residents, especially students, could put strain on local schools, leading to overcrowded classrooms and decreased educational resources for students.

5. **Decreased Sense of Community:** The transient nature of student housing may result in a decreased sense of community cohesion, as residents come and go frequently without establishing long-term connections with their neighbors.

6. **Potential for Overdevelopment:** Allowing four dwelling units per property may open the door to overdevelopment and speculative real estate practices, leading to the degradation of the neighborhood's character and charm.

7. **Legal and Regulatory Challenges:** Implementing such significant changes to zoning regulations may pose legal and regulatory challenges, potentially leading to conflicts and litigation within the community.

8. **Impact on Property Taxes:** A change in the demographic makeup of the neighborhood, particularly if it leads to a decrease in property values, could impact property tax revenues for the municipality, affecting funding for essential services and infrastructure projects.

These comprehensive concerns highlight the need for careful consideration and thorough community engagement before moving forward with the proposed amendments. I appreciate your attention to these matters and look forward to further discussions on how we can address these issues together.

Thank you for taking the time to address these concerns.

Subject: Feedback regarding by-law amendments and Sheridan college housing area

Dear Mr. Burton, Mr. Grant and Mr. Knoll

We have been homeowners in the College Park area for almost thirty years. We moved into this area to enjoy a quiet family-oriented community with an abundance of school-aged children, friendly neighbours and dog walking enthusiasts. We raised our children here. Although many original owners have moved on, new families with young children are moving in, thus keeping our community aligned with its origins.

The integrity of our neighbourhood would be changed permanently with the implementation of the amendments to the current zoning in which you are in support of. Have you truly considered the impact the new Sheridan College Housing Policy Area would have on homeowners like ourselves?

We do not want our privacy taken away by a four storey structure built next to our home.

We do not want our neighbours yards and trees replaced by paved parking spaces. We do not want the safety of neighbourhood children, seniors and dog walkers jeopardized by the increase in traffic on our crescents.

We do not want the increase in noise pollution an influx in younger people in the area could bring.

We do not want to walk by unkept, littered properties which often are a result of student occupied dwellings.

Our new splash pad should be enjoyed by children not Sheridan College students.

We are sympathetic to the need for affordable student housing but this proposed zoning change has no benefit to homeowners. It benefits Sheridan College, the City of Oakville and developers. Why has the burden of solving the student housing crisis been placed on our neighbours and ourselves?

There are other options. The city could designate land within walking distance of Sheridan College for affordable rental apartments instead of executive townhomes and luxury condominiums. Sheridan College could build additional residences on existing vacant college property. Sheridan College could reinstate their shuttle bus service to facilitate easy commuting for students thus alleviating the necessity of imposing an 800 m proximity to the college.

Finally, please add to your records that we **STRONGLY OBJECT** to the sudden proposed Sheridan College Housing Special Policy Area you are attempting to establish. Let it be known that we are also very disappointed that you, as elected officials, have given your support to this ill-conceived plan which will negatively impact your constituents and their families.

Please keep our small corner of Oakville liveable.
Thank you for your time and understanding.

RE: This notification is for a Notice of Statutory Public Meeting about housing in the City of Oakville, Ontario specifically for the Sheridan College House Area. The reasoning for the notification of the upcoming meeting is the changes being proposed. The changes being proposed include: permit additional dwelling units subject to regulations of the Zoning By-law; ensure additional dwelling units do not count toward the calculation of density; in addition to the primary dwelling unit, permit a maximum of three attached additional dwelling units within a detached dwelling on a lot.

Your File #: 42.15.62 and 42.15.63

Our Reference #: ENB_R240221-001ON_TownOfOakville_Official_Plan_ZBLA

Thank you for sending Enbridge notice of this project. B&A is the land use planning consultant for Enbridge's Liquids Pipeline network across Canada. On behalf of Enbridge, we work with municipalities and stakeholders regarding planning and development in proximity to their pipeline infrastructure to ensure that it occurs in a safe and successful manner.

We request that this response package is provided in full to the landowner / applicant as it contains useful and important information, including certain requirements that must be followed, in respect of development in proximity of pipelines.

Description of Application

We understand that this application is for a Notice of Statutory Public Meeting about housing in the City of Oakville, Ontario. The amendments will affect the zoning bylaw, Livable Oakville Plan, specifically for the Sheridan College House Area. These amendments will facilitate and encourage a higher amount of housing to be permitted on a single lot specifically for the Sheridan College House Area. The Sheridan College House Area is within the pipeline assessment area of Enbridge infrastructure. This project will not cause any new crossings. This project will not have a direct impact on any class around Enbridge lines unless the line is close to being out of class. Then the additional density may push the section into the next class.

As demonstrated in [Attachment 01 | Approximate Location of Pipeline Infrastructure](#) the proposed zoning bylaw change is within the pipeline assessment area of Enbridge pipeline infrastructure.

Assessment & Requirements

Based on a review of the project materials provided the proposed zoning amendment is not proposing any new development at this time and is not proposing any new crossings or ground disturbance within the prescribed area. Therefore, **Enbridge has expressed no objections to this project as proposed.**

Although Enbridge has expressed no objections to the proposed zoning bylaw at this time, the pipeline is located north of Upper Middle Road therefore, all the requirements detailed below and within [Attachment 02 | Enbridge Development Requirements](#) must be adhered to for all future development.

Requirements

- 1) **Obtain a Locate Request:** To identify the precise alignment of the pipeline on the subject lands, a Locate Request must be made prior to any ground disturbance taking place.
- 2) **No development is permitted within the Enbridge right-of-way** without Enbridge's written consent and without the presence of an Enbridge representative on site.
- 3) **Written Consent from Enbridge is required for ground disturbance within 30m perpendicularly on each side from the centreline of the pipeline known as the "Prescribed Area"**. For more information about when written consent is required and how to submit an application, please see [Attachment 03 | Enbridge Pipeline Crossing Guidelines](#).
- 4) **Written Consent from Enbridge is required for all above and below ground crossings of the pipeline.** For more information about when written consent is required and how to submit an application, please see [Attachment 03 | Enbridge Pipeline Crossing Guidelines](#).

The written authorization request must include:

- a. Drawings with cross sections of the proposed roads and verification of the depth of cover from both sides of the road.
 - b. Drawings should include any new utilities that will cross the right-of-way.
- 5) **Road Crossings:** Where future development such as a roadway or a parking area is proposed within the pipeline right-of-way, Enbridge may be required to carry out pipeline inspection and recoating of the existing pipeline(s) prior to the start of the development. The costs of Enbridge's design, inspection, recoating work and any other pipeline alteration as a result of the crossing will be borne by the Developer.
 - 6) **Subdivision lot lines should not divide the pipeline right-of-way.** Wherever possible, subdivision boundaries should follow the right-of-way. If this is not possible specific

language must be included in the offers of sale or lease. Please see **Attachment 02** for details.

- 7) **Development setbacks** from pipelines and rights-of-way are recommended in support of damage prevention and to allow both pipeline operators and developers buffer lands for operations and maintenance purposes.
- 8) **Landscaping** shall not take place on Enbridge's pipeline right-of-way without Enbridge's prior written consent and where consent is granted such landscaping must be performed in accordance with Enbridge's Pipeline Crossing Guidelines. Please see **Attachment 02** for details.
- 9) **Pathways** shall not be installed on Enbridge's pipeline right-of-way without Enbridge's prior written consent and where consent is granted pathways must be designed in accordance with Enbridge's requirements. Please see **Attachment 02** for details.
- 10) **Fencing** should be installed along the identified open space easement. Please see **Attachment 02** for details
- 11) **Written consent** must be obtained from Enbridge for ongoing activities such as mowing or maintenance of the pipeline right-of-way on public lands.
- 12) **Notifications of additional development for Class monitoring:** As per Federal and Provincial Regulatory Requirements and Standards, pipeline operators are required to monitor all new development in the vicinity of their pipelines that results in an increase in population or employment. Therefore, please keep us informed of any additional development being proposed within the Pipeline Assessment Area indicated in **Attachment 01 | Approximate Location of Pipeline Infrastructure**. The pipeline assessment area GIS data can be provided to the municipality upon request to notifications@enbridge.com.

The above requirements are those identified as relevant based on the application materials provided. Additional detail on these requirements and other general development requirements are included in **Attachment 02 | Enbridge Development Requirements**. For additional resources on safe development in proximity of Enbridge's pipeline network please view [Enbridge's Public Awareness Brochures](#) or visit the [Land Use Planning and Development website](#).

Please continue to keep us informed about the outcome of the project and any future policy, land use, subdivision, and development activities in proximity to Enbridge's pipelines and facilities. All future project notifications should be sent to notifications@Enbridge.com, while questions about the details of this letter may be sent to the contact listed below. Thanks again for providing us with the opportunity to provide comments on this project and we look forward to working with you in the future.

Sincerely,

Oliver Prcic

Definitions

- A **Right-of-Way (ROW)** is a strip of land where property rights have been acquired for pipeline systems by the pipeline company. It is a surveyed area of a specific width which grants legal rights of access to operate and maintain the infrastructure within it.
- The **Prescribed Area** is an area of 30 m (100 ft) perpendicularly on each side from the centreline of a pipeline. Excavation or ground disturbance within this zone requires written consent from the pipeline company pursuant to the Canadian Energy Regulator Pipeline Damage Prevention Regulations (Authorizations). Depending on the pipeline location and regulator this may also be known as a “controlled area” or “safety zone”.
- The **Pipeline Assessment Area** identifies lands on either side of a pipeline in which new development must be monitored by the pipeline operator. The requirement for and scope of this monitoring is governed by the Canada Energy Regulator (CER) and CSA Z662:19. Depending on the pipeline location, operator, and regulator this may also be known as the “notification zone”, “referral area” or “class location assessment area”.

Locating the Pipeline | Click Before You Dig

Any person planning to construct a facility across, on, along or under a pipeline (including the right-of-way), conduct a ground disturbance activity within 30 metres of the centreline of a pipe, or operate a vehicle or mobile equipment across a right-of-way, must first request a locate service. To identify the precise alignment of the pipeline on the subject lands, Locate Requests can be made online, via mobile apps, or via phone (see table below),

The locate request must be made a minimum of three (3) business days in advance of the construction, ground disturbance, or vehicle or mobile equipment crossing. The One-Call Centre will notify Enbridge to send a representative to mark the facilities, explain the significance of the markings and provide you with a copy of the locate report. Enbridge requests a minimum of five (5) business days’ notice for any work involving explosives.

Right-of-way

A right-of-way is a strip of land where property rights have been acquired for pipeline systems by the pipeline company. It is a surveyed area of a specific width which grants legal rights of access to operate and maintain the infrastructure within it:

- No permanent structures are permitted within the pipeline right-of-way area without Enbridge's prior written consent.
- Enbridge must have the ability to access Enbridge's pipeline right-of-way at all times for construction, maintenance, operation, inspection, patrol, repair, replacement and alteration of the pipeline(s). Therefore, the Enbridge pipeline right-of-way shall be maintained as green space, park belt or open space.
- No work shall take place on Enbridge's pipeline right-of-way without the presence of an Enbridge representative.
- Storage of materials and/or equipment, grading or placing fill on Enbridge's pipeline right-of-way is not permitted without prior written consent from Enbridge.

Written Consent

Any proposed crossings of the pipeline right-of-way or ground disturbance within the Prescribed Area or pipeline right-of-way are subject to Enbridge's written consent in accordance with the Canadian Energy Regulator Act and regulations including the Canadian Energy Regulator Pipeline Damage Prevention Regulations as amended or replaced from time to time (or for pipelines contained within Alberta, the Pipeline Act (Alberta) and Pipeline Rules as amended or replaced from time to time).

The applicant will require Enbridge's written consent or a crossing agreement prior to undertaking the following activities:

- Constructing or installing a facility across, on, along or under an Enbridge pipeline right-of-way;
- Conducting any activity that would cause ground disturbance (excavation or digging) on an Enbridge's pipeline right-of-way or within 30m perpendicularly on each side from the centerline of Enbridge's pipe (the "Prescribed Area");
- The operation of a vehicle, mobile equipment or machinery across an Enbridge pipeline right-of-way; outside of the travelled portion of a highway or public road;
- Using any explosives within 300m of Enbridge's pipeline right-of-way.

For more information about when written consent is required and how to submit an application, please see [Attachment 03 | Enbridge Pipeline Crossing Guidelines](#).

Prescribed Area

The Prescribed Area is an area of 30 m (approximately 100 ft) perpendicularly on each side from the centreline of a pipeline. Excavation or ground disturbance within this zone requires written consent from the pipeline company pursuant to the Canadian Energy Regulator Pipeline Damage Prevention Regulations (Authorizations). Depending on the pipeline location and regulator this may also be known as a "controlled area" or "safety zone".

For pipelines crossing provincial boundaries, Enbridge is regulated by the Canada Energy Regulator and is subject to the Canadian Energy Regulator Act and its regulations as amended or replaced from time to time.

- Section 335(1) of the Canadian Energy Regulator Act prohibits any person to construct a facility across, on, along or under a pipeline or engage in an activity that causes a ground disturbance within the Prescribed Area unless the construction or activity is authorized by the pipeline company.
- Section 335(2) of the Canadian Energy Regulator Act prohibits any person to operate a vehicle or mobile equipment across a pipeline unless the vehicle or equipment is operated within the travelled portion of a highway or public road or such operation is authorized under section 13(1) of the Canadian Energy Regulator Pipeline Damage Prevention Regulations (Authorizations).

For pipelines contained within Alberta, Enbridge is regulated by the Alberta Energy Regulator and is subject to the Pipeline Act and Pipeline Rules as amended or replaced from time to time.

- As per the Alberta Energy Regulator, any person who plans to engage in an activity that causes a ground disturbance within the pipeline right-of-way must obtain the written consent of the pipeline company.

Crossings

- Written consent from Enbridge is required for all crossings of the pipeline.
- The written authorization request must include:
 - Drawings with cross sections of the proposed new road and road widening to verify the depth of cover from both sides of the road.
 - Drawings should include any new utilities that will cross the ROW.
- No vehicles or mobile equipment, including heavy machinery, will be permitted to cross Enbridge's pipeline right-of-way without the prior written consent of Enbridge. Please complete Enbridge's Equipment Specification and Data Sheet(s) to make an application for temporary equipment crossing including timeframe, type and weight of equipment per axle together with the name of the applicant, address, contact name and phone number/email.
- Where future development such as a roadway or a parking area is proposed over the pipeline right-of-way, Enbridge may be required to carry out pipeline inspection and recoating of the existing pipeline(s) prior to the start of the development. **The costs of Enbridge's design, inspection, recoating work and any other pipeline alteration as a result of the crossing will be borne by the Developer.**

Ongoing Activities

- Written consent must be obtained from Enbridge for ongoing activities such as mowing or maintenance of the pipeline right-of-way on public lands.

Class Monitoring in the Pipeline Assessment Area

As per Federal and Provincial Regulatory Requirements and Standards, pipeline operators are required to monitor all new development in the vicinity of their pipelines that results in an increase in population or employment. Therefore, please keep us informed of any additional development being proposed within the Pipeline Assessment Area indicated in **Attachment 01 | Approximate Location of Pipeline Infrastructure**.

- If a pipe replacement is necessary because of the proposed development, temporary workspace shall be granted to Enbridge on terms and conditions to be (or as) negotiated. This workspace will be adjacent to the existing pipeline right-of-way and may be up to a maximum of 15m wide on either or both sides. Grading or landscaping of the workspace is not permitted until the replacement has been completed.

Subdivisions

- Lot lines are not to be incorporated over Enbridge's pipeline right-of-way. If lot lines are incorporated over Enbridge's pipeline right-of-way, the owner agrees, in writing to include the following warning clause in all offers of sale and purpose and/or lease:
"Future residents are advised that Enbridge owns and operates _____ pipeline(s) within an _____ m pipeline right-of-way on the property. As a result, there are conditions that apply to various activities over the pipeline right-of-way that must be approved by Enbridge."
- All display plans in the lot/home sales office shall identify the Enbridge pipeline right-of-way-corridor within the proposed linear park block(s).

Structures and Setbacks

Development setbacks from pipelines and rights-of-way are recommended in support of damage prevention and to allow both pipeline operators and developers buffer lands for operations and maintenance purposes.

- No permanent structures are permitted within the pipeline right-of-way area without Enbridge's prior written consent.

Other Development

Wells / Septic Systems

Wells or septic systems shall not be located on Enbridge's pipeline right-of-way. Construction of any septic system within 30m of the pipeline right-of-way requires prior written notification to Enbridge to ensure the septic bed will not adversely impact the integrity of the pipeline and pipeline right-of-way. Written consent from Enbridge must be received prior to the start of any work.

Aerial Power Lines

Aerial power lines crossing the pipeline right-of-way require aerial warning devices installed and properly maintained. No poles, pylons, towers, guys, anchors or supporting structures of any kind are permitted on the pipeline right-of-way.

Pathways, Fencing & Landscaping

Fencing Along ROW

- For development along an Enbridge right-of-way, permanent fencing shall be erected and maintained by the Developer at the Developer's cost along the limits of Enbridge's pipeline right-of-way. The fence erected must meet Enbridge's and the governing municipality's specifications concerning type, location and height. Any excavations for fence posts on, or within 30m of the pipeline must be done by hand or hydrovac. There shall be no augers operated on the pipeline right-of-way. The Developer shall notify Enbridge three business (3) days prior to any excavation for fence posts located on or within 30m of the pipeline.
- Limits of the pipeline right-of-way parallel to the pipeline shall be delineated with permanent fencing to prevent gradual encroachment by adjacent landowners. Suitable barriers shall be installed at all road accesses to prevent unauthorized motor vehicles from entering Enbridge's pipeline right-of-way.
- Enbridge's written consent must be obtained and One Call notifications must be completed prior to any fence installations.

Landscaping

No landscaping shall take place on Enbridge's pipeline right-of-way without Enbridge's prior written consent and where consent is granted such landscaping must be performed in accordance with Enbridge's Pipeline Crossing Guidelines, as follows:

- The landowner / developer shall ensure a 5m continuous access way in the pipeline right-of-way is provided for the Enbridge repair crews.

In order to maintain a clear view of the pipeline for the purposes of right-of-way monitoring, which is required by federal regulation, trees and shrubbery planted in proximity to the pipeline must meet the following criteria:

- Enbridge permits the following vegetation within the pipeline right-of-way: Flowerbeds, vegetable gardens, lawns and low shrubbery (under 1 m in height), and
- The mature growth height of vegetation does not exceed 1.5 m (5 ft) at maturity and must maintain a minimum distance of 3 m (10 ft) from the nearest pipeline.

Pathways / Trails

No pathways shall be installed on Enbridge's pipeline right-of-way without Enbridge's prior written consent and where consent is granted pathways must be designed in accordance with Enbridge's requirements:

- A pathway crossing Enbridge's pipeline right-of-way shall be installed as close as possible to a ninety (90) degree angle to the Enbridge pipeline(s).
- The width of the pathway shall not exceed 3m.
- A parallel pathway within Enbridge pipeline right-of-way shall maintain a minimum 5m separation from the edge of the Enbridge pipeline(s).
- Enbridge's pipeline(s) must be positively identified at certain intervals as directed by Enbridge's representative for parallel installation.
- Enbridge shall install pipeline markers at all road, pathway and other crossings throughout the development area at Developer's cost.

Drainage and Erosion

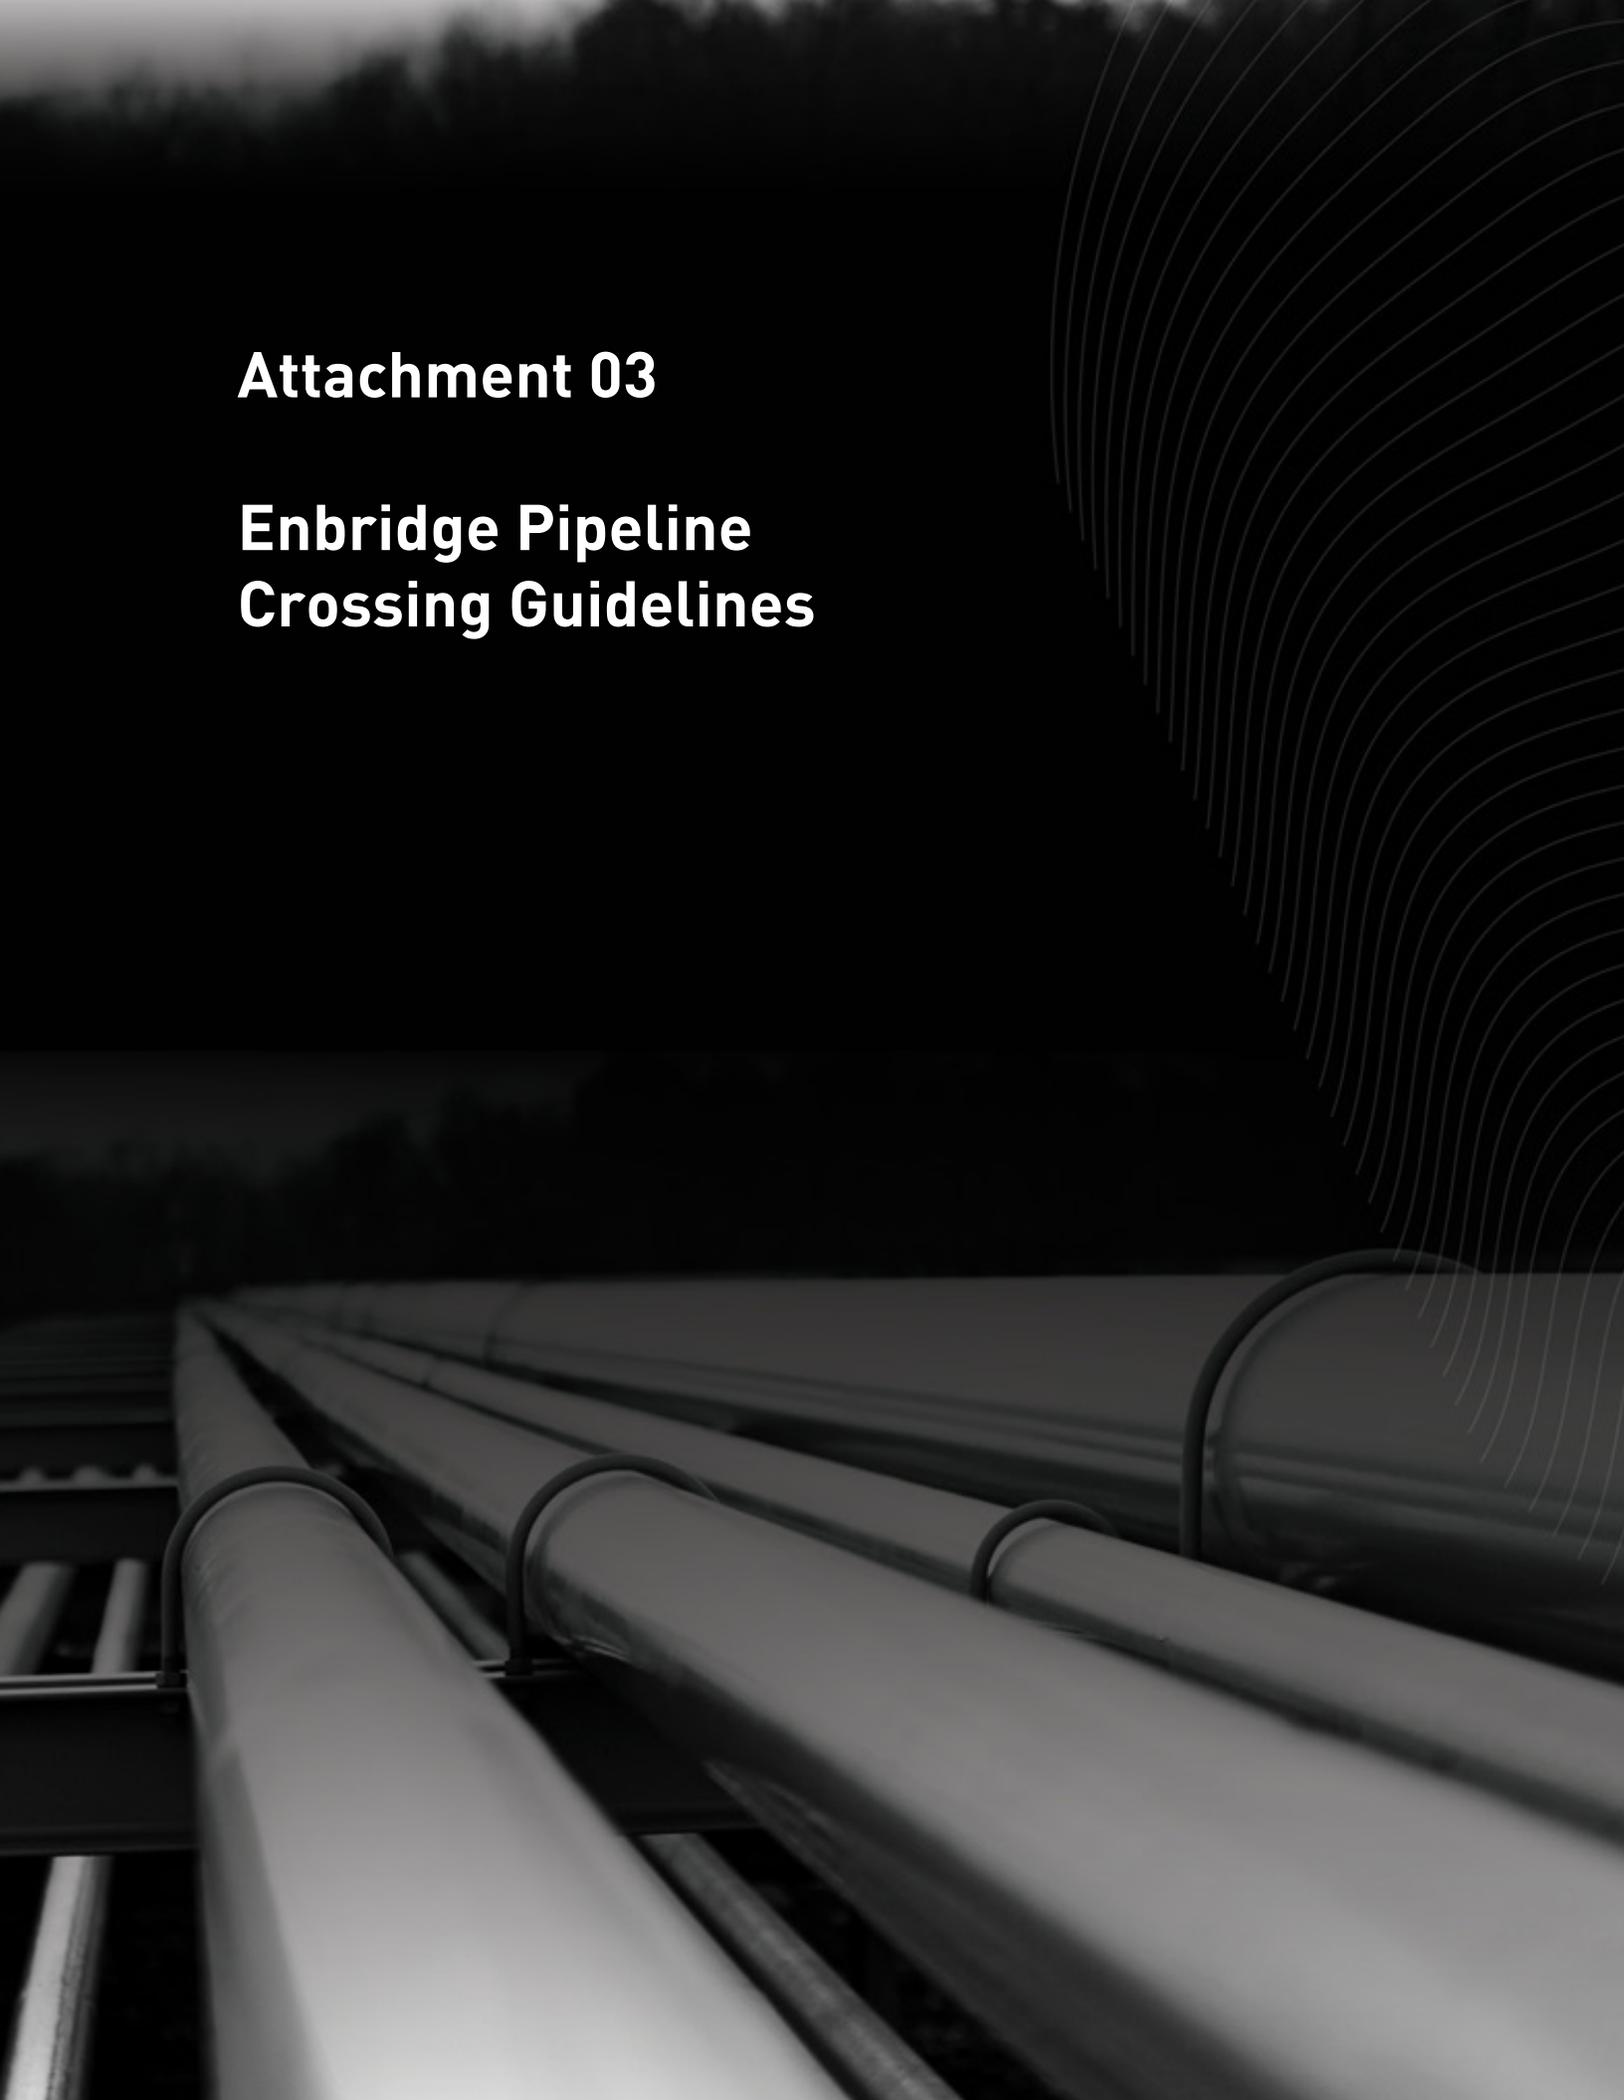

- The Developer shall ensure drainage is directed away from the pipeline right-of-way so that erosion will not adversely affect the depth of cover over the pipeline(s).
- Any large-scale excavation adjacent to the pipeline right-of-way, which is deeper than the bottom of the pipe, must maintain a slope of 3:1 away from the edge of the pipeline right-of-way.
- Depth of cover over Enbridge pipeline(s) shall not be compromised over the life of the Developer's facility due to rutting, erosion or other means.

Construction

- During construction of the site, temporary fencing must be erected and maintained along the limits of the pipeline right-of-way by the Developer to prevent unauthorized access by heavy machinery. The fence erected must meet Enbridge's specifications concerning type, height and location. The Developer is responsible for ensuring proper maintenance of the temporary fencing for the duration of construction. The Developer is responsible for the cost of material, installation and removal.
- Original depth of cover over the pipeline(s) within Enbridge's pipeline right-of-way shall be restored after construction. This depth of cover over the pipeline(s) shall not be compromised over the life of the Developer's facility due to rutting, erosion or other means.
- In the event Enbridge's pipeline(s) suffer contact damage or other damage as a result of construction, work shall stop immediately and Enbridge to be immediately notified.

Liability

In no event shall Enbridge be liable to the developer and/or landowner(s) for any losses, costs, proceedings, claims, actions, expenses or damages (collectively "Claims") the Developer and/or landowner(s) may suffer or incur as a result of or arising out of the presence of Enbridge pipeline(s) and/or operations on the pipeline right-of-way. The Developer and/or landowner(s) shall be responsible for all costs and expenses incurred to install, repair, replace, maintain or remove the Developer's and/or landowner(s) installations on or near the pipeline right-of-way and shall indemnify and save harmless Enbridge from all Claims brought against, suffered or incurred by Enbridge arising out of the activities of the Developer and/or landowner(s) in respect of the development or arising out of the presence, operation or removal of the Developer's and/or landowner(s) installations on or near Enbridge's pipeline right-of-way.

Attachment 03

Enbridge Pipeline Crossing Guidelines

Enbridge Pipeline Crossing Guidelines, Canada

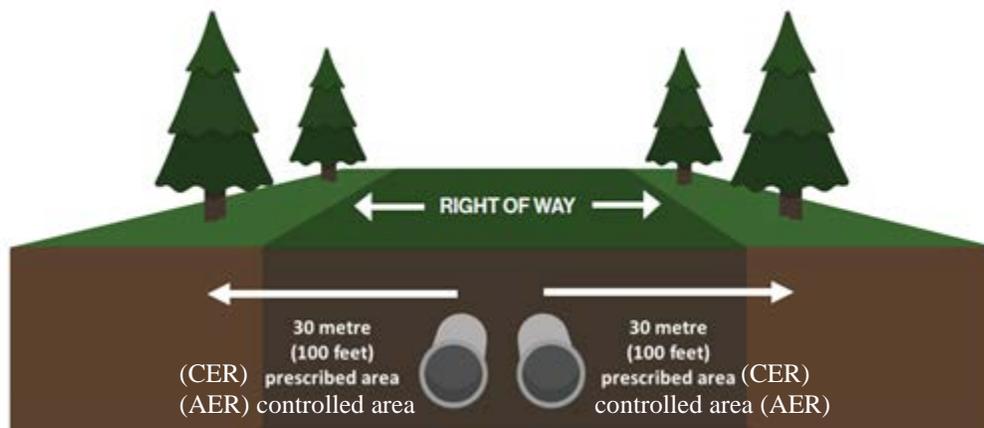

Application Guidance Details
May 2020 v2.0

Application Guidance Details

1. WHO REQUIRES CONSENT?

Consent is governed by the Canada Energy Regulator (CER) for interprovincial or international (federally regulated) pipelines and the Alberta Energy Regulatory (AER) for intra-provincial (provincially regulated) pipelines within the Province of Alberta. To ensure our pipelines and facilities operate safely written consent from Enbridge must be obtained in Canada before any of the following occur:

- ❖ Construction or installation of a new facility across, on, along or under Enbridge's pipeline and/or right-of-way;
- ❖ Ground disturbance activities in the prescribed area (CER) or controlled area (AER) which extends 30m from each side of the centerline of the pipeline;
- ❖ Operation or movement of vehicles, mobile equipment or machinery across Enbridge's right-of-way, outside of the travelled portion of a highway or public road;
- ❖ Using explosives within 300m of Enbridge's pipeline right-of-way;
- ❖ Use of the prescribed area or controlled area for storage or workspace purposes;
- ❖ Subdivision development across, on, along or over Enbridge's pipeline and/or right-of-way;
- ❖ Landowners wishing to install agricultural drainage tile across, on, along or under Enbridge's pipeline and/or right-of-way.

Activities that cause a ground disturbance include, but are not limited to, the following:

-
- | | |
|---------------------------|---|
| ❖ digging | ❖ clearing and stump removal |
| ❖ excavation | ❖ subsoiling |
| ❖ trenching | ❖ blasting/using explosives |
| ❖ ditching | ❖ quarrying |
| ❖ tunneling | ❖ grinding and milling of asphalt/concrete |
| ❖ boring/drilling/pushing | ❖ seismic exploration |
| ❖ augering | ❖ driving fence posts, bars, rods, pins, anchors or pilings |
| ❖ topsoil stripping | ❖ plowing to install underground infrastructure |
| ❖ land levelling/grading | ❖ crossing of buried pipelines or other underground infrastructure by heavy loads off the travelled portion of a public roadway |
-
- ❖ tree or shrub planting
 - ❖ installing agricultural drainage tile

Under section 2 of the Canadian Energy Regulator Act, ground disturbance does not include:

- ❖ Cultivation to a depth of less than 45cm below the surface of the ground
- ❖ Any activity to a depth of less than 30cm and that does not result in reduction of the depth of earth cover over the pipeline less than that approved at time of construction

2. CROSSING A PIPELINE WITH AN AGRICULTURAL VEHICLE OR MOBILE EQUIPMENT

For pipelines regulated by the Canada Energy Regulator, the *Canadian Energy Regulator Pipeline Damage Prevention Regulations – Authorizations* provides that persons operating agricultural vehicles or mobile equipment across pipelines may do so in low-risk areas, under certain conditions:

- ❖ the loaded axle weight and tire pressures of the vehicle or mobile equipment are within the manufacturer's approved limits and operating guidelines; AND
- ❖ the point of crossing has not been the subject of a notification from the pipeline company that crossing at that location could impair the pipeline's safety or security.

This applies to vehicles or mobile equipment used for agricultural activities in the production of crops and the raising of animals and includes pasturing and cultivation activities such as tillage, plowing, disking and harrowing.

For pipelines regulated by the Alberta Energy Regulator, the *Pipeline Regulation (under the Pipeline Act)* provides that persons operating vehicles or equipment used for farming operations; or use of off-highway vehicles [as defined in section 117(a)(iii) to (viii) of the Traffic Safety Act] or use of private passenger vehicles (as defined in section 1(1)(jj) of the Traffic Safety Act) less than ¾ ton may temporarily cross over an AER regulated pipeline without further approval from Enbridge.

However, if neither of the above requirements can be met then an application must be submitted to Enbridge for further review and processing.

3. HOW TO APPLY FOR ENBRIDGE CONSENT

The applicant must submit a written request, either by completing the Application Form (attached) or a letter with equivalent information, together with the applicable drawing(s) to the respective Enbridge crossings department as set out in the *Contact Us* section of this document.

The drawing(s) must be prepared in accordance with the minimum standards as set out in the *Drawing Requirements* section of this document.

Enbridge's Equipment Specification and Data Sheet (attached) must also be completed for any vehicle/ mobile equipment crossing applications.

For federally regulated pipelines, the applicant may petition the Commission for approval of construction activity if:

- ❖ the applicant cannot comply with the terms and conditions as set out in the company's written consent;
- ❖ the applicant feels the terms and conditions in the company's written consent are excessive; or
- ❖ If the company refused to grant approval to the applicant for reasons of pipeline integrity, public safety or company policy.

An application can be filed with the Commission by writing to:

**Secretary of the Commission
Canada Energy Regulator
Suite 210, 517 – 10th Ave SW
Calgary AB T2R 0A8
Phone: 1-877-288-8803
Online: www.cer-rec.gc.ca**

Applications may be filed with the Commission by mail, courier or facsimile by calling the toll-free number at 1-877-288-8803. Applications can also be uploaded through the CER's Applications and Filings Portal on the CER website at Home / Applications and Filings / Submit Applications and Regulatory Documents / File under the CER Act / OPR: CER Act – Guide C (<http://www.cer-rec.gc.ca/pplctnflng/sbmt/nbpr-eng.html>).

4. DRAWING REQUIREMENTS

The following represents the minimum information that is required to be shown on the drawing(s) in order for Enbridge to review your application. Dimensions must be shown on the drawing(s) and may be done in either imperial or metric units (if metric, then to one decimal point).

NOTE: incomplete drawings and/or an incomplete application will be rejected back to the applicant.

(a) Permanent Installations

All proposed permanent installation drawings MUST contain the following items:

1. Plan Number, including any revision number and the respective date;
2. North Arrow;
3. Scale;
4. Legend;
5. Location indicator including: legal land description, PIN, GPS coordinates;
6. Plan view of whole quarter section or affected area including:
 - ❖ Lot lines, road limits
 - ❖ Proposed facilities (including curbs, footing, guard rails, guy wires, poles, fences, etc.) with tie dimensions to lot survey line preferably along pipeline and/or right-of-way boundary
 - ❖ Location of cathodic test lead terminals (if applicable);
7. Cross section view and/or profile view including:
 - ❖ For surface structures, show profile along pipeline(s) with highest elevation
 - ❖ For underground facilities show profile along facility
 - ❖ Property lines, pipeline(s) and depth of cover
 - ❖ All underground facilities must maintain an even elevation across the entire width of right-of-way except for gravity type facilities or those facilities installed by HDD;
 - ❖ Drill path plan for HDD installations
 - ❖ Unsupported span (m) of Enbridge pipeline for open cut installations
8. Crossing Angle;
9. Crossing location circled in red;
10. Identify all affected Enbridge facilities, right-of-way(s) and pipeline markers;
11. Method of Installation (MOI) (**Refer to Interpretation/Definitions section*);
12. Minimum Clearance (**Refer to Interpretation/Definitions section*);
13. Facility specifications:
 - ❖ PIPE/CABLE: pipe diameter, pipe material, product conveyed, cable size, if cable is within a conduit, conduit material, cable voltage; unsupported span (meters) of existing pipeline if MOI is open cut;
 - ❖ ROAD: width of road, cover at ditch, cover at center of road, surface material, road type/use; design loading calculation; indicate if any Government or Provincial setback requirements
 - ❖ OVERHEAD POWER: pole number(s), location of pole/guy wire/anchors/etc., method of installation of pole/guy wire/anchors/etc., horizontal clearance to pipe from proposed pole/guy wire/anchors/etc., vertical clearance to ground/grade, voltage, type of power (AC/DC), AC mitigation plan may be required;
 - ❖ PIPE RACK: height of pipe rack, pile location(s), pile clearance to Grantor's facility, pile installation method; alternate access route provided for rural locations
 - ❖ DRAINAGE TILE: location of tiles and incremental cost analysis.
14. Complete the Equipment Specification and Data Sheet, when required.

(b) Temporary Activities

All temporary drawings MUST contain the following:

1. Plan Number, including any revision number and the respective date;
2. North Arrow;
3. Scale;
4. Legend;
5. Location indicator including: legal land description, PIN, GPS coordinates;
6. Plan view of whole quarter section or affected area;
7. Temporary activities location circled in red;
8. Identify all affected Enbridge facilities, right of way(s) and/or PLA/easement ownership;
9. Facility specifications:
 - ❖ WORKSPACE: location, measurement of workspace, purpose;
 - ❖ ACCESS OF ROW: location, kilometer usage of ROW, width of access; egress/ingress points, complete the Equipment Specification and Data Sheet (attached);
 - ❖ EQUIPMENT CROSSING: complete the Equipment Specification and Data Sheet (attached);
 - ❖ ROAD USE: indicate road(s) to be utilized, km usage, reason required, frequency of use; complete the Equipment Specification and Data Sheet (attached);
 - ❖ GEOPHYSICAL: project/prospect name, number of reading units/lines, type of source, CER approval required (Y/N).

5. INTERPRETATION / DEFINITIONS

For crossing application purposes, Enbridge defines the following as:

Grantee means the applicant or the facility owner; a company, a person, a municipality or government body, etc.

Method of Installation means OPEN CUT or HDB or HDD; all defined as follows:

OPEN CUT

Enbridge defines open cut as trench methodology wherein access is gained to the required level underground for the proposed installation, maintenance or inspection of a pipe, conduit or cable. The excavated trench is then backfilled and the surface restored.

HORIZONTAL DIRECTIONAL BORE (HDB)

Enbridge defines horizontal directional bore as meeting ALL of the following:

- (a) The designed horizontal distance of the crossing shall be less than or equal to 150m (500ft) in length; AND
- (b) The depth of the pipeline installation shall be limited to 8m (25ft) to the centre (cross-section) of the pilot hole and measured to the corresponding surface location; AND
- (c) Straight alignment in the horizontal plane; AND
- (d) Pilot bit is steerable and trackable.

HORIZONTAL DIRECTIONAL DRILL (HDD)

Enbridge defines horizontal directional drill as an *HDB* that DOES NOT meet all of the criteria for an *HDB*. An *HDD* will satisfy some but not all of: a, b and c above and will satisfy d.

Minimum Clearance means the required distance between the existing Enbridge facility and the proposed facility based on the selected *Method of Installation*.

Minimum clearance required for installation ABOVE Enbridge facility by OPEN CUT is 0.3m
Minimum clearance required for installation BELOW Enbridge facility by OPEN CUT is 0.6m
Minimum clearance required for installation BELOW Enbridge facility by HDB is 1.0m
Minimum clearance required for installation BELOW Enbridge facility by HDD is 3.0m
Minimum clearance required for road installation from bottom of ditch to top of Enbridge facility is 0.9m and from centerline of road to top of Enbridge facility is 1.2m
Minimum clearance required for railway installation from bottom of ditch to top of Enbridge <i>uncased</i> facility is 1.83m and from centerline of rail bed to top of Enbridge <i>uncased</i> facility is 3.05m
Minimum clearance required for railway installation from bottom of ditch to top of Enbridge <i>cased</i> facility is 0.91m and from centerline of rail bed to top of Enbridge <i>cased</i> facility is 1.68m

6. WRITTEN CONSENT

After applying for written consent, Enbridge will review the proposed installation and/or temporary activities application in order to ensure that the proposed work will not pose a risk to existing Enbridge facilities, as well as, to ensure that any access required to existing facilities for maintenance or in an emergency situation will not be impeded.

Some applications may require further engineering assessment which will require additional time to review the proposed installation and/or temporary activities prior to Enbridge issuing consent. All efforts will be made to provide an agreement within an appropriate timeframe, however, please ensure that your application request is submitted with ample lead time.

7. CONTACT US

To obtain written consent from Enbridge, please contact the respective office as set out below:

REGION	CONTACT INFORMATION
LIQUIDS PIPELINES - WESTERN CANADA (Alberta, Saskatchewan, Manitoba and Norman Wells)	Lands & ROW 330, 10180 – 101 Street Edmonton AB T5J 3S4 Email: crossingrequests@enbridge.com Phone: 780-378-2228
LIQUIDS PIPELINES - EASTERN CANADA (Ontario and Quebec)	Lands & ROW 1 st Floor, 1086 Modeland Road, Bldg 1050 Sarnia ON N7S 6L2 Email: est.reg.crossing@enbridge.com Phone: 1-800-668-2951

8. ONE CALL CENTRES

Before putting a shovel in the ground, whether it is in your backyard or a commercial jobsite, please do a locate request to safely identify any buried utility lines at www.clickbeforeyoudig.com.

Your local one call centre can also be reached by phone as shown below:

CALL OR CLICK BEFORE YOU DIG!! Contact your respective one-call centre	
British Columbia https://www.bconecall.bc.ca/ 1-800-474-6886	Alberta http://albertaonecall.com 1-800-242-3447
Saskatchewan www.sask1stcall.com 1-866-828-4888	Manitoba http://www.clickbeforeyoudigmb.com/ 1-800-940-3447
Ontario www.on1call.com 1-800-400-2255	Quebec www.info-ex.com 1-800-663-9228
Northwest Territories 1-867-587-7000 Or contact the pipeline company directly	

9. REGULATORS

In Canada, Enbridge has pipelines that are regulated by both the federal government and provincial governments. For more information on any of the regulators please visit their respective website.

Canada Energy Regulator: www.cer-rec.gc.ca

Alberta Energy Regulator: www.aer.ca

10. DEVELOPMENT ON OR NEAR THE RIGHT-OF-WAY

Enbridge should be consulted early in the design phase with regards to proposed subdivisions, roads and utilities, and municipal landscaping.

Subdivisions – Enbridge highly recommends that our right-of-way be used as a passive green space or as part of a linear park system. Permanent structures on the right-of-way are not permissible.

Roads and Utilities – Roads may be permitted to cross and/or run parallel to the right-of-way but no portion of a road allowance can be located on the right-of-way (apart from approved road crossings). Enbridge will review the location of utilities which are often proposed within the road allowance.

Landscaping – Projects such as pedestrian pathways may be permitted as long as they do not impede Enbridge's access along its right-of-way for operational and/or maintenance activities. Enbridge's written consent will specify the permitted landscaping requirements.

11. DAMAGE PREVENTION

Enbridge's underground facilities must be positively identified, to Enbridge's satisfaction, prior to the start of any proposed construction activities.

Enbridge's representative(s) have the authority to stop work at any time due to safety, environmental or operational concerns and/or unforeseen circumstances or emergency situations.

****IMMEDIATELY NOTIFY ENBRIDGE IF YOU COME INTO CONTACT WITH THE PIPE! ****

As a small scratch or dent in the pipeline's coating can impact long term safety of the pipeline and must be assessed by Enbridge.

Please note that obstacles or un-approved above ground installations located on an Enbridge right-of-way, such as sheds, trailers, boats and pools can interfere with Enbridge's access of their right-of-way. Permanent structures on the right-of-way are NOT permissible.

Enbridge must be contacted before conducting any blasting activities within 300m of the pipeline right-of-way so that Enbridge can review the proposed plans in order to see if there might be potential impacts to its facilities. Blasting activities related to prospecting for mines and minerals within 40m of a federally regulated pipeline right-of-way requires permission from the Canada Energy Regulator.

12. EMERGENCY SITUATIONS

In an emergency situation please provide as much notice, as is practicable, to Enbridge prior to commencement of any construction, excavation, installation or temporary crossing of existing pipelines and/or right-of-ways in order to access the emergency site.

Enbridge classifies an emergency situation as:

- ❖ A risk to human life;
- ❖ Required emergency repairs of public services; or
- ❖ To contain an environmental emergency.

In an emergency situation please call: **1-877-420-8800** (toll free) and/or contact your local One Call provider at the numbers listed in section 8.

DISCLAIMER: THESE GUIDELINES ARE INTENDED TO PROVIDE USEFUL CROSSING APPLICATION GUIDANCE INFORMATION TO THE APPLICANT. SUBMISSION OF AN APPLICATION MEETING THE REQUIREMENTS AS SET OUT HEREIN DOES NOT CONSTITUTE WRITTEN CONSENT FROM ENBRIDGE. ALL APPLICATIONS WILL BE REVIEWED BY ENBRIDGE TO DETERMINE WHETHER THE APPLICATION WILL BE APPROVED.

Equipment Specification and Data Sheet(s)

In order to properly conduct an analysis on the requested crossing the following general information and appropriate data sheets are required to be completed.

Steps:

1. Complete the *Applicant – Information and Details* document for each crossing application
2. Add and complete the *Data Sheet – Equipment or Vehicle with Tires* for EACH piece of equipment
3. Add and complete the *Data Sheet – Equipment with Tracks* for EACH piece of equipment
4. Return fully completed general information and data sheets and any other pertinent information

Subject: Appeal of Decision Regarding Changes to Zoning By-law for Sheridan College Housing Area
Date: Thursday, February 29, 2024 3:25:45 PM

Hi Oakville Team,

I hope this email finds you well. I am writing to formally appeal the recent decision made by the Town of Oakville regarding changes to the Zoning By-law for the Sheridan College housing area.

As a resident and stakeholder in the community, I am deeply concerned about the implications of the decision and its potential impact on the surrounding neighborhood. The proposed changes raise several important issues that warrant further consideration and discussion.

Firstly, the density and scale of the proposed housing developments could have significant effects on traffic congestion, parking availability, and overall neighborhood character. Without adequate planning and infrastructure improvements, these developments may strain existing resources and diminish the quality of life for residents in the area.

Additionally, I am troubled by the lack of community input and consultation in the decision-making process. It is essential that residents have the opportunity to provide feedback and express their concerns about developments that directly affect their lives and surroundings. Transparency and inclusivity are fundamental principles of good governance, and I urge the Town to prioritize meaningful engagement with all stakeholders going forward.

Furthermore, I believe there may have been oversights or inaccuracies in the assessment of the proposed changes and their potential impacts. It is essential that decisions regarding zoning and land use are based on thorough research, analysis, and consideration of all relevant factors. I respectfully request that the Town revisits the decision and conducts a comprehensive review to ensure that it aligns with the best interests of the community.

In conclusion, I urge you to reconsider the recent decision regarding changes to the Zoning By-law for the Sheridan College housing area. By addressing the concerns raised by residents and stakeholders and fostering a more inclusive and transparent decision-making process, we can work together to create a vibrant and sustainable community for current and future generations.

Thank you for your attention to this matter. I look forward to your response and to the opportunity to participate in further discussions on this important issue.

Subject: Re: Questions for your attention with regards to Townwide and Sheridan College Housing Area Special Policy Area 42.15.62 and 42.15.63
Date: Thursday, March 21, 2024 11:01:21 AM

Thanks for responding

To clarify a couple of points...

1) as I understand it the Housing Accelerator Fund application outlines how the money is calculated based on specific housing units and the funding per housing unit so the total funding should roll up to a total. As part of the FAQ the Town will publish - Will there be a copy of the HAF application for us to see?

In my view it's critical to understand how many units the Town believes will be built in the 800 meter area and the corresponding federal funding. Based on the feedback I'm seeing and hearing from neighbours, there is little to no appetite for any current homeowner to either sell their property to a developer or developer their own property, and if the Town is banking on funding based on results, I'm afraid the results just won't deliver what the Town is expecting over the next four years. This area of single family homes is better left to single families, especially if Sheridan has no plans to build more residences.

3) I could have been cleared in my original question - on line the Town shows examples of 3 and 4 story building units. Has the Town taken the next step and had drawings done showing what the floor plans of these 3 and 4 building units could look like. I understand no one has applied for one yet, that is not what I am looking for. I want to better understand what the Town sees as floor plans to determine residency numbers.

Lastly, it's sad that we're being expected to develop our own properties to help support Sheridan's student housing problems when they have no plans to help themselves. This is a very bad idea just so the Town of Oakville can get some federal funding. Sheridan needs to solve their own problems before turning to the Town to have us solve them for them.

Bill Patterson

On Mar 21, 2024, at 10:35, Jeff Knoll <jeff.knoll@oakville.ca> wrote:

Greetings Mr. Patterson,

I did forward your email on to the Town Clerks office.

Several of the questions you raised were addressed to Town Staff during the meeting

and either answered at that time or collected to find the answers and report back. I anticipate that they will provide answers to these inquiries in the FAQ section they intend to publish on the town website, and/or during their presentation in the next council report scheduled for next month.

1. During questioning from council, staff reported uncertainty regarding the exact number due to multiple impacting factors.
2. As far as I'm aware, Sheridan has no immediate plans to increase student housing on their property.
3. The Town has not received any building plans, drawings, or proposals for four single dwelling units. The aspect of the proposal that directly affects College Park is the suggested allowance for four-story buildings.
- 5) I explicitly requested staff to clarify this matter and anticipate receiving an answer in their forthcoming report.

I appreciate your interest and concerns, we are collectively in the information gathering portion of this proposal, awaiting the next report from Town Staff.

Regards,
Councillor Jeff Knoll

surrounding Sheridan, I am joining my neighbours in opposing this proposal.

>

> I do however look to you both directly for some clarifications with regards to what I think I heard at Mondays meeting, namely:

>

> 1. The expected money eligible from the Federal Government is \$25M or \$36M? Please confirm. Also, as I understand it, while criteria to receive the funding must include increased density within 800 meters of Sheridan, the Town can use its discretion as to where this funding goes, is that correct?

>

> 2. Has the Town met with Sheridan about increasing the number of residential units directly on Sheridan property? Has Sheridan applied for any building permits to facilitate the building of more residence units on their property? If the property owner has no requirement to rent out a single dwelling unit to a Sheridan student, then how does this proposed bylaw increase student housing for Sheridan? Only units on Sheridan property and within their control can guarantee rooms for Sheridan students. > (As we heard on Monday, there seems to be a number of university/college graduates looking to move back to Oakville to reside full time. I would sooner rent to a full time working person than a student if I decided to build a multiple single dwelling unit building on my property)

>

> 3. These proposed Single dwelling units - whether they be three or four per lot, please advise the maximum number of inhabitants per single dwelling unit will be allowed in the bylaw, and how will the Town police this bylaw? There are drawings of what the exterior of these proposed units will look like, has the Town had layouts drawn as examples of what these single dwelling units look like? Obviously the number of inhabitants per single dwelling unit is of critical importance in trying to determine the Return on Investment of such an investment, either by a developer or homeowner.

>

> 4. How will the town levy taxes to the owner of these said units? Will I pay the same tax

> I currently pay on my current property or will this increase the taxes per property as a result?

>

> 5. The Federal funding is predicated on both bylaw amendments passing, is this correct? As I understand it, there have been zero applications to build a three single dwelling unit since that law passed, my question is, if the Federal funding is provided if the bylaws are adopted, is there a requirement for the Town to have residents or developers actually build said units in a particular timeframe or forfeit the funding? I would expect there would be some caveats in the funding with regards to actual results. What are those caveats?

>

> Thank you for your time and attention to my questions, I look forward to hearing from you with your answers.

Town Clerk, please have this email entered into the record on this file. thank you.

Dear Mayor and Council,

In reading Minister Frasers letter of January 11, 2024 to Mayor Burton , I would respectfully ask the Town of Oakville, namely Mr. Mayor and Council if they can please share with the community your plans on how you intend to accelerate the development of more mid to high-rise rental apartment buildings within walking distance of the College. I presume since Minister Fraser asked for this as well as a plan such as the 800 meter radius bylaw amendment discussed during last Mondays council meeting, that there is also a plan for this request as well.

“As well, we require greater clarity on your actions to increase the amount and density of housing for students within walking distance of Sheridan College. Many students are living in single family homes that surround Sheridan, which could be much better utilized as homes for families. A measure such as allowing four storeys and four or more units as of right within an 800 metre radius of Sheridan College would be acceptable. Alternatively, I would also be open to seeing your plans on how you intend to accelerate the development of more mid to high-rise rental apartment buildings within walking distance of the College.”

I look forward to your response and being able to see these plans, prior to the vote. Thank you.

Subject:

Dear Members of Council,

I hope this email finds you well. I am writing to urge you to vote against the proposed Sheridan College Housing Area Special Policy during the upcoming council meeting vote on this issue. Many constituents, including myself, are deeply concerned about the potential ramifications of this policy and are looking for transparency in the decision-making process.

During the campaign period, many officials, including Councillor Knoll and Councillor Grant, made promises to the electorate regarding the protection of existing neighborhoods and adherence to the official plan of Oakville. For instance, Councillor Knoll was quoted in an article in the Oakville Beaver on September 14, 2022, stating that "Oakville must ensure new development respects existing neighborhoods and our official plan." Similarly, Councillor Grant emphasized the importance of preserving the character of our neighborhoods and updating existing parks.

These statements reflect a clear understanding that existing neighborhoods have unique characteristics and features that should be safeguarded. Therefore, it is imperative that we uphold these promises to the residents of Oakville by rejecting the Sheridan College Housing Area Special Policy.

Furthermore, I strongly believe that alternative solutions for student housing should be explored. Institutions like McMaster University and UTM have successfully expanded their student housing on their own properties, alleviating the pressure on surrounding residential areas. I urge Sheridan College to follow suit and consider expanding student housing on their property rather than encroaching upon established neighborhoods.

particularly those near Oakville transit routes.

In conclusion, I urge you to vote against the Sheridan College Housing Area Special Policy and to prioritize the interests and concerns of Oakville residents. Thank you for your attention to this matter, and I look forward to hearing from you soon.

Sincerely,

Pina Palumbo

Subject: Sheridan College Zone and Four Storey Buildings in Existing Community - ALTERNATIVES
Date: Thursday, March 21, 2024 11:48:47 AM

Dear Mayor, Town Councillors and Clerk, Planning Dept, Honourable Members of Parliament:

Thus far, I have not received a response from my last email (Mar 14/24 – “4 story buildings NOT required for HAF funding application”), directed to Mr. Knoll and Mr. Grant but copied to all Oakville Councillors.

If you missed that email, these are the salient points:

- Town’s initial HAF application Action Plan did not include “4 as of right” or “Four storey buildings in Sheridan zone”.
- Correspondence between Minister Fraser and Mayor Burton discussed “requests” and “suggestions”, none of which are mandatory to be eligible for HAF funding.
- Town's revised Action Plan added 4 initiatives, including #8 (4 as of right) and #9 (four storey buildings).
- Several other municipalities’ applications also include “4 as of right” but NONE include “4 storey buildings”.
- Councillors were urged to vote against these proposals, particularly the inappropriate (and damaging) “Four Story Buildings” in the Sheridan area.

Other considerations to support a vote against this initiative:

- Town of Oakville’s commitment to **33,000 housing units** over 10 years (as per provincial Bill 23, More Homes Built Faster Act, 2022) is well underway.
- Town of Oakville’s Midtown Oakville Growth Area Review proposes to build enough residential housing to **accommodate 32,000 people** by 2051.
- Fast tracking of over **40,000 building applications** for people wanting to

use existing land.

With all of this development already planned or underway, you would be justified in removing the “Four Storey Buildings” initiative from the HAF application Action Plan, rather than risk destruction of existing neighbourhoods, many of which are fully developed with single family homes (as promised to the residents who have a vested interest in these areas).

In fact, you’re likely already aware of Windsor’s response to the governments HAF incentive request, which they declined, by councillors voting against reckless zoning rule changes:

<https://nationalpost.com/news/politics/why-windsor-said-no-to-the-liberal-housing-plan>

However, if you feel a need to placate Minister Fraser’s “requests” and “suggestions” to increase housing density in the Sheridan College area, there are **alternatives** that would incite even more residential units than could be realized by Four Storey Buildings, such as:

- Identify other **vacant lands** in Oakville and provide incentives to build upon (four storey buildings or otherwise).
- **Build residential above parking lots**, on supported column structures; no need to tear up existing asphalt and lose parking spaces. This is being done in other countries and currently in regions as close as Cambridge. There are hundreds of potential locations (including Town Hall and Sheridan College parking lots). I can provide examples.
- Using the C1 provision already proposed in the current Action Plan to allow 3 storey **residential builds above commercial properties; town-wide**. Again, hundreds of potential locations (could even consider above Oakville Place).
- As a starting point, to act as pilot and to address the initial request of density in the Sheridan area, **build residential above existing commercial properties**, as mentioned above but **with focused scope**. See details below.

Building Residential on Commercial (Sheridan College area)

- With a small working group, as an example, we identified **7 locations**

within 800m of Sheridan College (or slightly outside that radius) that could be suitable for this alternative.

- For these potential locations, we determined square meters of the commercial building footprint and using an 80% utilization, with 3 storeys above the existing commercial site and a mix of 1-bedroom and 2-bedroom units, **we estimate over 400 units could be realized!**
- (We have developed a parameter driven spreadsheet that we would be happy to meet with any or all of you to demonstrate).

Considering all the information from above, **we urge all councillors to vote against** the unnecessary proposal of allowing “four Storey buildings” within the Sheridan College area, or anywhere that is inconsistent with the existing community.

Looking forward to your response and if your interested in a further discussion, we will book a small meeting room to review any of these ideas in more detail.

Thanks for your consideration and for ensuring new development respects the existing character of our neighbourhoods by voting against this proposal.

Dear Mr. Sunderland and colleagues,
I'm following up on an email I sent on Mar 21 that may have been overlooked. The intention of this email was to raise awareness of alternatives to "Four Storey Buildings" for increasing densification around Sheridan College, in hopes of revising the Action Plan for the Town's HAF application. For brevity, I've included an excerpt below, regarding using the proposed C1 revisions to allow up to 3 storey residential units on top of existing commercial buildings. As referenced in the email, we have developed a parameter driven spreadsheet (attached) to demonstrate different scenarios and validate our estimate that this solution could provide up to 400 one and two bedroom residential units, just within the Sheridan College area! Based on the basic HAF funding formula, this would be eligible for over \$8M and much better solution than the Four Storey Buildings proposal, which is extremely detrimental to the existing, established community in the Sheridan College area.

We're hoping you would provide a response to this information and would be willing to meet to discuss in more detail.
Thanks for your consideration,
Ron Bell, Peter Wei and Gopi Pillai

Opposed to the Sheridan College Special Housing Zoning By-law

Date: Amendments

Monday, April 1, 2024 10:52:21 AM

Sean O'Meara
Town and Regional Councillor - Ward 1
Town of Oakville

Sir

I received a copy of your letter (email below) as part of a distributed information package to our College Park neighbourhood group. You had generated your letter in response to an earlier letter sent to the Mayor of Oakville concerning the objections being raised to the proposed Sheridan College Special Housing Zoning By-law amendments presently before council (that email also below). It appears that you took liberty to respond to it.

So now, I too, am taking this opportunity to provide my thoughts and indeed build on some of your views that you have messaged.

Unfortunately, I must first correct you on how you chose to interpret the original writer's position by inferring that some form of condescension is in play.

That is not the case for sure and I can only caution you as to your choice of such wording as "**also says**" and "**derides**".

But your letter did prompt me to take a drive through your ward. And it finally occurred to me as to what you were saying and projecting.

As one of the Ward 1 Councillors, I must commend you for your willingness to impose increased housing density in your ward as I finally realized that Ward 1 sits in a realm of vast land holdings that are truly under-utilized. That being Bronte Provincial Park. I can only assume that you would be fairly supportive if it was suggested that such an area be more vigorously brought into play. I am sure that Premier Ford would entertain such.

Such bold action would be commended, much in the spirit of the Saw Whet Golf Course development which was turned into a housing complex of "missing middle" density in Ward 1.

Also, I think you should boldly talk to Minister Sean Fraser with the suggestion that the Petro Canada properties be purchased/expropriated to partially replace of any of the provincial park lands put into use and also further the housing supply to meet the needs of the GTA.

I enjoyed your mini history lesson on house prices taken from the Toronto Real Estate Board.

But I am puzzled as to what exactly is the definition of affordable housing in the housing continuum? And in that light, what is the Town of Oakville's objective that it is presenting to its citizenry?

Is the North Oakville development plan or the Mid-Oakville development plan not a good/sound reach by the Town?

And what exactly is the proposed Zoning By-law amendment for Sheridan College special housing Area trying to accomplish?

Or is this amendment proposal just aggravating and deflecting the whole Town's strategic plan efforts and objectives?

Does council really think that by shoehorning smaller housing units into an established neighbourhood will solve the affordable housing supply issue?

And whereas - should a small bungalow on a large lot being replaced with a mega home go unchallenged?

Houses are being bought and sold continuously in the GTA and from what I can determine, they are consistently rising in price.

I think you will agree that with low interest rates, the housing market throughout North America has become a speculative market and a place that money is flowing as it represents a tangible asset and no longer just a home.

I would hazard a guess that housing has become a financial portfolio asset and is being dealt with as such. That again becomes a national policy issue and not a zoning by-law issue at the municipal level - should affordable housing be the objective.

Maybe Minister Sean Fraser and CMHC should place more of their energy in dealing with the speculation/investors/migration issues involved? Would you say?

Where is the Edgar Benson when you need him?

Regards
Robert Lane
Millbrook Ave

Subject: RE: Please vote "NO" -- Four Dwelling Units and Sheridan College Housing Area Proposals
Date: March 22, 2024 at 4:39:48 PM EDT

Dear Ann,

Thank you for writing me. I'd like to respond to your email purely on my own behalf.

Your opening comment "*How did the hard working 'blood, sweat and tears' of the many of us that toiled for decades to finally afford these family homes, in what we thought were safe and secure family oriented neighbourhoods, become the victims of such thoughtless, rash decision making political actions that would see our existing single family dwellings just **unilaterally** and **arbitrarily** pulled out from under us*" also says those trying to afford a home today are not hard working people who have toiled (or want the same opportunity you had) to afford a family home. The underlying premise of "I did it, why can't you" completely ignores reality. In 1990, the average GTA home would have cost a buyer \$255,020 — the equivalent of what today would be \$514,911 with inflation, according to data from the Toronto Regional Real Estate Board. After steadily decreasing until 2000, it rose by 2010 to \$431,262 — or \$586,473 with today's inflation. Today, the average home price in the GTA is \$1,134,781 — nearly double the price 13 years ago.

In 1990, the median income for an individual aged 25 to 54 in Toronto was \$54,310, when adjusted to 2023 inflation. In 2021, it hasn't increased by even one per cent, now at \$54,643, according to 2021 census data adjusted for today's inflation. So when you deride people for not being able to do what you did decades ago, it is not a fair comparison. We are telling our seniors who are looking to downsize, there is no place for you here. We are telling our children and young people, unless you are rich (beyond what anyone prior to 2013 could have ever afforded) you don't belong here. These are absolute facts and that we are not willing to consider our future generations for home ownership in the way older generations were allotted, it is saddening to me.

I cannot look my 13-year-old daughter in the eyes and tell her I did everything I could to ensure she had a chance to own and live in Oakville where she was raised because she is not rich enough to buy a single-family property that is unattainable for the overwhelming majority in Ontario today.

This is solely my opinion on the matter. Doing what is right is not the same thing as doing what is popular. I do not intend to have a legacy of neglecting youth and seniors on my resume; I do sincerely feel I am in the minority on Council though so you most likely will have the result you are after. I just felt it important to express the opposing view of many who do not have the ability to speak against blocking a future for young and seniors in our community and their hopes and dreams for their futures.

I want to thank you for writing as it does mean a lot to hear from residents on all their perspectives.

Sean

Subject: Please vote "NO" -- Four Dwelling Units and Sheridan College Housing Area Proposals

Dear Mayor Burton:

You Have the Ability to put a STOP to These Proposals by Voting "NO"

How did the hard working 'blood, sweat and tears' of the many of us that toiled for decades to finally afford these family homes, in what we thought were safe and secure family oriented neighbourhoods, become the victims of such thoughtless, rash decision making political actions that would see our existing single family dwellings just **unilaterally** and **arbitrarily** pulled out from under us by the Federal Liberals, the Provincial PC's as well as our local Town of Oakville Executive? These neighbourhoods have existed for many decades; were represented to prospective buyers as single family dwellings and promoted by Builders and the Town as desirable places to live and raise a family. Single Family Homes must be kept for families!

No one can deny that the multitude of voices being raised **are not in favour** of these proposals.

Therefore, why would this Executive body choose to ignore these voices?

It is fully within your ability to Vote "NO" and to remove these Proposals from the Table!

Will you stand true to the platform upon which you ran for the office you currently hold and defend the core values which you espoused, and, ultimately make the only right and just decision?

Respectfully,

Ann

Subject: Opposed to the Sheridan College Special Housing Zoning By-law Amendments
Date: Friday, March 22, 2024 10:31:08 AM

Town Council
Town of Oakville

Member of Council

You will be voting shortly on the Zoning By-law amendments that will directly impact the small neighbourhood of College Park. The case has been clearly put to you that it is a direct targeting of this specific locale under the guise of a need for Sheridan College student accommodations that does not exist now or in the foreseeable future. (See my earlier correspondence with the College that I copied to Members of Council).

I further reinforce my objection by stating that the town planning department has not shown any benefits to our neighbourhood by this targeting. To the contrary, by allowing stacked four storey units will only encourage Short Term Rentals (STR's) and the inundation of uncontrolled Parking on the street and on lawns.

Yes - It is understood that Trafalgar Road has become and will be further modified into a major transit corridor.

And that North Oakville is developing rapidly and will achieve that "Missing Middle" in housing and will definitely increase density. But that is an obvious new structure development (green fields). I suggest that this is a much better and more organized way of providing that missing middle.

The mid-town plans will, as well, significantly increase the housing density and will straddle the Go transit system providing linkage to downtown Toronto. It is fully recognized that the midtown development is in an area void of existing residential houses and is considered to be a place of low/light industry or already vacant lands.

So those two areas can be viewed as appropriate to see a significant increase in density with minor impacts to the citizenry of Oakville. As to whether it will provide affordable housing - I dare not speculate.

And as to solving an Oakville problem, I am at a loss. So are we doing our part to help address the overall demand in the GTA centres or are we just providing better opportunity for the burgeoning housing investment industry?

I draw attention to the planning options/depictions that were offered in the Oakville "Town Survey". That being the various configurations of four units within a single dwelling - Town Wide and As-to Right. You are meeting your targets with the North Oakville and Middle Oakville plans - so why the four unit configurations throughout Oakville?

So please show me the benefits to the residents of Oakville as to this proposed undertaking.

Nauman Khan
Associate Vice President, External Relations Sheridan College

Hi Nauman

I thank you for your reply and I do apologize if I sounded patronizing in my communique with the President of Sheridan College. My intent was to be assured that there is no demand-supply need between Sheridan College and the College Park neighbourhood. That you have messaged and becomes a point of clarification to the Town Council of Oakville to allow for their deliberation on the proposed Zoning By-law amendment - the

“Sheridan College Special Housing Area”. Which I am encouraging them to vote down. And I can appreciate that there are ever changing and significant pressures educational providers are facing these days.

As for affordable homes -yes - there has to be a viable plan developed. It just may not be through targeted densification or a wide open building melee. That I will be taking up with the Town Council.

Regards
Robert Lane
Millbrook Ave Oakville

Hi Robert

Thanks for following up. I would refer you back to our previous response. To reiterate, we did not initiate or ask for this zoning change. Given the uncertainties the post-secondary education sector is currently facing, it is difficult to predict the long-term enrolment at this time. However, we are supportive of efforts by the Town, Province of Ontario and Government of Canada to create opportunities for more affordable homes for everyone.

Thank you

Janet Morrison
President and Vice Chancellor Sheridan College
Oakville Ontario

I thank you for taking the time to respond to my email and the information that you have provided.

I have read the Master Plan (2020) and it is a distinct document.

But for this particular subject, I had to review it within a lens of how it will impact my family oriented neighbourhood and as to why the need for the proposed Sheridan College Special Housing Area Zoning By-law amendments. To clarify - that is the targeting Zoning By-law amendment to allow “four storey” housing units as row housing in the College Park neighbourhood. And that it is being proposed over and above the town-wide “three storey four unit” housing on a single lot (which as well will apply to College Park). Therefore my conversation is narrow and directed at the proposed Sheridan College growth plans and more specifically at the supply and demand for student accommodations both on campus and off going forward.

I can only determine that the growth rate is anticipated to be approximately 1.5% per year over the next 15 years.

That the present student population is

than 800 meters.

That the resident students are satisfied with the commute distances to Oakville Place, Walmart, Superstore, Metro, Harvey's, Burger King, McDonalds, Rabba, Tim Hortons, Shoppers, and the various Banks. And that the commuting students are satisfied with the bus hub located at the entrance to the college and the frequency of service and destinations being offered.

That the ~40% reduced fares for transit and Go are workable.

I therefore hypothesize that you would agree that the need for the targeted Sheridan College Special Housing Area four storey row housing is not necessary or supported by data or demand generated by Sheridan College.

That the normal absorption of students within the College Park neighbourhood has been acceptable.

But I do interpret wherein you indicate that, if it has been regulated within the law then you support the students in taking advantage of such.

I now draw your attention to the Federal Minister's Sean Fraser's letter dated October 25, 2023 to the Mayor of Oakville wherein he specifically targets the area, calling for "increased densification" around Sheridan College in order to secure HAF. (See attached). I believe this to be reason behind the targeting and a subsequent mis-application of the minister's intent/statement by the Town of Oakville Planning Department.

My neighbourhood needs to convince the Town Council, before the vote is taken, that the four storey intrusion to the existing balance between the family neighbourhood and Sheridan College is not needed or justified.

Therein, we must clarify the College's position/intent before pursuing with the Town Council of Oakville and the Minister.

Can you assure me that my above statements are reasonable or at least cause no concern to you or the college so that this matter can be directed to the Town of Oakville Council for their resolve.

Regards

Robert Lane

Millbrook Ave.

On Tuesday, March 12, 2024, 1:03 PM, Sheridan College President wrote:

Hello Robert,

Thank you for reaching out and sharing your concerns.

Please know that, while officials did inform us of their intention to develop the proposal, Sheridan College did not initiate or request the rezoning order. We understand this is a result of Oakville receiving direction from the Federal government regarding the Housing Accelerator Fund. While we were in no way involved in creating this proposal, Sheridan is supportive of efforts by all levels of government to increase access to safe, affordable, adequate and legal housing for everyone, including our students and the larger community.

Sheridan currently offers 824 on-campus beds at our Trafalgar Campus for our learners and works with community partners to support students in finding safe, affordable, and legal housing in the community. At Sheridan, we are very mindful of our role as an anchor institution in the communities in which our campuses are located and therefore, we have taken a responsible approach to our enrolment. This includes dedicated housing supports, mandatory health insurance, and counselling and peer support for all students.

Sheridan has absolutely no plans for unsustainable growth at any of our campuses, including Trafalgar. We have heard from our students that they have a diversity of housing needs. Some prefer to reside on-campus, others prefer to live in the community. Those who graduate from Sheridan often choose to stay in Oakville, as well.

To support Sheridan's future growth as part of our Strategic Plan, we developed a Campus Master Plan, in consultation with the community in 2020. We have included a link to the plan here. However, given the disruption caused by the pandemic and some recent and ongoing policy changes to the post-secondary sector, we are re-evaluating our infrastructure needs to ensure that Sheridan continues to be an integral part of Oakville's growth as a community that thrives on innovation and creativity, by attracting, nurturing and retaining emerging talent.

We will continue to work with the Town of Oakville, the Province of Ontario, the Government of Canada, and community partners to ensure that safe, affordable, and legal housing options are available for students on campus and in community and help ensure that Oakville is a livable and affordable choice for our graduates.

If you have any questions, please contact Nauman Khan, AVP External Relations, copied here.

October 25, 2023

Dear Mayor Burton,

I write following a review of the Town of Oakville's application to the federal government's Housing Accelerator Fund.

Canada is in a housing crisis, and we all have an important role to play in addressing this crisis. While the federal government is working on measures like a GST rebate to incentivize construction, Mayors and Councils from across Canada have demonstrated leadership by taking action to reform zoning bylaws to help get more homes built, faster.

The housing challenges facing the Greater Toronto Area have national implications, and other municipalities in the GTA have recognized this and have taken steps to end exclusionary zoning. As a result, before making a decision on Oakville's application, I would respectfully urge you to ensure that the Town is doing everything in its power to address the housing supply gap in Oakville, in line with steps taken by other cities in the region.

Upon reviewing your application in detail, there were a number of specific initiatives which I was pleased to see, like, waiving building permit fees for ADUs and implementing electronic development approvals. However, there are a few additional measures I request that you consider in order to strengthen Oakville's application. These include:

- Permitting four units as-of-right Town-wide;
- Increasing densification around Sheridan College;
- Designating dedicated staff to implement an affordable housing strategy, and identifying lands for affordable nonmarket housing; and
- Delegating approvals for variances, affordable housing, and modular housing to Town staff with timelines.

I am eager to approve Oakville's application, but I will not be able to do so before you consider the suggested improvements. I will remain a steadfast ally of the Town and of any municipality ready to lead with the level of ambition required to solve Canada's housing crisis.

I appreciate your consideration of this request and eagerly anticipate our future discussions.

Sincerely,

The Honourable Sean Fraser, P.C., M.P.
Minister of Housing, Infrastructure and Communities

Canada

Subject: Town of Oakville - Official Plan and Zoning By-law Amendments

Janet Morrison
President and Vice Chancellor Sheridan College
Oakville

A statutory public meeting (virtual) was held on March 4, 2024 called by the Town of Oakville for the purposes to discuss/report on proposed amendments to the Official Plan and Zoning By-laws. This specifically deals with the Four Dwelling Units Per Property - and - Sheridan College Special Housing Area.

I am a resident in the College Park sub-division just on the northern limits of the college property. I have live in my home on Millbrook Ave. since 1986.

I am writing to you because of the specific targeting of our neighbourhood of some 258 single dwelling homes that will be affected by what the Town's planning Department is proposing.

The Oakville Planning Department has tabled to Council the proposal to allow, specifically in our neighbourhood, the building of four storey rental units. They are stating they have strategically chosen this neighbourhood because of the need for more affordable units for students and that the extremities of the area was chosen based

on the students abilities/requirements to only have to walk 800 meters.

From their presentation to Council, I noted no reference to Sheridan College being consulted or that Sheridan College has expressed that such a requirement exists. There was no mention of Sheridan's future plans or any analysis as to supply and how that could be achieved.

This indeed alarmed me. Numerous statements from the participants then started flowing during the meeting -that the college had expansion plans for more off shore students with no intention of supplying residences or term accommodations. This would be resolved/farmed out to third parties off campus. Is this factual or erroneous?

A number of questions were raised about Sheridan College but no one was there to respond. I would hope that the Town planning Department has consulted with your officers and that you are now willing to share your views with us and as to why the need for a "Sheridan College Special Housing Area".

If indeed there is student accommodation shortage - what is proposed for the under-utilized land/lots on the campus property?

What are your growth projections/plans and timelines?

What are your public funding shortfalls? And with respect to on campus housing?

What is your occupancy and wait list numbers for your existing student residences?

The College's name was and is being used and I think only proper that you clarify intent, extent of participation and any derived benefits expected, direct or indirect from the Sheridan College Special Housing Area.

I am concerned that our Town Council is being misled by the town planning department.

I await your response.

Janet Morrison
President and Vice Chancellor
Sheridan College
Oakville Ontario

I thank you for taking the time to respond to my email and the information that you have provided.

I have read the Master Plan (2020) and it is a distinct document.

But for this particular subject, I had to review it within a lens of how it will impact my family oriented neighbourhood and as to why the need for the proposed Sheridan College Special Housing Area Zoning By-law amendments. To clarify - that is the targeting Zoning By-law amendment to allow “**four storey**” housing units as row housing in the College Park neighbourhood. And that it is being proposed over and above the town-wide “**three storey four unit**” housing on a single lot (which as well will apply to College Park).

Therefore my conversation is narrow and directed at the proposed Sheridan College growth plans and more specifically at the supply and demand for student accommodations both on campus and off going forward.

I can only determine that the growth rate is anticipated to be approximately 1.5% per year over the next 15 years.

That the present student population is approximately 9,500 students and would be approximately 12,000 in 15 years.

That the existing on campus student residences (dorms) have a capacity of 824 beds. As per the Sheridan Master Plan there are no intentions to expand/increase the on campus accommodations (dorms/beds).

That presently you have no wait list for on campus accommodations.

That the non campus student population either comes from Oakville, commutes to Oakville by personal vehicle, public transportation, or on foot as individuals. And there are no apprenticeship programs per say.

That the campus has a vehicular parking capacity of approximately 1500 spaces (excluding staff parking which I don't believe reside on campus).

That the present parking lots are being held in reserve for the future academic facility expansion.

That the norm is about 60% parking occupancy on an active campus day.

I am also to assume that the college has not received any complaints from the student population as having to walk distances greater than 800 meters.

That the resident students are satisfied with the commute distances to Oakville Place, Walmart, Superstore, Metro, Harvey's, Burger King, McDonalds, Rabba, Tim Hortons, Shoppers, and the various Banks. And that the commuting students are satisfied with the bus hub located at the entrance to the college and the frequency of service and destinations being offered.

That the ~40% reduced fares for transit and Go are workable.

I therefore hypothesize that you would agree that the need for the targeted Sheridan College Special Housing Area **four storey** row housing is not necessary or supported by data or demand generated by Sheridan College.

That the normal absorption of students within the College Park neighbourhood has been acceptable.

But I do interpret wherein you indicate that, if it has been regulated within the law then you support the students in taking advantage of such.

Subject: Official Plan and Zoning By-law Amendments - Four Dwelling Units Per Property and Sheridan College Special Housing Area
Date: Sunday, March 10, 2024 11:37:35 AM

Members of Council
Town of Oakville

On February 22, 2024 the residences of College Park received notice of two proposed Official Town Plan and Zoning By-law amendments. On March 4, 2024 a virtual Town Hall meeting was held to hear the presentation by the Town Planning department and be given the opportunity to voice concerns. Very limited information was given and any further information and analysis has been extremely difficult to obtain from the presenting bodies.

Specifically - the Sheridan College Special Housing Area By-law amendment has rapidly become a major concern for the College Park home owners. I, being one of them. With limited time we have attempted to contact the Federal Minister of Housing, the CEO of CMHC, the Minister of Colleges and Universities and the Chancellor of Sheridan College or their spokespersons. We have met a stonewall obfuscation. We have not been able to get any details, data, rationale, analysis as to the need for any four storey units specifically to the College Park Subdivision. And especially within the 800 meters of the university centre. I ask councillors to simply google - "how far do you have to live from a school to get a school bus in Ontario?" The answer you will find is : 0.8 Km for kindergarten; 1.6 Km for grades 1-8; and 3.2Km for grades 8-12.

I was not able to find in my searches any distances for Colleges and Universities. But I was able to come upon the research by McGill University wherein analysis of preferred walking distances to transit links has been developed.

https://tram.mcgill.ca/Research/Publications/Transit_service_area.pdf

That I believe is the bases of CMHC's insistence on the 800 meter use across Canada in their HAF roll out. And the Oakville planning department has bought in and applied it to Sheridan College students. This study is for transit not colleges and universities. To me - that means any subdivision in Oakville, along any of the transit corridors in this town, could have easily been targeted as has College Park.

Therefore, we can only conclude, there are no valid reasons for targeting College Park as the Sheridan College Special Housing Area and to allow the four storey row housing presented by the planning department. Their reasoning is not defensible.

I ask that councillors vote "no" to the proposed By-law amendments in whole or in part.

I support you in telling Minister Fraser that "you cannot be bought by your own tax dollars".

"Oakville will decide how, where and when affordable housing will be achieved/developed in our community".

Regards
Robert Lane

27
28 **ABSTRACT**

29 The percentage of the population being served by a transit system in a metropolitan region is a
30 key system performance measure but depends heavily on the definition of service area.
31 Observing existing service areas can help identify transit system gaps and redundancies. In the
32 public transit industry, buffers at 400 meters (0.25 miles) around bus stops and 800 meters (0.5
33 miles) around rail stations are commonly used to identify the area from which most transit users
34 will access the system by foot. This study uses detailed origin-destination survey information to
35 generate service areas that define walking catchment areas around transit services in Montreal,
36 Canada. The 85th percentile walking distance to bus transit service is around 524 meters from
37 home-based trip origins, 1,259 meters for commuter rail. Yet these values are found to vary
38 based on our analysis using two statistical models. Walking distances vary based on route and
39 trip qualities (such as type of transit service, transfers and wait time), as well as personal,
40 household, and neighbourhood characteristics. Accordingly, service areas around transit stations
41 should vary based on the service offered and attributes of the people and places served. The
42 generated service areas derived from the generalized statistical model are then used to identify
43 gaps and redundancies at the system and route level using Montreal region as an example. This
44 study can be of benefit to transport engineers and planners trying to maximize transit service
45 coverage in a region while avoiding oversupply of service.

1 **Keywords:** Walking distance, Transit stops, Service area, Pedestrian access, Accessibility to
2 transit, Redundancy in transit service, and Gaps in transit service

3 **INTRODUCTION**

4 The percentage of the population served by a transit system in a metropolitan region is a key
5 system performance measure (Fielding, Glauthier, & Lave, 1978). This performance measure
6 depends on the definition of service areas. A service area around a transit station or stop is
7 broadly defined as the area from which potential riders are drawn. Delineating the service area
8 around public transit stations is a complex and important issue, and is used to determine optimal
9 stop spacing, identify redundancy and gaps at the route and system levels, and understand and
10 predict demand for transit. Stop spacing here is referred to the distance between two consecutive
11 stops along the same route. Redundancy occurs when the same parcel is being served by multiple
12 stops along the same route due to short stop spacing or is being served by multiple routes leading
13 to the same destination. Gaps occur in areas that are not served by any stops or routes. Many
14 transit planners and engineers depend on simplified methods when determining service areas
15 around transit stations especially in regard to walking. A 400-meter buffer (0.25 miles) is defined
16 around bus stops (O'Neill, Ramsey, & Chou, 1992; Zhao, Chow, Li, Ubaka, & Gan, 2003) and
17 an 800-meter buffer (0.5 miles) is used for rail stations (Kuby, Barranda, & Upchurch., 2004;
18 Schlossberg, Agrawal, Irvin, & Bekkouche, 2007) as the areas from which most users accessing
19 the system by foot originate. On the other hand, some researchers feel that this definition is not
20 comprehensive enough and accordingly they use a more inclusive service area based on a 482
21 meter (0.3 mile) buffer around the bus station (Kimpel, Dueker, & El-Geneidy, 2007). These
22 simplified service areas assume that all transit stations or stops are alike for a given mode, which
23 is not entirely true. This method of defining service areas imposes an error when trying to
24 understand the demand for transit and/or when identifying gaps and redundancies in the existing
25 transit service. Redundancy in the transit service provided can lead to poor and unreliable
26 service. Redundancy is an output of poor stop spacing where the bus is required to stop at every
27 block in the network or it is an output of poor system design when several competing routes are
28 present. The definition of service areas should be related to the type of service being offered, its
29 frequency (Fielding et al., 1978) and its reliability. In this research paper, we offer a new method
30 for understanding and defining service areas around transit stations for users accessing transit by
31 foot using Montreal, Canada as a case study. This is done through analyzing a detailed origin-
32 destination survey conducted in 2003 (Agence métropolitaine de transport, 2003) and combining

1 it with service, demographic and built environment characteristics to generate service areas
2 around existing transit stops. This is done with the goals of identifying areas with high levels of
3 redundancy in transit service and identifying gaps where new or improved services are needed.

4 The paper starts with a review of bus and rail transit service area literature followed by a
5 description of the study region. The next section pertains to the methodology used to prepare and
6 analyze the data for developing service areas. These sections are followed by a discussion of
7 those results and a conclusion.

8 9 **LITERATURE REVIEW**

10 The most common standard measure of walking distance to transit stops and stations has been
11 400 meters (0.25 miles) (Gutiérrez & García-Palomares, 2008; Hsiao, Lu, Sterling, &
12 Weatherford, 1997; Kimpel et al., 2007; Murray & Wu, 2003; Neilson & Fowler, 1972; O'Neill
13 et al., 1992; Zhao et al., 2003) since 1972. However, a substantial body of research attempts to
14 refine the analysis of access to transit facilities. According to Murray and Wu (2003), access to
15 transit service is an important factor in transit service planning. The more people residing and/or
16 employed around transit stations, the greater the probability that the service will be used. This
17 definition of the service area involves the use of distance decay to estimate walking distances to
18 transit facilities (Hsiao et al., 1997; Kimpel et al., 2007; Lam & Morrall, 1982; O'Sullivan &
19 Morrall, 1996; Zhao et al., 2003). Authors using distance decay express distances in terms of
20 proportions of riders who will walk no more than a certain threshold. Zhao and her collaborators
21 (2003) noted that in southeast Florida, the number of riders walking over half a mile (800 m) was
22 negligible. In Toronto, Canada, Alshalalfah and Shalaby (2007) showed that among transit users,
23 60% live within 300 metres from their stop and 80% within 500 metres. In Calgary, Canada,
24 Lam and Morrall (1982) observed a median walking distance to bus stops of 292 metres, while
25 the average was 327 metres and the 75th percentile, 450 metres. Also in Calgary, O'Sullivan and
26 Morrall (1996) distinguished between walking to light-rail transit stations in the suburbs and in
27 the central business district. They found an average distance of 649 metres and a 75th percentile
28 equal to 840 metres in the former, while the average distance was 326 metres and the 75th
29 percentile was 419 metres in the latter. Studying walking distances to rail transit stations in
30 Portland, WA, and San Francisco, CA, Schlossberg and his collaborators found a median
31 distance of 0.47 miles (756 m) (Schlossberg et al., 2007). While Daniels and Mulley (2013) found

1 the mean walking distance to bus service 461 meters with 75th percentile at 566. In the same
2 study they found mean walking to rail around 805 meters and the 75th percentile at 1018. It is
3 clear that variation exists in the distance users are walking to transit and bus services between
4 studies. Also it is clear that these distances are beyond the 400 meters for buses and 800 for rail.
5 These differences reflect variations between sections in the regions where data were collected as
6 well as variations between regions. Accordingly, service areas around transit stations should vary
7 according to the service being offered and the location in the region.

8 The first element to consider when analyzing walking distance to transit stops is that
9 pedestrians first and foremost seek to minimize both the distance and time of the walking portion
10 of their trip (O'Sullivan & Morrall, 1996; Schlossberg et al., 2007). After that, individual
11 characteristics, station and area characteristics, transit route features, and temperature can have
12 an effect on walking distances. According to Loutzenheiser (1997), individual characteristics are
13 the most important factors influencing walking trips. Household incomes (Hsiao et al., 1997;
14 Kuby et al., 2004; Loutzenheiser, 1997) and blue collar neighbourhoods (Loutzenheiser, 1997)
15 negatively affect propensity to walk while population and dwelling density (Hsiao et al., 1997;
16 Loutzenheiser, 1997; Zhao et al., 2003) and education (Loutzenheiser, 1997) have positive
17 effects, although not necessarily on distances of those who do walk. Vehicle availability relates
18 negatively to walking likelihood (Hsiao, Lu et al. 1997) but positively to walking distance,
19 presumably because car-owning households locate with less emphasis on transit access
20 (Alshalalfah and Shalaby 2007). Pedestrian access to a transit service, which is the opportunity
21 for using a system (Murray, Davis, Stimson, & Ferreira, 1998), is strongly associated with bus
22 ridership (Hsiao et al., 1997), meaning that if a reliable transit system exists within a walking
23 distance from a population the probability of this system to be used by the residents increases.
24 Area characteristics favouring pedestrian access include the absence of barriers (O'Neill et al.,
25 1992; Zhao et al., 2003), a grid street pattern providing for more pedestrian linkages (Hsiao et
26 al., 1997; Loutzenheiser, 1997; Zhao et al., 2003), higher densities, land use mix (Fitzpatrick,
27 Perkinson, & Hall, 1997; Hsiao et al., 1997; Loutzenheiser, 1997; Zhao et al., 2003), a small
28 number of parking spaces at the station (Loutzenheiser, 1997), safety (Fitzpatrick et al., 1997;
29 O'Sullivan & Morrall, 1996; Schlossberg et al., 2007), and an attractive and reliable transit
30 service (Schlossberg et al., 2007). In terms of transit stops, the number of transit lines at a stop or
31 station (Kuby et al., 2004; Zhao et al., 2003) increases the willingness to walk, while waiting

1 time (Lam & Morrall, 1982; O'Sullivan & Morrall, 1996) and the number of transfers during a
2 trip (Alshalalfah & Shalaby, 2007) decrease access walking distances. Finally, the effect of
3 temperature is unclear because temperatures away from 18°C seems to discourage walking in the
4 United States (Kuby et al., 2004), while winter walking distances are slightly longer than
5 summer ones in Calgary (Lam & Morrall, 1982), a difference that the authors do not explain
6 using temperature.

7 Walking distances, measured or ascribed, influence buffers or service areas around transit
8 facilities. Service areas are used to help understand the existing demand and determine the
9 proportion of the population using the service at the station or stop. There is a consensus in the
10 transit literature that Euclidean buffers (circular buffers around a point) overestimate the service
11 area of a stop and that network buffers are preferable (Gutiérrez & García-Palomares, 2008;
12 Hsiao et al., 1997; Kimpel et al., 2007; O'Neill et al., 1992; Zhao et al., 2003). This
13 overestimation leads to several errors especially when estimating the demand for transit around
14 stations or stops (Gutiérrez & García-Palomares, 2008). Although they tend not to account for
15 off-street shortcuts, network buffers, which incorporate street layout, are better approximations
16 of actual service area shapes and sizes. Importantly, the size of service areas directly affects bus
17 stop spacing strategies, which impact running time and reliability of service (El-Geneidy,
18 Strathman, Kimpel, & Crout, 2006) - factors mentioned above as important attributes for service
19 attractiveness. Most studies looking at bus stop spacing use 400-meter (0.25-mile) service areas
20 around bus stops when revising stop spacing (Furth & Rahbee, 2000) or when removing
21 redundancy imposed by poor spacing (Murray & Wu, 2003).

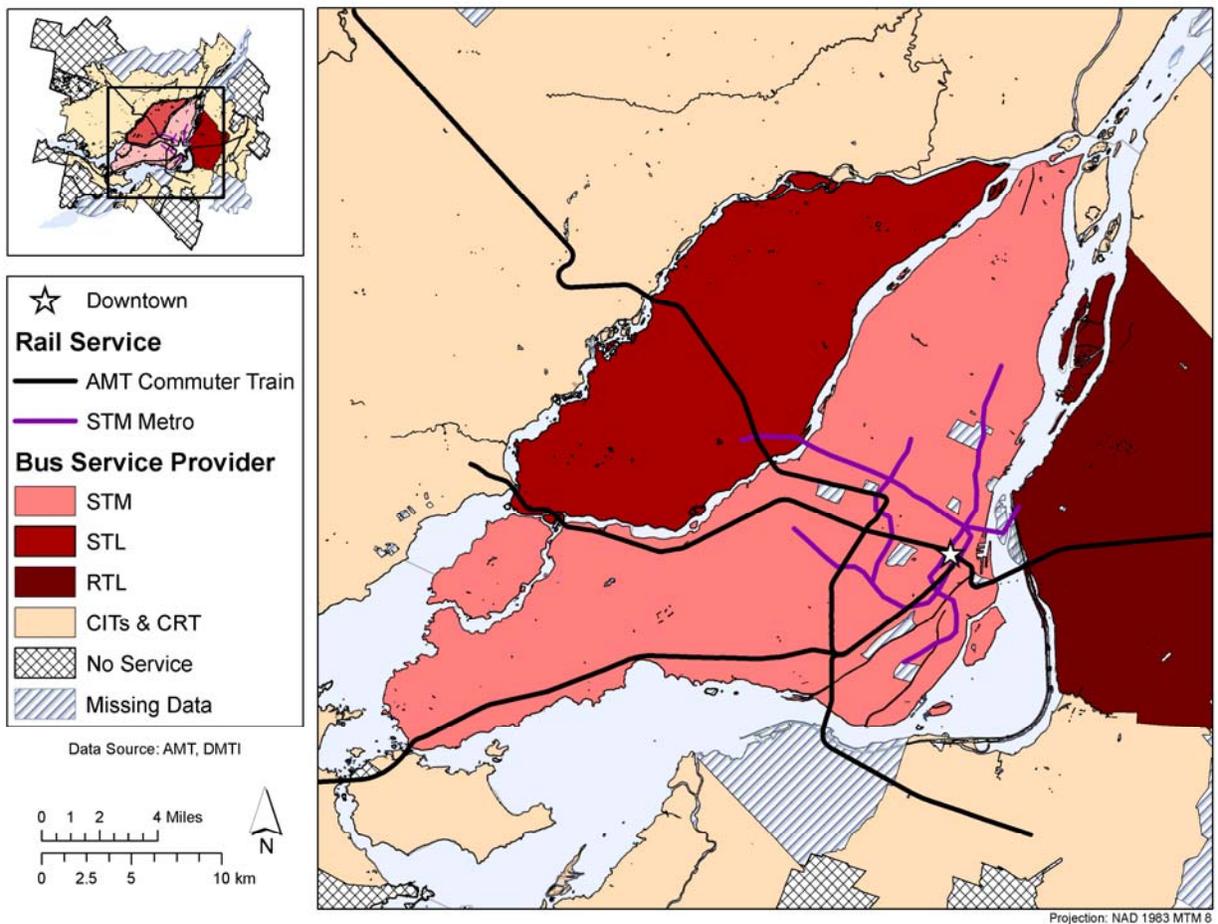

22 The transit industry widely applies the 400-meter (0.25-mile) and 800-meter (0.5-mile)
23 rules of thumb when estimating service areas around bus and rail stations. The application of
24 these conventions can lead to several measurement errors that need to be highlighted and
25 addressed. Previous research has concentrated on the errors generated based on using Euclidean
26 distance, yet to our knowledge there has not been any research looking at the effect of using
27 these generalizations at a regional level. Accordingly, more research is needed in order to
28 understand and properly define service areas around transit stations and stops to address
29 redundancy in the system and generate better stop spacing strategies, which directly relate to the
30 quality of service being offered.

CASE STUDY

Montreal, Quebec is the second most populous metropolitan region in Canada with 3.7 million residents. The Agence métropolitaine de transport (AMT) is an agency of the Quebec Ministry of Transport that is responsible for regional transit in Montreal. In this study, the region served by the AMT will be used as the study region. The AMT operates 5 commuter rail lines, 16 intermodal terminals, 60 park-and-ride facilities, 2 express bus routes, and 85 kilometers of bus, taxi, and/or high-occupancy vehicle lanes. In addition, the AMT plans future transit and collaborates with the 14 local transit agencies in the Montreal region, the largest ones being the Société de transport de Montréal (STM), the Réseau de transport de Longueuil (RTL), and the Société de transport de Laval (STL). **Figure 1** maps the Montreal metropolitan region and existing major transit corridors.

13
14

Figure 1: Transit services in the Montreal metropolitan region

1
2 According to the 2003 Montreal origin-destination (OD) survey (Agence métropolitaine
3 de transport, 2003), 69.3% of trips are done by car, 13.7% by public transit, 10.2% by foot, 4.8%
4 by school bus, and 1.1% by bicycle during a 24 hour period. In terms of trip purpose in the
5 Montreal metropolitan region, 18.3% are work trips, 10.2% are school trips, 7.6% are shopping
6 trips, 5.0% are leisure trips, and 44.6% are back-to-home trips. The proportion of those trips
7 made by public transit is 15.4% for work trips, 21.7% for school trips, 7.6% for shopping trips,
8 9.2% for leisure trips, and 14.8% for back-to-home trips.

9

10 **METHODOLOGY AND DATA PREPARATION**

11 The objective of this paper is to generate variable service areas based on existing service and
12 neighborhood characteristics to help in understanding redundancies and gaps in the existing
13 transit system. This method of generating service area will be compared to traditional methods
14 and conventions. The first step toward generating accurate service areas is to understand and
15 document how far people are walking to use transit in the studied region. Service areas can be
16 modeled around stations or stops using walking distance information from detailed travel
17 behavior data, here from transit users in the 2003 Montreal OD survey (Agence métropolitaine
18 de transport, 2003).

19 The OD survey is conducted every five years in the Montreal region. The survey records
20 disaggregate trips that were made by each person residing in a household. Each trip origin and
21 destination is geocoded and passes through a series of rigorous validation processes to ensure the
22 trip is ends are geocoded correctly. Five percent of households in the Montreal region were
23 surveyed. The OD survey includes questions asking each transit user the routes used to reach
24 his/her desired destination and if other transportation modes were employed.

25 Any trip that involved the use of another mode (i.e. car, cycling, taxi, etc.) is excluded
26 from this analysis. Trips using night bus service or dedicated high school services were also
27 excluded, as were non-home-based trips, and only one randomly selected trip was included per
28 person to ensure the randomness of the dataset. Since the OD survey does not record the actual
29 transit station or stop used but only the routes, walking distances to the closest stop served by the
30 first route used were measured using street network and 2003 stop location information. Walking
31 distance from destination to the last transit route used was calculated using the same method.

1 Measuring walking distances to and from transit stations or stops is the first step in
2 preparing the data for the first statistical model, which examines walking distances along the
3 network to access transit using the individual as the unit of analysis. This model is generated to
4 assess the reliability of the data in hand and compare factors affecting walking to transit in the
5 Montreal region to previous studies. Several factors need to be controlled for in this model. For
6 example, controlling for competing routes is an important step in the process of studying the
7 demand for transit (Kimpel et al., 2007) and was therefore originally included in the walking
8 distance model. A route is considered competing only if it is accessible within a certain network
9 distance threshold measured from both the origin and the destination of the transit trip. This
10 threshold is defined as the value representing the 75th percentile of all walking trips to transit
11 (510.9 meters). Another, more obvious, factor influencing how far users walk is distance at
12 which people live. Network buffers at 200m radius intervals were mapped around each stop or
13 station and linked to Dissemination Area-level census population counts, with populations
14 assumed only to occupy land zoned residential or commercial. The ratio between people residing
15 in the first 400m and 800m captures most of the observed population concentration.

16 Variables used capture individual, household, neighborhood, trip and route
17 characteristics. These variables are included in the individual model to understand how far
18 people are walking to access transit services. Since we do not know the detailed direction for
19 every stop serving a route, we summarized the information for both directions on the transit
20 route. The shortest headway of the two directions is assigned to every walking trip. Headway is
21 defined according to the starting time of the trip at the origin. Since some users start walking to
22 transit before service begins in a few cases, we assigned the maximal headway on the route for
23 these observations. Lastly, headways were converted to waiting time for improved model and
24 theoretical fit by halving short headways (up to 15 minutes) or assigning eight minutes for longer
25 headways. Users vary (Fan & Machemehi, 2009), but beyond about 15 minutes headway riders
26 often consult schedules rather than showing up uninformed to wait on average half the headway
27 time (Hall, 2001). Bus stop spacing was calculated for both directions using a linear referencing
28 technique in GIS after snapping the stops to the nearest transit line. **Table 1** lists the variables for
29 the individual and stop models. Others, notably competing routes, stop spacing, walking distance
30 to destination, and several occupation status dummies, were removed if found overly related in a
31 correlation matrix or found insignificant after stepwise variable reduction.

1

2 **Table 1: Variable definitions**

Variable Name	Description
Walking distance	Walking distance measured using the street network from trip origin to nearest transit station or stop along transit route used
Both models: route/trip	
Metro	Dummy variable equaling one if Metro is first transport mode in trip
Train	Dummy variable equaling one if suburban train is first transport mode in trip
CIT/CRT bus	Dummy variable equaling one if CIT/CRT bus (transit agencies in the region other than STM, STL and RTL) is first transport mode in trip
Wait time	Wait time of transit route used at starting time of trip
Both models: neighbourhood	
Number of intersections	Number of street intersections around trip origin within 510 meters
Distance to downtown	Euclidean distance from first transit stop or station used to downtown point (kilometers)
Population 800m	Population within 800 network meters of first stop or station used
Population 400m of 800m	Population within 400 network meters of first stop or station used divided by population within 800 network meters of first stop or station used
Individual model: trip	
Number of transfers	Number of transfers during trip
Trip distance	Total in-vehicle trip distance (kilometers)
Work trip	Dummy variable equaling one if work trip
AM peak trip	Dummy variable equaling one if trip is starts between 6:30 am and 9:30 am
Individual model: household	
Number of vehicles	Number of vehicles owned by household
Household size	Number of persons in household
Income above 80K	Dummy variable equaling one if annual household income exceeds \$80,000
Individual model: individual	
Age	Age of individual
Male	Dummy variable equaling one if individual is male

3

1 The second step is to make a more general model that can be used in generating variable
2 service areas for each station or stop in the Montréal region without the need of using individual
3 characteristics. The findings from this general model will then be used in a comparative analysis,
4 comparing variable service areas with traditional rules in term of identifying redundancies and
5 gaps in the existing services.

6
7 **DATA**

8 A total of 16,014 home-based transit trips are included in the analysis. The median
9 walking distance to a transit station is 294 meters while the 75th percentile is 525 meters and the
10 85th percentile is 678 meters. Separating walking distances by type of service can give a clearer
11 picture regarding the level of error being imposed by current conventions. **Table 2** shows
12 summary statistics of walking distances to transit stations (origin) as well as mean values or
13 percentages (for dummies) of independent variables. The 85th percentile of walking distances to
14 bus service is well above 400 meters for all transit operators; for commuter rail, the 85th
15 percentile is over 1,250 meters and is 873 meters for the metro (subway).

n	1614	3723	493	8745	1628	887	538

4
5

1 It is important to note that the demand around transit stations or stops is not equally distributed
2 and a distance decay affected is observed. Previous research used distance decay curves as a
3 means of understanding service areas (Hsiao et al., 1997; Levinson & Brown-West, 1984;
4 Upchurch, Kuby, Zoldak, & Barranda, 2004; Zhao et al., 2003). **Figure 2** shows distance decay
5 curves representing cumulative percentages of walking distances beyond specified thresholds to
6 each transit service type. Fourth order polynomial fit lines aid visual interpretation.

7

8

9 **Figure 2: Distance decay to metro, train and bus services**

10

11 The curves all terminate near 1500 meters but their shapes differ considerably, most of the bus
12 types approximately exponential and the rail (and CIT bus) more linear. Non-cumulative
13 frequencies were also plotted for the two most popular services (not pictured): an exponential
14 curve fit STM bus service well ($R^2=0.95$) but was not much better than a linear curve for the
15 Metro ($R^2=0.43$ and 0.34 respectively). Rail services have relatively few origins near stations,
16 stations being less ubiquitous than bus stops and land, especially near the Metro, being generally
17 more expensive due to the premium offered by transit accessibility. They also have wider
18 drawing power, offering high speed and convenience. These impedance curves reflect the rather

1 limited speeds attainable by pedestrian travel. However, an interesting result is that a surprising
2 number of trips are made at distances up to and even exceeding 1 km (0.6 mile). This result is
3 consistent across trip purposes, suggesting that individuals might be willing to walk considerably
4 farther than the 400-meter (quarter mile) and 800-meter thresholds considered standard in transit
5 planning. It is important to note that distances walked to buses are generally shorter compared to
6 suburban trains and Metro due to the differences in types of service, comfort, frequency of
7 service, and stop spacing. Stop spacing for suburban trains and Metro is generally bigger than
8 bus stop spacing.

10 ANALYSIS

11 A linear regression model for individual walking distances is tested using individual,
12 household, trip, route and neighborhood characteristics. This model had an adjusted R^2 value of
13 0.275, a reasonable fit, with high explanatory power compared to recent trials (Daniels &
14 Mulley, 2013). But a likelihood ratio test suggested that route and stop/station nesting ought to
15 be accounted for making the use of linear model not appropriate for such analysis. Accordingly a
16 multi-level regression modeling technique is used. The resulting multi-level regression output is
17 reported in **Table 3**.

1 **Table 3: Individual multilevel walking distance model**

Variable	Coefficient	Z	P>z	95% Confidence Interval	
Metro	209.13	14.46	0.00	180.79	237.48
Train	281.98	12.51	0.00	237.80	326.17
CIT/CRT bus	57.78	3.58	0.00	26.17	89.39
Wait time	-2.38	-1.65	0.10	-5.21	0.45
Number of intersections	0.07	1.99	0.05	0.00	0.13
Distance to downtown	5.02	6.67	0.00	3.54	6.49
Population 800m (000s)	-2.06	-2.07	0.04	-4.02	-0.11
Population 400m of 800m	-642.77	-15.21	0.00	-725.61	-559.94
Number of transfers	-34.35	-11.36	0.00	-40.28	-28.42
Trip distance	2.98	6.69	0.00	2.11	3.85
Work trip	13.44	3.05	0.00	4.80	22.07
AM peak trip	-9.34	-2.08	0.04	-18.16	-0.53

Dependent variable: Walking distance to transit at origin (meters)					

2

3 As one would expect, walking distances to transit are largely influenced by population
4 concentration around stops and stations. If populations are high very near stops but low at
5 somewhat greater distances, most users are likely to walk short distances, but several other
6 neighborhood variables are also significant. Street connectivity, as indicated by number of
7 intersections, appears to facilitate slightly longer actual walking distances – not just longer

1 Euclidean distances. This may or may not be related to untested neighborhood characteristics
2 such as visual interest or apparent safety, but is interesting in any case. Conversely, people are
3 shown to walk on average about five meters farther with each kilometer from downtown and
4 about two meters shorter per 1000 people nearby, possibly reflecting denser service offerings
5 possible in more central and populous areas. Attempts to more directly model such service
6 characteristics, namely distance to stops adjacent the nearest on first route used and count of
7 potential competing routes, proved less effective and surprisingly insignificant. Determining
8 generalizable rules governing what constitutes a potential competing route for a particular user is
9 difficult and might be refined in subsequent work. Shorter distance between stops on a route
10 seemingly should be found to reduce average walking distances, but stops in Montreal are often
11 quite close together (e.g. **Figure 4**) and in many cases much of the walk might consist of getting
12 to the street with the route.

13 It is clear from the model that the type of transit service being offered, and to some extent
14 the service quality, affect average walking distances to use public transit. Accounting for all else,
15 underground Metro riders walk 209 meters farther than most bus users and commuter rail riders
16 walk on average 282 meters farther. Both these services offer exceptional in-vehicle speed,
17 although commuter rail fares are higher than those for most other Montreal region transit.
18 Differences between bus sorts seen in summary statistics (**Table 2**) are largely attributable to
19 neighborhood and other factor types, but CIT/CRT buses on the region's periphery still have
20 average access walks 58 meters longer than the rest. The areas they serve are largely automobile-
21 dominated, with wide spaces between routes in which people live. One direct service quality
22 measure that was found significant, if here only at the 90% confidence level, is wait time: for
23 each additional minute of wait time, users walk on average a little over 2 meters less, suggesting
24 wider appeal of more frequent buses. It is suspected that this is a conservative portrayal of the
25 importance of frequency: high-frequency bus routes require high ridership to be viable so they
26 necessarily locate very near large rider pools, likely reducing average walking distances. Too, a
27 very good relevant route might attract transit-using populations to live nearby. Still, slightly
28 longer average walking distances are seen to relate to shorter wait times.

29 Individual trip characteristics also show significance. Each transfer used in a trip reduces
30 average walking distance by 34 meters. This can reflect a disutility of transfers that people will
31 walk a little farther to avoid, as well as the reduced walking distance necessary when one is less

1 selective about which route, or combination, to take to reach the destination. Walking distances
2 also increase by three meters for each in-vehicle kilometer of the trip. Explanations relating to
3 suburban origins or captivity should be better captured by neighborhood variables above or
4 individual/household variables below. Another possibility is that access walking distance is a
5 less important part of longer trips and long-distance riders make added effort to reach the least
6 time-consuming overall of the routes available. Riders walk about 13 meters farther for work
7 trips than other types of trip purposes, again possibly reflecting overall time budgets. Conversely,
8 they walk about nine meters less during the AM peak, when work trips are most frequent, than at
9 other times of day, probably due to additional services available at such hours such as frequent
10 buses on otherwise infrequent routes. Unexpectedly, walking distance between destination and
11 nearest stop on last route used was not found to be significant, although it showed a marginal
12 effect on earlier models that included trips not originating from home.

13 Household and individual-level characteristics found significant include number of
14 vehicles, household size, income category, gender and age. As expected, walking distances are
15 longer for those from households with more vehicles. These households, as a whole, might be
16 less dependent on transit and thus comparatively unwilling to pay a premium for better-
17 accessible housing. However, they might still include individuals who do not drive or choose not
18 to drive for certain trips. Household size and high-income status have similar effects, potentially
19 related to additional housing space needs or preferences and accessibility premiums (or absolute
20 availability of large properties near major routes). It is also important to note that this isn't a
21 transit demand model where we could expect that some of these variables (number of cars, etc.)
22 would be negative. Males walk about 12 meters longer than females and walking distances
23 decrease by about ½ meter for each year increase in age.

24 The random part of the multilevel regression model shows the standard deviations of the
25 intercept and residuals (error term). In general, the idea of the random coefficient demonstrates
26 that the overall error variance consists of two parts: the first results from the random variation of
27 the intercept (standard deviation of the constant), and the second results from the variance of the
28 error (standard deviation of the residual). The Intraclass correlation coefficient (ρ) is a statistic
29 that measures the degree of dependence among observation nested within transit stops. In other
30 words, the interclass correlation coefficient explains the proportion of variability of walking
31 distances to transit stops that occurs between transit stops rather than within transit stops. The

1 model suggests that 24.5% of the variability of walking distances to transit stops is due to
 2 differences between transit stops characteristics. Lastly, the mean walking intercept of the
 3 sample was 411.7 meters; it was estimated that 95% of the random coefficient of the walking
 4 distance varied between 149.9 meters and 673.6 meters, suggesting significant variability of
 5 walking distances to transit stops between different transit stops.

6 The first model follows transit research theory. Accordingly, a generalized model is
 7 generated. This model can be then used to generate variable service areas for each station or stop
 8 in the entire Montreal region and compare to the traditional methods of generating service areas.
 9 As above, a linear regression model was generated, with an adjusted R^2 value of 0.255, but
 10 following likelihood ratio test results, a multilevel generalized model was chosen, presented in

11 **Table 4.**

12 **Table 4: Generalized multilevel walking distance model**

Variable	Coefficient	Z	P>z	95% Confidence Interval	
Metro	212.19	14.48	0.00	183.48	240.90
Train	307.91	13.58	0.00	263.48	352.33

sd (Residual)	237.01	1.51	234.07	239.99	
Dependent variable: Walking distance to transit at origin (meters)					

13
 14 All personal characteristic variables are removed from this model. Attempts were made
 15 to substitute in corresponding aggregates from tract-level census data, such as median income,
 16 but none showed significant effects. Variables in the generalized model have the same signs as in

1 the individual model, providing some validation, but most have slightly stronger coefficients,
2 without the refinement offered by the omitted variables. The lone variable with appreciably
3 reduced significance, the AM peak trip dummy, likely suffers primarily from the absence of the
4 counter-balancing work trip dummy, and becomes insignificant. AM peak service will be used to
5 generate service areas as an example in this paper, but without the previously noted 9-meter
6 reduction, following this generalized model.

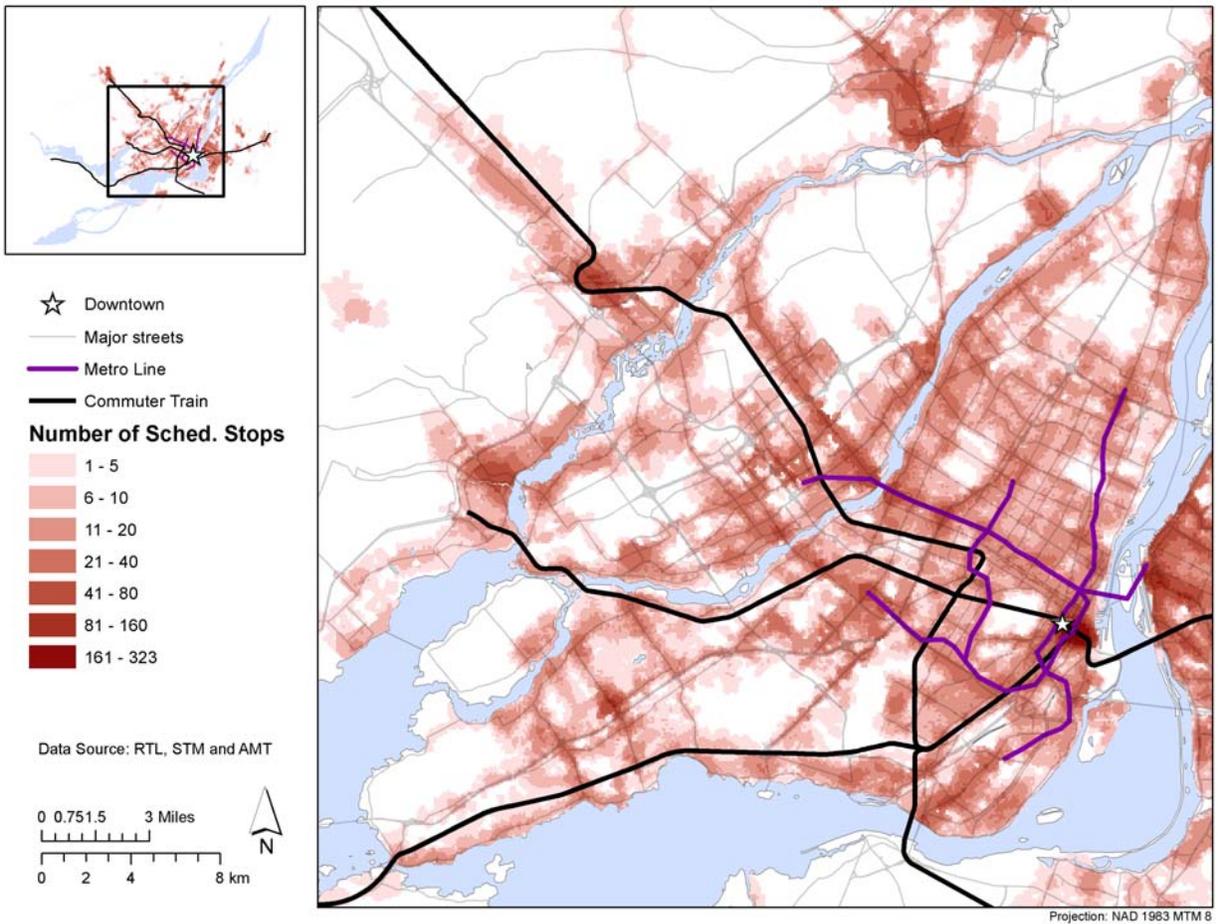

7 The Intra-class correlation coefficient (ρ) for the generalized model suggests that
8 approximately 25.5% of the variability of walking distances to transit stops is due to between
9 transit stops variation. The Intra-class correlation coefficient of the generalized multilevel model
10 is over estimated by 1% than the individual multilevel model, which is an expected outcome, as
11 the individual multilevel model picks up more of the within bus stop walking distance variation.
12 The estimated 95% of the random coefficient of the walking distance varied between 184.8
13 meters and 725.5 meters. Again if you compare the variation range (difference between upper
14 bond and lower bond) of the random coefficients between the generalized model (540.4 meters)
15 and individual models (523.7 meters), you will find that the generalized model range is less by
16 16.7 meters in total.

17 Using the specifications obtained from the generalized model, we generated a mean
18 walking distance for every transit stop in the region during the morning peak period. A total of
19 17,248 transit stops were used. The number of stops excludes the directional effect of the service
20 to avoid double counting. Double counting occurs when two transit stations serving the same
21 route are present across the street from each other, yet each one of them is serving a different
22 direction. Since the wait time, a function of headway, had a statistically significant negative
23 effect on walking distance, we used the direction with the shortest headway for generating
24 service areas. Accordingly, this mean walking distance can be used in generating variable service
25 areas around each stop. Since service areas are defined as the area including most of potential
26 riders around a transit station, the mean walking distance to a station or stop needs to be
27 adjusted. Firstly, 0.3% of stops were calculated to have impossibly negative mean walking
28 distances, mostly due to the high importance of population concentration and the existence of a
29 few isolated residential areas surrounded by open space or industry, which were set to zero. Then
30 the difference between the mean and the 75th and the 85th percentiles for every type of service,
31 STM, RTL, STL, CIT/CRT, Metro, and Commuter rail (see **Table 2**), were added to the

1 calculated mean distances for every stop used in the generation of variable length service areas.
2 An additive function was chosen over a multiplicative function so as to minimize impacts of
3 extreme values.

4 To understand the system-wide implications of different service area definition methods,
5 buffers were generated along the road network using the conventional thresholds (400 meters for
6 bus and 800 meters for rail), the mean values obtained directly from the statistical model, and
7 modified service areas at the 75th percentile and 85th percentile. Since we are modeling walking
8 distances around transit stations, freeways were excluded from the network beforehand. The total
9 area covered by all buffers using the fixed conventional buffers equals 748 square kilometers.
10 Using the mean value derived from the statistical model yields similar total coverage (729 square
11 kilometers), but the 75th and 85th percentile buffers, which more accurately represent walking
12 area for most users, encompass 859 and 964 square kilometers, respectively. It is important to
13 note that overlapping service areas are measured once in this calculation and no double counting
14 is included. It is clear that using 400- and 800-meter service areas around stations underestimates
15 service coverage by approximately 29% when compared to the 85th percentile estimates.

16 **Figure 3** shows the overlapping service areas that are generated from the 85th percentile
17 estimate for the entire region. The figure can serve two purposes. The first is identifying existing
18 gaps in the Montreal region's transit system. Identifying gaps is the first step toward identifying
19 areas where new services or modifications to existing services are needed. The existing gaps in
20 the service are represented as white areas in the figure below. After identifying system gaps,
21 transportation engineers and planners can overlay the results with land use information to
22 determine whether there is a demand for improved services within these gaps. They can also
23 work on modifying the existing service through shortening wait times, adding road links, or
24 moving or adding stops to expand or add new service areas. The second purpose of this map is to
25 identify areas with excessive system redundancy. The shades from yellow to red are mainly areas
26 with high levels of redundancy in the services being offered.

Figure 3: Overlapping service areas using 85th percentile estimate network buffers

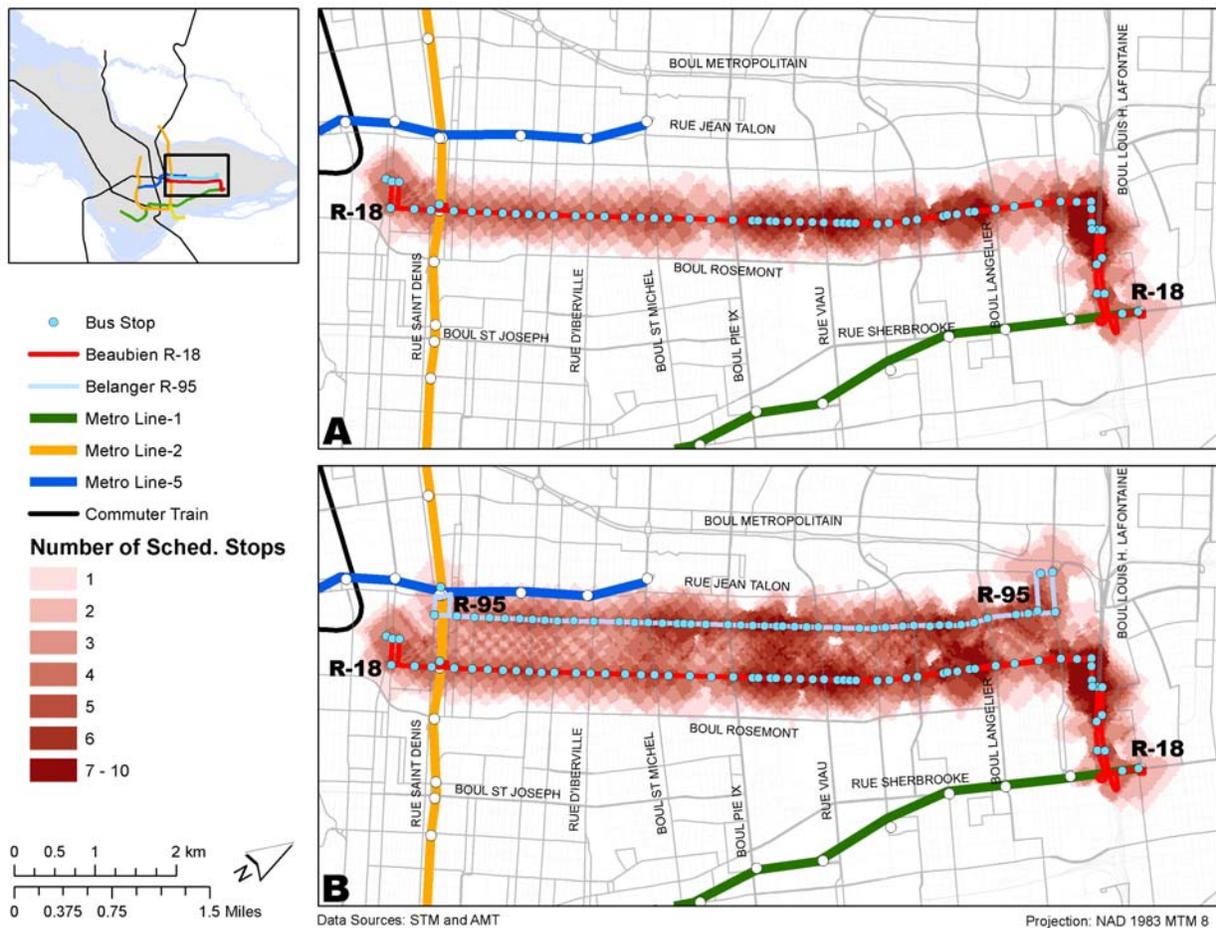

The map above is derived from intersecting 100 by 100 meter grid cells with the network distance service areas. Accordingly, the number of stops displayed represents the count of service areas intersecting with each grid cell. If a bus stop is serving two different transit lines then two variable service areas are derived for this stop based on the route and neighbourhood characteristics. The number of stops in the figure does not represent the number of physical stops since a stop is created for each route operating during the AM peak where multiple routes serve the same stop. Areas with high levels of redundancy need to be explored further to identify whether the redundancy is justified or not. For example in the downtown core, 323 scheduled stops are in service during the AM peak period. The downtown area has the highest number of bus, metro, and train routes in the entire region. Similarly, areas around major transit centers are expected to have high levels of redundancy. Yet, more analysis at the route level is required to

1 understand the reasons for redundancies in other areas. The above figure only generates a general
2 picture of the situation.

3 **Figure 4** shows the redundancy in the service being offered by two STM bus routes
4 (Bélanger 95 and Beaubien-18). In part A of the figure, we intersected the generated variable 85th
5 percentile service areas for each stop serving route Beaubien-18 with 30 by 30 meter grid cells,
6 showing overlapping service areas. This method can help identify redundancies and evaluate
7 stop spacing along a single route. Since transit service does not exist in a vacuum, studying
8 service area requires obtaining information from competing routes as well running in parallel to a
9 route of interest. In part B of the figure we intersected the generated variable 85th percentile
10 service areas for every stop serving both bus routes, Belanger 95 and Beaubien-18, with another
11 set of 30 by 30 meter grid cells. The figure shows the number of service areas generated from
12 scheduled stops intersecting with each grid cell.

9
10
11
12
13
14

Figure 4: Bus route sample for overlapping service areas using 85th percentile estimate network buffers

Looking at part A from the figure above, it is clear that redundancies exist in the middle and the eastern sections of the route where the bus stop spacing is inconsistent. Another important observation is that the area being served by one scheduled stop is equal to 23% of the total service area around the transit line, while the area served by two stations represents 19% of the total service area around the entire transit line. Around 58% of the area served by this route is covered by at least 3 stops. Having an overlap in the service area along the same route is acceptable to a certain level. However, when the number of overlapping service areas reaches five or six and they represent a big proportion of the service area around a bus route (30% for example) then revision of stop spacing and route characteristics is a must.

1
2 Meanwhile, part B of the figure shows the level of redundancy in the service offered by
3 two competing routes. Around 29% of the service area around both lines is being served by at
4 least five scheduled stops from one or both of the studied routes during the AM peak period.
5 Accordingly, the level of service coverage being offered along parallel east-west corridors at this
6 particular location is very high. It is important to note that such methods need to be developed
7 carefully to ensure the routes under investigation are competing and not complementing routes.
8 The transit agency has some room to implement bus stop consolidation along several sections of
9 these two routes. It is expected that the additional access time for passengers will be offset if not
10 surpassed by the savings in running and waiting time. Savings in waiting and running time can
11 also translate to savings in operating costs and other beneficial effects. Less frequent stops can
12 mean less frequent accelerations, reducing fuel consumption and emissions, and less frequent
13 pauses and lateral movements might help alleviate traffic congestion.

14

15 **CONCLUSION**

16 This research paper uses detailed origin-destination survey information to generate variable
17 service areas for the Montreal region. It is clear from the summary statistics that service areas
18 generated using rules of thumb greatly underestimate the effective service areas around transit
19 stations. The 85th percentile walking distance to bus transit service is around 524 meters from
20 home-based trip origins, 1259 meters for commuter rail. This finding raises the importance of
21 careful revision of the 400- and 800-meter service area rules used in the transit industry. It also
22 offers insights regarding the opportunities for increasing transit stop spacing in North America.

23 The research also highlighted differences between various bus transit operators. It is
24 clear from this research that transit users tend to walk longer distances to use suburban service.
25 The statistical models show that walking distances to transit stations vary based on
26 neighbourhood, household, personal, trip and route characteristics. Notable for transit providers,
27 people walk longer distances to routes with shorter wait time, and transit types (metro, commuter
28 rail, and buses) vary considerably, even after accounting for neighbourhood characteristics and
29 other variables. Accordingly, service areas around transit stations should vary based on the type
30 and quality of service being offered. The generated service areas derived from the statistical
31 model are used to identify gaps and redundancies in the existing transit network. These gaps and

1 redundancies need to be analyzed carefully and in detail at the route level. Finally, the detailed
2 analysis examining overlapping service areas along two specific routes shows the usefulness of
3 this variable service area in identifying areas where potential stop spacing revisions can be
4 effective without causing much harm to existing riders. It is important to note that revised stop
5 spacing based on such methodology needs to be developed for competing routes and not
6 complementing ones. This research suggests that stop spacing should be investigated as a
7 variable value depending in part on the frequency and type service being offered and not just as a
8 service standard-given number. It also opens venues for research in the area of transit-oriented
9 development and how to identifying the exact service area around transit stations.

10 This study concentrated on service areas around transit stations and stops based on
11 measured network walking distances. More research is recommended for deriving service areas
12 around transit stations when other modes of transportation are involved. The generated service
13 areas can be used in operation research studies involving bus stop consolidation. Combining the
14 findings from this research with passenger movement at transit stations can help in generating
15 better estimates of transit demand. Population concentration around transit stations and stops is a
16 major factor influencing walking distances. Relatively disaggregated parcel-level population data
17 would improve representation of this element and likely improve the model. In this research
18 paper, we used scheduled rather than actual headways. Actual headways can be generated from
19 archived automatic vehicle location (AVL) data. In addition, using on-time performance
20 measures obtained for the AVL data can be an indication of the reliability of service, another
21 measure of the service attractiveness that could be used to derive service areas more accurately
22 and increase the fit of the model. Also the generated service areas could be linked back to
23 automatic passenger counter (APC) data, if they were present, to enable a better understanding of
24 the transit demand and the best representation of a service area. Finally, having information
25 related to passenger activities at each transit stop/station could improve the modeling process,
26 through testing several variable service areas beside the 85th percentile estimate used in here.

27 28 **ACKNOWLEDGMENTS**

29 This research was partially funded by the Agence métropolitaine de transport (AMT) and
30 Natural Sciences and Engineering Research Council of Canada (NSERC). We would like to
31 thank Ludwig Desjardins of the AMT and his research team for their support and feedback

1 throughout the project. We wish to acknowledge Mr. Daniel Bergeron and Alfred Ka Kee Chu of
2 the AMT for providing the detailed Montréal OD survey used in the analysis as well as the
3 transit network. We would also like to thank Ehab Diab for his help with the final figures. Last
4 but not least we would like to thank David Hartgen the editor of Transportation and the five
5 anonymous reviewers for their feedback on the earlier version of the manuscript.

Subject: Appeal of Decision Regarding Changes to Zoning By-law for Sheridan College Housing Area
Date: Thursday, February 29, 2024 2:25:26 PM

Hi Team,

I hope this email finds you well. I am writing to formally appeal the recent decision made by the Town of Oakville regarding changes to the Zoning By-law for the Sheridan College housing area.

As a resident and stakeholder in the community, I am deeply concerned about the implications of the decision and its potential impact on the surrounding neighborhood. The proposed changes raise several important issues that warrant further consideration and discussion.

Firstly, the density and scale of the proposed housing developments could have significant effects on traffic congestion, parking availability, and overall neighborhood character. Without adequate planning and infrastructure improvements, these developments may strain existing resources and diminish the quality of life for residents in the area.

Additionally, I am troubled by the lack of community input and consultation in the decision-making process. It is essential that residents have the opportunity to provide feedback and express their concerns about developments that directly affect their lives and surroundings. Transparency and inclusivity are fundamental principles of good governance, and I urge the Town to prioritize meaningful engagement with all stakeholders going forward.

Furthermore, I believe there may have been oversights or inaccuracies in the assessment of the proposed changes and their potential impacts. It is essential that decisions regarding zoning and land use are based on thorough research, analysis, and consideration of all relevant factors. I respectfully request that the Town revisits the decision and conducts a comprehensive review to ensure that it aligns with the best interests of the community.

In conclusion, I urge you to reconsider the recent decision regarding changes to the Zoning By-law for the Sheridan College housing area. By addressing the concerns raised by residents and stakeholders and fostering a more inclusive and transparent decision-making process, we can work together to create a vibrant and sustainable community for current and future generations.

Thank you for your attention to this matter. I look forward to your response and to the opportunity to participate in further discussions on this important issue.

Best,
Deepak
Erin St resident

Subject: A Vision under the HAF Sheridan Special Policy Area
Date: Monday, March 25, 2024 9:22:21 AM

Dear Mayor Burton

I have observed over the years that you apply sound judgement in trying to do the best for the Town and all its residents and I trust you will not waiver from this approach in dealing with the Housing Accelerator Fund Application. There are many positive things that may come out of this but there are also a couple of very serious downsides in pursuing right of four and the Sheridan Special Policy components for which I would like to share my vision of the future. It seems to me that the Sheridan's problem should not be borne by the residents surrounding the school but by the three levels of government providing Sheridan with sufficient funds to solve their own problem. This could include the building of student residents on their own property or better yet building a new satellite campus in Milton to improve accessibility for students and to relieve pressure on Oakville.

I will also be sending this message to each member of council as well as to our elected Federal and Provincial representatives. Here is my vision.

Current Situation

I reside in College Park which makes up a major part of the Sheridan Special Policy Area. College Park is a sub-division of 259 single family homes that were built in the mid 1980's to provide a wide range of houses from 1565 square feet to 3107 square feet. From the street it is difficult to tell the difference between houses and the various models are mixed throughout. Given this mix it is quite a diverse community made up of young families, empty nesters and seniors. I am personally aware of three instances where the children of the original owners purchased homes in College Park because they grew up knowing this was a wonderful place to raise a family.

For the most part the homes are well maintained and many have substantially invested in upgrades and additions. The only exception to this has been where properties have been purchased by absentee landlords who want to maximize their investment returns by doing as little as possible. I know of one B&B operating in our area. There was one other that found it more profitable to turn it into a lodging house but for whatever reason has recently evicted the tenants and moved back in. Speaking of lodging houses, it is apparent that a number must exist here and in concern for the safety of the lodgers I would like to know if licences have been granted under Business Licencing By-Law 2015-075 specifically Schedule 20 dealing with Lodging Houses. This schedule along with the chart on page 34 of the by-law outlines among

other things the requirement for electrical inspection, heating equipment inspection, and Fire Marshall inspection to insure working detectors and fire egress windows. If no licences exist there is a definite need for a house-to-house audit to take place.

On a personal note, we have invested many thousands of dollars over the past few years on normal maintenance and upgrades including energy efficient elements. All of this supports the economic health of our business community, protects our investment in our home and improves its the value and livability.

Our Reaction Should the Sheridan Special Policy Be Approved

We still have a number updates we would like to undertake including accessibly features that will allow us to stay in our home as long as possible. Should the SSP be approved we will put a moratorium on all future expenditures as there will be no point in sinking money into it. The only value our house will have is the lot value. One would argue that house prices will fall to that of the smallest house in the sub-division. I would argue that many would not even realize that as the bigger the house the more it will cost to tear it down. Real estate values will quickly be impacted - our neighbour, who moved here less than two years ago, stated that if he had known this was in the works he would never have bought here. Even real estate agents see the potential problem, I am told that two weeks ago there was an open house and the agents tore down posters that depicted what a single-family home would be like surrounded by four storey buildings - obviously they did not want to scare off potential buyers.

Given the substantial drop in property values we will be filling an appeal to MPAC and we will be exploring who we can go after for compensation.

Vision of the Future

"Gentle Densification" - NO - Brutal Densification.

Families will not want to live here. Only investors/speculators/absentee landlords will be interested buying properties and since they will be torn down there will be no incentive to maintain the house or its appearance. As existing home owners see what is happening they too will realize there is no point in putting more money into a sinking ship. The result will be urban decay and a terrible place to continue to live - our children are already saying MOVE - MOVE RIGHT NOW. If we stay, what are we going to be faced with? We will lose significant value in what we have worked a lifetime for, we will face years of construction with all the heavy truck movements, debris and dust. The noise of construction/demolition will go on from 7am to dusk and this creeping cancer will continue until it is on our doorstep and we will feel the house shaking. We lived through this going on next door once before. The previous house was torn down, all the trees removed, all the soil and anything else that would get in the way. Getting in our way was all the worker vehicles, delivery trucks and construction equipment that made it difficult to safely enter or exit our driveway and on occasion blocked

it. All toll we had to tolerate it for over two years - we should have MOVED. When the new house was finally completed the grades on the lot were raised three feet so they did not have to dig so deep for their basement. All our privacy disappeared and from their kitchen window they could look down and see what we were eating at our dinning room table and what we were doing every where else on our property. If this is what we are going to face, best MOVE and let some else have the experience until the house is torn down.

The other reality is that investors/builders will not find it viable to build low cost housing for students and families unless they are subsidized or restrictions are put in place limiting what they can do. Without both of these components builders will not put up low cost housing. It must be recognized that knocking down houses currently pushing two million dollars is not economically feasible unless the end game is to drive down prices as families just want to move out.

What's In It for Oakville?

The Sheridan Special Policy Area may help in obtaining a HAF grant and its base payment but as I understand it in order to get top up funding and an affordable housing bonus it is necessary to show results. Re-zoning a low-density sub-division to allow four storey buildings will likely not happen quickly enough to demonstrate any positive results let alone affordable housing.

Sub-divisions such as College Park are planned communities with infrastructure designed to handle the planned service demands. Apart from College Park, will the HAF grants cover the costs to the Town to upgrade all infrastructure both upstream and downstream including roads for all the densification taking place across Oakville - not too likely, so it will be the taxpayers of Oakville who will foot the costs.

I have faith that you will continue to choose the common sense approach.

Sincerely
Robert Condie

Subject: Re: Housing Accelerator Fund Prospective
Date: Wednesday, March 6, 2024 4:21:47 PM

Oakville's 2024 draft budget presented on October 19, 2023 was for \$405.1 million which indicated a tax increase of 4.28%. The \$36 million which seems now to be only \$25 million is not substantive enough to inflict all the negative outcomes that will result in pursuing this grant. This is a one time grant which will soon be eaten up with the expenses incurred to expand the infrastructure necessary to accommodate this town wide densification. Bottomline - no long term benefit to the Town or to the residents of Oakville.

In the College Park enclave, not including Canada Court or the streets south of the Sheridan campus, I count 259 single family homes. To put things into perspective lets assume that the current average house price is \$1.5 million or a total of \$388 million. With a zoning change lets assume the value of these houses goes down 10 to 20 percent which translates to \$38.8 to \$77.6 million which is a huge loss to our residents but also a loss to the Town in property taxes. Bottomline - no benefit.

So far not much has been said about Sheridan College's expansion plans. Is there a real demand to increase the enrollment by two and a half times? Is it better to establish another satellite campus, say in Milton, to better serve Halton and surrounding areas as a whole and avoid adding to the high level congestion already experienced on Trafalgar Road?

I have provided a link below to an article/news item aired by CBC on February 27, 2024 dealing with a two year moratorium on International students. Why did this come about? Well, our Federal Government allowed one million new residents into Canada in 2023 without any ability to house this many more people; hence, the Housing Accelerator Fund. In addition, to try to stem the flow visa requirements for Mexicans were recently enacted along with the moratorium on international students. CBC published some very interesting statistics on international student permitting that indicated Ontario recipients of these student visas were more than that of all the rest of Canada combined. I fear the Provincial Government will not

be an ally of ours in regards to Sheridan College expansion due to the vast amount of money these international students bring into the system which in turn offsets the funding the Province has reduced. The statistics show that of the top ten 2023 recipient schools in Canada nine are in Ontario and Sheridan comes in at number nine in the country. Pre-pandemic Sheridan had permits for 4107 student but for 2023 had permits for 9211 so based on this accelerating rate of increase it is no wonder Sheridan's Master Plan calls for an expansion of two and a half times. Given that the Federal Government can turn the tap off on a dime are Sheridan's expansion plans still valid?

Please take the time to look at CBC's report as it certainly sheds light on the extraordinary problem faced by the College Park community.

Sincerely,
Robert Condie

Subject: Everyday Pressure to Ward 5 Councillors - Change their minds to vote down two Motions.

It appears the "facts" from the Town are changing everyday - it was stated to be originally \$36M to give away our rights to question "4-as-of-rights". Then at the recent meeting it was stated \$25M.

Seems a small amount to give away our future rights forever.

Ward 5 residents must "convince" Councillor Knoll and Grant - to vote down and officially state this. Everyday - there must be pressure. Emails, calls, etc....

Have a great day :)

Subject: Re: Item 6.2 - own-initiated Official Plan and Zoning By-law Amendments – Four Dwelling Units Per Property and Sheridan College Housing Area

Date: Thursday, February 29, 2024 9:02:51 AM

.....

Extremely well stated - thank you Dan for all your hard work in bringing a clearer focus on the issues. I am still struggling to see where this 36 million brings any long term benefit to the vast majority of the residents of Oakville and hopefully Council gives full consideration to this. We have been Oakville residents since 1971 and have never witnessed anything with as far reaching implications as this. Given the magnitude of this, a plebiscite should be in order so that the residents of this Town have a real say in the future of where we reside.

One additional premiss I feel that needs to be challenged is Sheridan College's plans for expansion. Is the demand for this amount of growth in students wishing to attend Sheridan actually realistic? Does expanding the Oakville campus make sense or should growth be accommodated at a new satellite campus say in Milton?

Subject: Item 6.2 - own-initiated Official Plan and Zoning By-law Amendments – Four Dwelling Units Per Property and Sheridan College Housing Area

Councillors Knoll and Grant [Ward 5]

The Jan. 22nd meeting was disheartening. Before you are two watershed motions. I had hoped that at least one of you would have raised a concern regarding the College Park

residents and the potential to have homes in their neighbourhoods leveled and converted into 4 Storey Apartments. The concern about short term student living conditions and an absence of concern over the existing families in College Park, Canada Court, Sixth Line and McCraney Street – was surprising and inconsistent with Councils duty of care to the community.

After 41 years in Oakville - this issue is one I must stand up and be counted to be against. My family and many of my friends are in College Park and we have the special designation of being affected by both motions.

You both have an opportunity to stand up for your residents. I hope you will vote for existing families, the 290 families in College Park. And vote no to both motions.

I know the letter attached is long - I hope you read it and look at the photos. However (just in case) a summary is below.

Executive Summary:

- Housing decisions before the Town Council will significantly alter Oakville's landscape and be devastating for College Park families.
- The Federal Funding of \$36MM is the key motivator.
- The Town Staff proposal to convert family homes into four storey student apartments is not part of the \$36MM (Appendix F) and goes against the written statements of the Minister – he writes “we require greater clarity on your actions to increase the amount and density of housing for students within walking distance of Sheridan College. Many students are living in single family homes that surround Sheridan, which could be much better utilized as homes for families.” He clearly states these homes are better utilized for families.
- Consultation Process Concerns: Lack of clarity and transparency in the survey and consultation process as well as failure to provide affected property owners with relevant information undermines the process (see attached illustrations).
- Motion for four-storey apartments near Sheridan College should be removed.
- The Town Staff proposal contradicts the Minister's intentions – he wants family homes to stay with families.
- Shift focus to med- to high-rise solutions on Sheridan College's land, and preserve homes for families.

Vote to support existing Oakville families. The Minister's letter was clear – single family homes are for families.

I am writing to express my strong opposition to the proposed amendments for By-laws 2014-014 and 2009-189, the proposed rezoning of the Sheridan College Housing Area. While the local community may be unable to prevent development, that in itself will be detrimental to the area, the addition of multi-family housing will cause traffic and safety problems, create even more problems with schools that are already over-capacity, and potentially lower the property values of the existing community.

Local neighborhood traffic will disproportionately surge during morning and evening rush hours, causing traffic issues during critical times for all of the affected areas. The traffic surge during morning and afternoon rush hours will also negatively impact safety for children, since students walk to school then.

Schools in the area are already reported at overcapacity requiring portable units for the excess, and the council should not approve multi-family dwellings that creates or exacerbates a this situation.

Property values are likely to go down in the area if multi-family apartments, condominiums or duplexes are built. Multi family dwellings are inconsistent with the neighborhoods developed in the area. The area to be affected has a largely elderly population, and I suspect that the notice of the proposed amendment which was written in quite difficult to understand language will go mostly ignored.

I urge you to disapprove the proposed rezoning, and from recent meetings and discussions with my neighbors, I know my opinions are shared by many who have not managed to attend meeting or write letters and emails.

Thank you for your continued service and support of our communities.

Best regards,

Subject: Densification. Really?: New Release of Towns & Singles in Oakville

Good morning,

I thought I was done with my remarks on the proposed policies regarding rezoning the neighbourhoods around the Sheridan College to 4-story buildings and "4 units as of right" throughout Oakville. (To repeat, I am against the 4-story buildings one because it will force my family to move (somewhere?) given that we do not want to live in the shadow of these buildings, in the dark.) But, I received the email below that produced another question.

One of the policies' ideas is to increase density in Oakville. That's quite strange when we are witnessing at least one new neighbourhood composed of mainly detached homes is being built as we speak.

Please take a look at this plan (even the townhomes are 2 stories tall, not 4 stories):

Is this the densification? How come it is allowed to build brand new detached homes neighbourhoods and at the same time the Town is pushing for converting the established neighbourhoods into 4-story buildings? I think that further comments are unnecessary.

Subject: Sheridan College Housing Area - Special Policy Area
Date: Friday, March 1, 2024 8:36:49 AM

Dear Town of Oakville policy makers,

I am writing to you regarding the proposal for the Sheridan College Housing Area - Special Policy Area. I live in the area where you want to build four-story buildings. I cannot explain deeply enough how hurt I am with your decision to alter my life, the life of my family, and all other families living in this area. Unfortunately, I have experience with town clerks' work like this, where you have already made a decision and the town hall meeting is just to check a box in a procedure. Still, I cannot keep silent and hope that this decision can be changed.

I am hurt and sad and angry. I am sure that none of the Oakville policy makers live in the affected area! I am sure that Sheridan college has enough land to build several high-rises on its greatly underused parking lots! Those high-rises would be enough to accommodate the students attending the College and many more people. Your map with the proposal does not even include building anything on the Sheridan College grounds. Why is that?! But for some reason you want to force the current residents of the area to move. And where exactly did you think to ship us to?! Our children attend White Oaks secondary school. How are you going to accommodate their needs? Or maybe your idea is to offer us one-bedroom apartments to live in from now on? Well, my family has served that term! We used to live in Vancouver, a super expensive place, in a one-bedroom condo with three kids for ten years. We needed more space, so WE moved across the country and came to Oakville.

Why am I telling you this story? Well, if Sheridan College needs more space for whatever reason, Sheridan College should move. There is so much vacant land in the Dundas area - a huge land - you can build anything the College and many more people need. There are also some pockets of vacant land along Trafalgar Road that could be turned into higher buildings. I do not see Goodyear Auto Centre land at the corner of Trafalgar and Upper Middle Road in your plan. As said earlier, there is no plan for reusing the Sheridan's parking lots. How about the Oakville mall (you could re-develop the mall and build residential units above; this is what Vancouver has been doing)? Such a land waste! Also, the mall across the Oakville mall, on the other side of Trafalgar? How about the Town Hall parking lot? How about the mall near the Oakville GO station where Home Depot is located? How about malls on both sides of Trafalgar at Dundas. How about...?

It looks to me that you did not really think about the impact on people living here. You did not think about alternatives. You do not care about the current residents and you've ended up with a plan to hijack our homes! And, ironically, we pay your salaries. You were supposed to work in our interest, and instead you work in the interest of students who are here temporarily. Additionally, the money they spend yearly is much less than what we pay in taxes! I understand that you want to make a more diverse town; why do you think that this proposed area is not diverse already? Take a look at this neighborhood; take a look at the White Oaks school demographics. There is so much land around that you do not want to develop, but would rather destroy what already exists...

You talk about commuting for Sheridan College students. What about it?! My children commute from Oakville to the UofT campus in Downtown Toronto every day. They cannot afford to live near the University. The University Residences are also very expensive. So, they live with their parents and commute.

One more thing; my family is not 'privileged' to be living in a house. We saved money, two people working full time without breaks, and finally were able to buy a house after 25 years! In addition, we had to move to afford a house! It was not easy; it required a lot of planning, trade-offs, new jobs for adults, new schools for children, etc...

You may say that I do not have to sell my house and move, but my alternative is, should your policy go through, to live in the dark, in the shadow of 4-story, 15+m tall buildings. What your policy is offering me is to move out of Oakville (where we have finally settled after 25 years; we just got here!). As a note, when Vancouver started crowding people and passing policies for redevelopment such as this one of yours, many working people moved out of the area.

Thank you for making the time to listen to my family perspective.

Sincerely and disappointedly,

Slavica Golijanin

Nottingham drive

March 8, 2024

Dear Mayor and Town Council,

As residents of Oakville and College Park for over 40 years we want to communicate that we strongly oppose the proposed Sheridan College Housing Area - Special Policy Area official plan amendment outlined in the letter we received from the town dated February 12, 2024.

We are very concerned about the impact these amendments will have on our neighbourhood. These changes risk transforming College Park into a student housing hub while driving families like ours out. Based on the town presentation on March 4th, we could find ourselves living across the street or next to a row of 10 townhouses. Even worse, a 4-story apartment building could be built beside us. Noise, parking, waste, and congestion issues like traffic and construction will make our neighbourhoods unlivable. This is not what residents intended when they spent their hard-earned money to buy their homes, start a family, and build a community.

We trust and truly hope that the town and its council act in the best interest of the current citizens of College Park and DO NOT pass the proposed amendment.

Sincerely,

The image shows two handwritten signatures in blue ink. The signature on the left is 'Ivan Besic' and the signature on the right is 'Zdravka Besic'. Both signatures are written in a cursive, flowing style.

Dear Town Clerk,

This is to communicate that I would like to be notified of the decision made by the Town of Oakville on this matter.

It is extremely concerning that such by-law amendments are being considered to increase density in my neighbourhood of college park. The thought of four storey buildings in my neighbourhood is disappointing. As a life long resident of Oakville and College Park I am certain that these amendments do not benefit me or any other current residents of College Park. In fact, such changes are counter to making Oakville and my neighbourhood more livable. Oakville is special and unique because we have always done what is best for its residents. This has made Oakville one of the best places to live in Canada for years. These changes are clearly not in the best interest of its residents.

I trust and truly hope that the town and its representatives act in the best interest of its current citizens and DO NOT pass the proposes amendments.

Thank you

Subject: Save College Park
Date: Sunday, March 10, 2024 12:34:13 AM

Hello,

I wish to voice my strong opposition to the Sheridan housing area-Special policy area development. I have been a resident of the College Park area for 35 years. I am a senior citizen that was planning to live in my home for my retirement years. If I had to move out of my home at this stage of my life it would create a great hardship. During the town council meeting on March 4, the councillors asked the town planner two questions. Can the town guarantee that the developers will rent units to Sheridan students? Also can the town place a cap on the rent charged on rental units? In both cases the answer was no. If you have no control over what the developers are doing why are you doing this? There was an article in the CBC news on March 5, 2024 that said affordable housing was being purchased in B.C. by people who already owned homes in some cases worth millions. I feel that the zoning changes in College Park are just being done for the benefit of the wealthy land developers at the expense of the residents of College Park who worked hard to purchase their homes. There must be some better alternatives for this development. Why not locate the development on vacant land north of Dundas or around the Go Stations. Sheridan College could create a

satellite campus in Milton. I urge you to oppose this proposal.
Please enter my correspondence into the record.

Thank you,

Theresa Efendov

TO: The Mayor, Town Councillors and Town Planners,

I am forwarding to you a e-mail I sent to Dave Gittings after the March 4, 2024 Town Hall virtual meeting on the issue of new zoning by-laws for the 4-unit, 4-storey apartment buildings (C1 zoning policy) and 3-storey Townhouse in the 800 metre zone Special Policy area created by the Town for gentle densification.

I am reiterating and attesting to the fact that none of the residents on my street, other than the Town Councillor, were aware of this proposed by-law change and the question and answer meeting, that took place in January, 2024. After we received notification - 2 weeks before a slated virtual meeting for March 4 - did some of the residents on my street come together to talk about how this by-law and its fallout were going to affect us. I submitted a list of questions that I wanted to pose to the Council and Planners, and more importantly, have them put on record as well.

Our serious and immediate concerns about this proposed by-law change has to do with development of the green space directly behind our backyard fences. We have an apartment building owned by CAPREIT that is located south of our properties. The green space created for these apartment dwellers was sited for development by CAPREIT about six years ago, and the homeowners opposed the plan. As homeowners backing on to this green space, we are very concerned that the C1 zoning by-laws in addition to the new zoning by-laws will encroach on our rights as home owners. Not only will it affect our real estate values, it will block sunlight and cause the uprooting of valuable trees that were grown specifically to create a natural form of privacy between homeowners and apartment dwellers. Residents from that apartment building as well as homeowners use the green space all the time. In fact, families have used the gentle slope in this space, to introduce their young children to tobogganing, in the winter.

We are totally opposed to having this green space modified for commercial/residential use. It will do nothing to benefit the lives of those tax payers who have lived in this area for years. We are well aware that the zoning by-laws (C1 as well), will allow developers to tear down and build new 4-floor apartment buildings or 3-storey townhouses in the 800 metre zoned area. Gentle densification will definitely contribute to more cars and trucks in the neighbourhood, noise, safety and security issues, etc. As well, what about the rights of apartment dwellers? Or is that just the purview of CAPREIT?

The Town Planners need to keep in mind that while walking to the GO station (45 minutes from my home) may have been one of the reasons they identified the 800 metre radius for 'gentle densification', our weather is not conducive to walking to the GO station. Even waiting for a bus on Trafalgar Road on an extremely cold, hot, rainy or muggy day, isn't fun. Our huge town buses run practically empty all the time. Has there been an uptick in bus use from the new housing development in North Oakville - north of Dundas (both east and west)?

As well, Sheridan College had applied to become a University, is this plan still in the works? If the college (university ?) does not plan to create suitable housing for this planned 'new' university population on their campus, are they hoping that residents in the neighbourhood will create 'affordable' housing for same? University/College student housing has created a nightmare for residents in Brampton. Are homeowners in the Sheridan College area expected to deal with similar issues because 'gentle densification' is mandatory?

As a homeowner in this 800 metre gentle densification zone, should anyone decide to create 4-unit rental properties, I can assure you that fair market rents will prevail.

What about all the parking space around Sheridan College or Oakville Place? Post-COVID, shopping at malls has declined. Has the owner of Oakville Place been apprised of the new zoning by-law changes? What about all the parking space around the Town of Oakville buildings? Shouldn't this land be considered fair game for 'gentle densification'? What purpose does it serve, other than for parking about 20 cars every day?

A very salient question was asked at the virtual Town Hall meeting on March 4....."would any of the town councillors approve this 'gentle densification' involving commercial and residential housing in their personal neighbourhoods?" I never heard a response.....wonder why?

I am attaching my questions that I posed at the March 4 virtual meeting as a reminder, for you to answer. Friends of mine who were listening to the meeting, applauded me for asking them as they were fair and reasonable.

In closing, I ask you a very valid question for serious consideration.....'understanding that the Federal Government has committed funding (infrastructure needs) to spearhead the by-law change to 'gently densify' the Town of Oakville, how does 'gentle densification' benefit existing homeowners?'

Thank you.

To: David Gittings

<david.gittings@oakville.ca<mailto:david.gittings@oakville.ca>>

Hi Dave,

Richard and I found out on Wednesday, Feb. 28 (viewed online Town Council January meeting) that a question and answer session had taken place on this subject. Sadly, we had no knowledge of the subject and only realized how it affected us after I contacted Brad at the Town. As well, neighbours on the street contacted us for comment. Some were angry, some bewildered and some asked 'why'?

We realize now that a lot of water has passed under this 'proposed 800 metre by-law policy change' bridge. We are concerned that this is a 'fait accompli' project and our questions and concerns are just that.... merely ours. I wanted to leave questions for the Council and Town Planners to address as I feel our (residents on the street and neighbourhood) concerns should be heard. Some of the presentations at the Monday night meeting had a lot of very good and thoughtful insights. While some residents approved the idea of changing the by-law to allow for the creation of 4-unit homes, others clearly didn't. The residents in my neighbourhood, do not agree that our homes should be targeted as potential 'gentle densification' units. Much to our chagrin, we've had students renting rooms in homes on our street and it wasn't a pleasant experience.

Sheridan College in concert with the Provincial government should be responsible for creating appropriate housing for students. There is ample property to create housing for first year and post-grad students. They could even create co-op housing. A good example of student housing that has gone completely haywire, is the crisis unfolding in Brampton. Not only have the real estate agents capitalized on this crisis, the private colleges have as well. The situation has created nightmares for residents in Brampton and the Town Council was forced to make some tough decisions on behalf of its residents. The crisis could have been mitigated with proper and thoughtful regulations from the outset. For residents living around Sheridan College, this is a very real concern. We do not want to contend with 'flop houses' or rooming houses on our streets. These types of housing come with a whole host of issues that home owners do not want. As well, a non-resident home owner contributes nothing to the Town coffers, other than property taxes.

If the Town of Oakville doesn't plan accordingly, we could be facing the same issues that Brampton is facing currently. That said, if student housing isn't the main driving force behind this by-law change, it should be made abundantly clear to all new residents to the Town of Oakville that the 'gentle densification' plans involving homes in the 800 metre zone does not mean that rent controls will apply. I kept hearing the use of 'affordable housing' by younger delegates. New residents to the Town need to know that fair market rents will apply.

Yes, I would like to have a conversation with you about 'concerns' I addressed in the form of questions I posed, at the Town meeting on Monday evening.

Thank you! I will email you to set up a suitable 'conversation' time.

Vanda

Subject: NO to 4-storey Apartment buildings.
Date: Wednesday, March 13, 2024 4:32:44 PM

I am writing to you to state that I am saying **No to 4-Storey Apartment Buildings** in existing single detached home neighborhoods around Sheridan College. I have lived in Oakville for over 40 years! I have raised 2 children here, worked here, and volunteered here.

Mr. Knoll, when you were interviewed by InsideHalton news before the last municipal election, you stated “*Oakville must ensure new development respects **existing neighborhoods** and our official plan*”.

THIS DOES NOT RESPECT MY EXISTING NEIGHBOURHOOD!

This Special Policy for College Park will directly impact my family, my neighbours and will destroy the character of our **existing neighbourhood**.

Keep you promise!

Sincerely,
Helen Pastoric

Subject: "NO" -- Four Dwelling Units and Sheridan College Housing Area Proposals
Date: Wednesday, March 27, 2024 8:54:06 AM

Dear Councillors/Mayor/Town Clerk

My name is Vivek Asrani and I am a resident of college park for the last 12 years. I strongly object the densification of college park (condos around Sheridan or converting detached home to 4 family units)

This is exactly the thought that gives me nightmares from actual experience. My Neighbour had 8 Air B&b tenant with 6 cars on their driveway. They used to park multiple cars on the boulevard, on the grass and drive over my grass and property and park on the street on weekdays all the time, blatantly ignoring by- laws. This was utter nuisance and I had file multiple complains to the town which was ultimately resolved.

There is already unbearable congestion going down trafalgar and this will add to travel time just reaching the Go station.

Oakville will become a thing of the past with added congestion and properties being acquired and converted by absentee landlords. We will deal with all the above problems. What we witnessed with this property as well as with others being exclusively used for student housing is that maintenance on the property went down, grass isn't cut, sidewalk aren't shovelled, cars illegally parked on the median as well as on the road in a no parking area and garbage piled up at the side of the house .

If four storey low rise apartments is the direction this Town would like to take, then, it should seriously look to new building permits to include provision for added residential floors to proposed strip malls, retail spaces and commercial sites. There is undeveloped land still available for achieving these housing goals. That is where the Town should be looking to making changes NOT retrofitting existing 40 year old, established single family housing neighbourhoods.

With respect to the rezoning changes to the Livable Oakville Plan proposal; I find it interesting that this proposal again targets only

specific neighbourhoods while steering clear of others with much larger and more accommodating lot sizes, i.e. South Oakville. To my eyes, this appears as a two tier representation of the interests of the residents of Oakville: if you reside in South Oakville, you and your properties are sacrosanct. If you reside elsewhere in this Town, your interests and residential homes are fair game. The message becomes very clear, our elected officials work at protecting the interests of the wealthiest homeowners among us.

For reasons outlined above in my statement, I do not support this proposal.

Not our vision of a Liveable Oakville.

Considering all the information from above, **we urge all councillors to vote against** the unnecessary proposal of allowing “four Storey buildings” within the Sheridan College area, or anywhere that is inconsistent with the existing community.

Sincerely

Vivek Asrani

Town Clerk, Clerk's Dept.
Town of Oakville
1225 Trafalgar Rd.
Oakville, ON
L6H 0H3.

To Whom It May Concern,

Thank you for the recent letter regarding the Proposed Official Plan & Zoning Bylaw Amendments, especially the Sheidan College Housing Area.

I certainly am not in favor of the amendments that allow "Four Dwelling Units / Detached Residential Properties". It is illogical to state that such changes do not influence density & all that those changes can entail - impact of property values, hood systems & traffic, noise, etc. No mention is made of the effect on property tax, demand for additional green space & recreational services, medical access, etc. It definitely could affect neighborhood density!!

Re: the Sheidan College Housing Area proposal:
I would like it noted that I would have the ability to appeal the Town's decision as I live on the boundary of the designated area (specifically 6th Line & Upper Middle). Traffic flow on 6th Line is already significant at times & Upper Middle is already used to bypass Dundas.

Subject: FW: Town-wide and Sheridan College Housing Area Special Policy AreaTown-initiated - Opposition Notice

Re: Statutory public Meeting for Proposed Official Plan and Zoning By-law Amendments
Town-wide and Sheridan College Housing Area Special Policy Area Town-Initiated

Marc & Jeff,

As Town Councillor's for Ward 5, I am sending you my opposition notice to what is being proposed for the College Park area.

I received the Statutory Public Meeting for Proposed Official Plan and Zoning by-law Amendments in the mail on February 14, 2024 post marked February 12, 2024, of the scheduled public meeting which is to be held on Monday March 4, 2024 at 6:30 pm. This meeting to be hosted by the Planning and Development Council to discuss the above titled subject. I ask that my position herein be tabled to such committee and that it be read into record. Please advise at your earliest, if I have not followed the necessary or correct procedural path to voice my opposition to these amendments and that it has been duly noted on record.

I moved into the "College Park" area on Parklane Road 13 years ago. I was drawn to the amount of green space with interconnecting trails in this area. My area was also a very short drive up Trafalgar Road, past Dundas to a wonderful country setting. I understand the need for additional housing but the density has already been dramatically affected in this area with high rise apartment buildings and high density housing along Trafalgar and Dundas. I view the area as being family oriented and over the years it has harmoniously co-existed with Sheridan College and the attending students. We have experienced some non-property affiliated parking issues on the street which is due to the close proximity to the Sheridan campus and the obvious attempt to avoid the high campus parking fees. Over the years there has been a gradual increase in non-resident property ownership and room

rentals throughout our neighbourhood. Some homes have been rented with 7 or 8 students sharing the costs or a basement has been rented. This has led to issues concerning pride of ownership, a lack of yard maintenance and garbage proliferation on waste collection days. Generally the neighbourhood has stood the test of time and has maintained its worth and pleasant appearance, however, with the changes being proposed by the Town, I cannot assume that this will continue.

In reviewing what has been presented by the Oakville City planning department on the above titled subject, I consider it to be an incomplete presentation, lacking in documentation, pertinent analysis and therefore totally inadequate for a neighbourhood and the Town as a whole to reach any consensus regarding opposition or otherwise. It appears that part of the proposed amendments, specifically targets my neighbourhood as the "Sheridan College Housing Area Special Policy Area". This section of the proposed amendments has to be treated as an outright penalization to my neighbourhood as it truly lacks any credible rational or social and financial impact analysis. Proposing additional densification over and above the town-wide section of the amendments can only be taken as being punitive. This deviation from all other areas and targeting of my area has my vehement opposition.

My take on this "Special Policy Area" amendment is to allow random single dwelling house modifications so as to increase the low rental availability to students. I see no discussion that these multiple units would be treated as apartment buildings and therefore are to be treated as multiple level transient rental units. I also have to speculate that Developers will look at this and the cheaper the construction the lower the rental rates. This specific targeting of the College Park neighbourhood to allow these randomly placed four storey apartment buildings, is not supported by any planning analysis or controls which is not acceptable.

If this density increase is being undertaken under the assumption that there is a college accommodation problem, then the following questions arise:

- Is there any justification or analysis that has been used to come to this conclusion?
- Does Sheridan College need to expand? If so, where and when? How significant of an expansion?
- Does Sheridan College have issues with demand and providing a supply of accommodation for students?
- Has Sheridan College tried to solve any existing problem within its mandate? Or within the provincial mandate?
- If expansion is the issue, then how are they proposing to solve the problem? Has the Planning and Development Council pursued such with the College and are you willing to share that correspondence?
- Has Sheridan College raised any application with the Town concerning its vast under-utilized land holdings to address any student housing demand issues?
- Is the 800 meter distance limit so established for Sheridan College students due to the physical limitations of the students to go beyond this distance therefore needing the higher concentration/density of accommodations in the College Park area? Oakville Place shopping centre is 1200 meters away but Sheridan students have been frequenting this Mall without any issue for many years. Walmart is a little further away but I see a steady stream of students making the easy journey there and back for groceries.

Important Issues Not Addressed:

1. Is the federal government dollars and the value/amount linked exclusively to having the Sheridan College Special Policy Area proposal created?
2. Would the Town-wide amendment be sufficient to address the college needs without the incorporation of the "Special Policy Area" into the amendment proposal? Who determined the proposed boundaries and the rationale for setting them up? There is already high density housing being constructed just north of Dundas, why can't some of these units be subsidized and turned into rental housing for students?
3. Has Sheridan College been asked if removing the "College Park Special Policy Area" amendment will impact their plans and how?
4. The students have access to excellent bus and GO train service in Oakville as do other Universities and Colleges within Ontario. Would any of these Universities in Southern Ontario support or agree to what is being proposed with these changes?
5. Does the Minister view the "College Park Special Policy Area" as the only area in the Town of Oakville that meets his criteria? Or is this a targeted experiment to see how Municipalities can meet these theoretical targets to densify urban centres throughout the country?
6. There are no 4 storey structures in the current neighbourhood. The Town's building department currently reviews applications concerning individual variance's concerning height restrictions. Why is this process being alleviated in our targeted area? How can they totally disregard the impact to adjacent properties?

What are the concessions to the current home owners in this area? Your proposal suggests turning an area of single family dwellings into 4 storey apartment transient dwellings. These should be taxed as apartments and definitely count in density in the area. I am very concerned that the \$25 million will not cover upgrading the existing infrastructure of sewers, water, gas and electrical services to support the densification in the "Special Policy Area." Has the Planning Council taken this into consideration? Will this end up as future tax hikes directly associated with this proposed amendment? We are a very close knit community and would like to continue knowing our neighbours, and collaborating on our neighbourhood watch and still have the children play hockey and basketball on our streets, while maintaining our green spaces. What you are proposing will negatively impact our neighbourhood.

Based on the obvious targeting of the College Park neighbourhood and the lack of explanation, or any comprehensive economical evaluation, impact analysis or demand analysis and the lack of a consultative process with the community directly impacted, I must strongly object to these amendments moving forward and passing.

Why 4 As Of Right Might Help

By a couple of young people

Meet Cullen

- Moved to Oakville in 2021 to continue schooling in person after Covid-19
- Has graduated from Sheridan College in April 2023
- Currently still lives in Oakville
- Pays \$394 for rent
- Sounds pretty reasonable

This is the size of his room

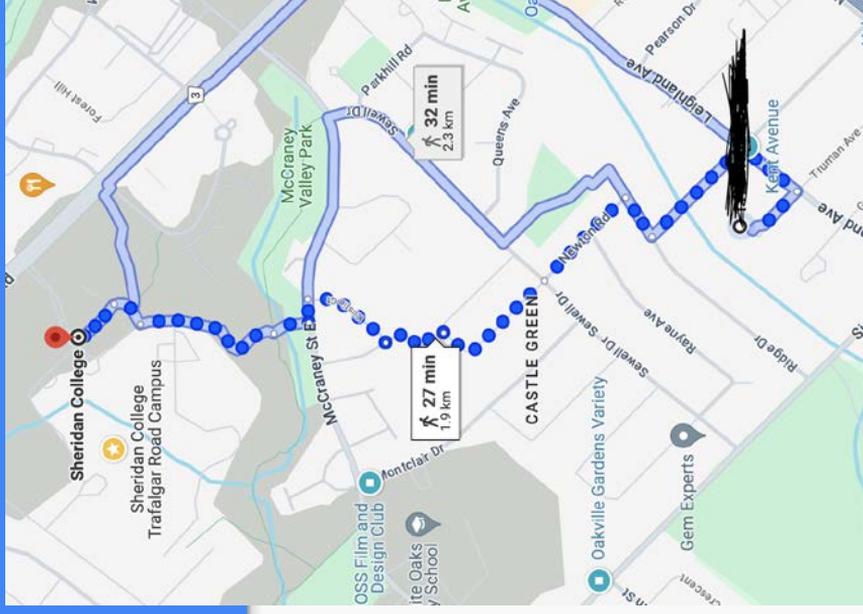

His Room...

- About 8 by 12 feet.
- He splits the rent of the full room of \$788 between his partner
- In addition, he shares the home with 4 other roommates

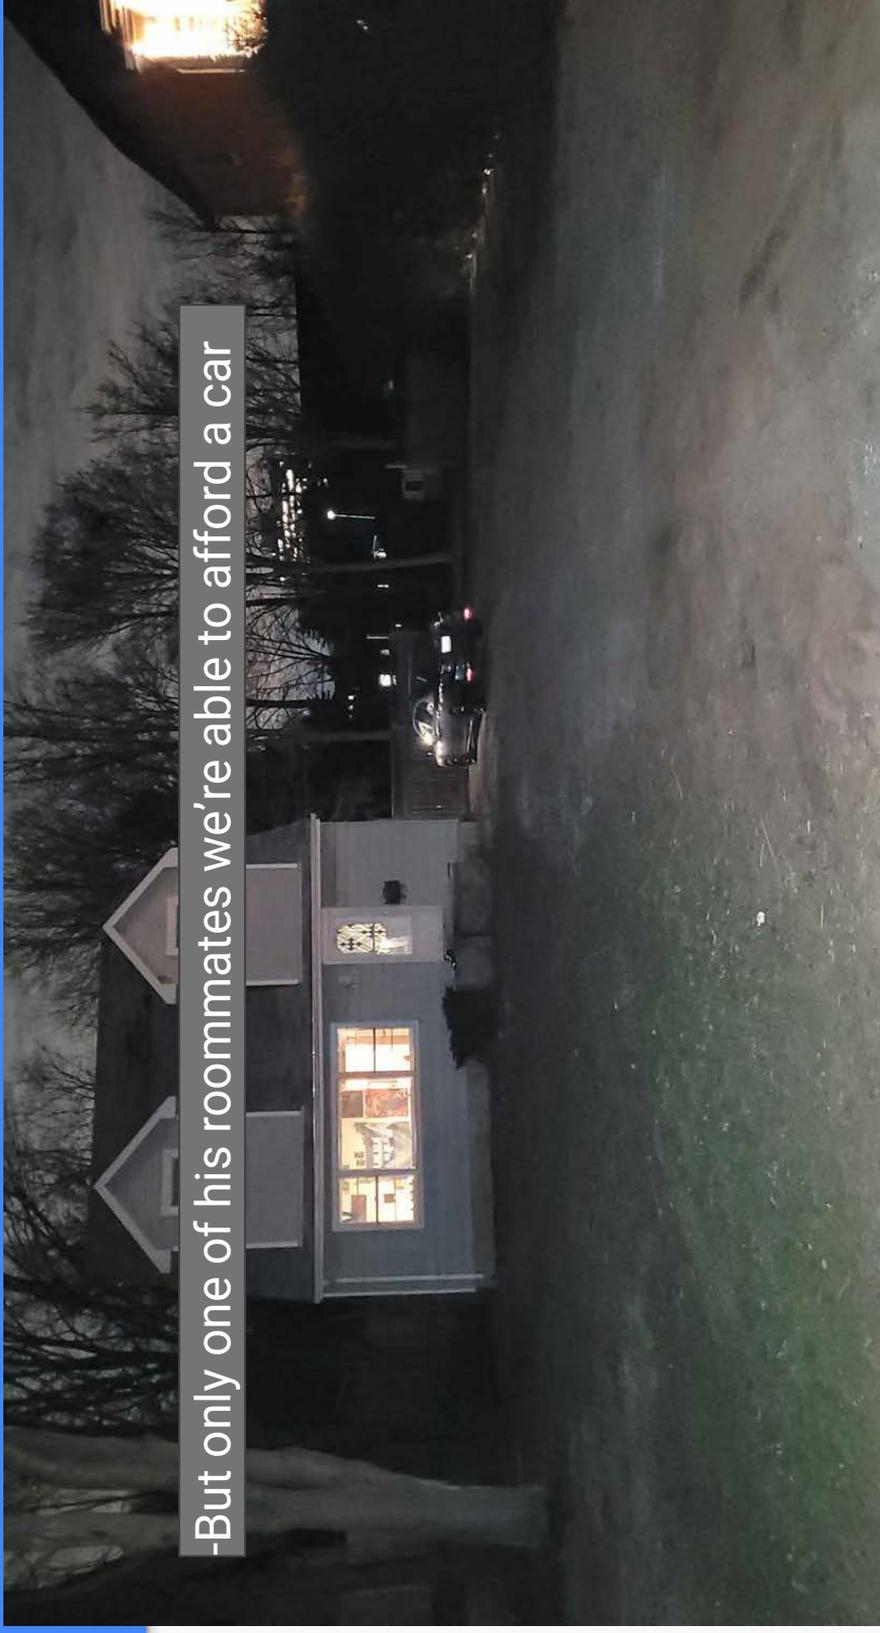

This is the size of his only sink he shares between everyone else in the house

It's a 30 minute walk from Sheridan College

But it does have space for 6 parking spots

-But only one of his roommates we're able to afford a car

We're asking for more variety

- 4 As Of Right could be the right step to give Cullen and many of our friends a livable Oakville. To maintain an affordable life he had to downgrade to a lower quality of life.
- Give students a reason to stay in Oakville.
- Because right now unfortunately, the reasons are few and far between.
- Let's make a new reason.
- Vote yes!

SHERIDAN HOUSING AREA – SPECIAL POLICY AREA

Statutory Public Meeting Item 6.2 March 4
2024

College Park resident response

College Park

- Many residents living in this community for decades. Pay taxes, law abiding , safe community
- Family oriented. Detached homes
- Some homes have rental units already housing students and others
- Parking is not permitted on streets during the week and 3 hour limit at other times.
- Traffic is not an issue currently however with traffic increasing on Upper Middle road access in and out of College park is affected
- College Park is a close knit community we know each other and we care for one another. We work, we play we enjoy our neighbourhood and we contribute to a “Liveable” Oakville.

College Park Impact Statement

- We recognize the housing crisis we are in. International students need housing.
- Already have several houses in College Park with units being rented now. ie basement apartments and rental units...BUT
- We are NOT in favour of the “Special Policy Area” to include our specific neighbourhood to allow for *Large MDU and FOUR storey buildings.
- Essentially removing detached homes to construct Large MDU and FOUR storey buildings right next to homes **WILL**; Drastically alter the living environment we have worked hard to build in our neighbourhood. Home environment, privacy and safety, parking and critical traffic flow (emergency response), noise, extraneous lighting, privacy concerns, property valuation, and environmental concerns (canopy removal, drainage etc), construction mayhem
- This is NOT “Liveable Oakville”

* Refers to multi-storey or four story MDU complexes. These structures are larger than those outlined in the Online Survey ie. Multi-storey MDU buildings (beyond those detailed in the Online Survey)

Alternatives and Requests

- There appears to be plenty of land right on Sheridan campus property and other city owned land or commercial land which should be considered to construct larger structures to house students
- The College Park residents are requesting that the portion which includes Large MDU and FOUR storey structures to be not permitted in College Park residential areas where detached homes currently exist.
- Again we recognize the urgent need for housing but allowing FOUR storey buildings and larger MDU in place of current detached homes is not something that can be justified in our neighbourhood.

Subject: Questions for your attention with regards to Townwide and Sheridan College Housing Area Special Policy Area 42.15.62 and 42.15.63

Dear Councillors Grant and Knoll,

I attended the virtual Town planning meeting on Monday on the Town's YouTube channel, it was very informative. As a resident of the suggested 800 meter area surrounding Sheridan, I am joining my neighbours in opposing this proposal.

I do however look to you both directly for some clarifications with regards to what I think I heard at Mondays meeting, namely:

1. The expected money eligible from the Federal Government is \$25M or \$36M? Please confirm. Also, as I understand it, while criteria to receive the funding must include increased density within 800 meters of Sheridan, the Town can use its discretion as to where this funding goes, is that correct?

2. Has the Town met with Sheridan about increasing the number of residential units directly on Sheridan property? Has Sheridan applied for any building permits to facilitate the building of more residence units on their property? If the property owner has no requirement to rent out a single dwelling unit to a Sheridan student, then how does this proposed bylaw increase student housing for Sheridan? Only units on Sheridan property and within their control can guarantee rooms for Sheridan students.

(As we heard on Monday, there seems to be a number of university/college graduates looking to move back to Oakville to reside full time. I would sooner rent to a full time working person than a student if I decided to build a multiple single dwelling unit building on my property)

3. These proposed Single dwelling units - whether they be three or four per lot, please advise the maximum number of inhabitants per single dwelling unit will be allowed in the bylaw, and how will the Town police this bylaw? There are drawings of what the exterior of these proposed units will

look like, has the Town had layouts drawn as examples of what these single dwelling units look like? Obviously the number of inhabitants per single dwelling unit is of critical importance in trying to determine the Return on Investment of such an investment, either by a developer or homeowner.

4. How will the town levy taxes to the owner of these said units? Will I pay the same tax I currently pay on my current property or will this increase the taxes per property as a result?

5. The Federal funding is predicated on both bylaw amendments passing, is this correct? As I understand it, there have been zero applications to build a three single dwelling unit since that law passed, my question is, if the Federal funding is provided if the bylaws are adopted, is there a requirement for the Town to have residents or developers actually build said units in a particular timeframe or forfeit the funding? I would expect there would be some caveats in the funding with regards to actual results. What are those caveats?

Thank you for your time and attention to my questions, I look forward to hearing from you with your answers.

Subject: Please vote "NO" -- Four Dwelling Units and Sheridan College Housing Area Proposals
Date: Friday, March 22, 2024 3:33:19 PM

Dear Mayor Burton:

You Have the Ability to put a STOP to These Proposals by Voting "NO"

How did the hard working 'blood, sweat and tears' of the many of us that toiled for decades to finally afford these family homes, in what we thought were safe and secure family oriented neighbourhoods, become the victims of such thoughtless, rash decision making political actions that would see our existing single family dwellings just **unilaterally** and **arbitrarily** pulled out from under us by the Federal Liberals, the Provincial PC's as well as our local Town of Oakville Executive? These neighbourhoods have existed for many decades; were represented to prospective buyers as single family dwellings and promoted by Builders and the Town as desirable places to live and raise a family. Single Family Homes must be kept for families!

No one can deny that the multitude of voices being raised **are not in favour** of these proposals. Therefore, why would this Executive body choose to ignore these voices?

It is fully within your ability to Vote "NO" and to remove these Proposals from the Table!

Will you stand true to the platform upon which you ran for the office you currently hold and defend the core values which you espoused, and, ultimately make the only right and just decision?

Respectfully,

Ann Ferraro

Subject: Concerns Regarding Proposed Amendments to Official Plan and Zoning By-law- Four Dwelling Units Per Detached Residential Property

To whom it may concern,

I am writing to express my deep concerns regarding the proposed amendments to the Official Plan and Zoning By-law, specifically regarding the allowance of four dwelling units per detached residential property.

As a member of the community, I believe it's crucial to consider the long-term implications of such amendments on our neighborhood's quality of life. While the intention may be to increase housing opportunities, I fear that the proposed changes will have several detrimental effects on our community.

Firstly, adding four dwelling units per property will lead to a significant increase in population density. This rapid population growth will strain our existing infrastructure, including transportation, schools, and healthcare facilities, ultimately diminishing the quality of life for current residents.

Moreover, the focus on providing housing primarily for students raises concerns about the transient nature of the new residents. This influx of temporary occupants may disrupt the sense of community and neighborly trust that currently defines our neighborhood.

Additionally, the increased turnover of residents could lead to a lack of investment in maintaining properties, further

deteriorating the overall aesthetic appeal of our area.

Furthermore, the environmental impact of these amendments cannot be ignored. Clearing land for additional dwelling units will result in the loss of green spaces and mature trees, exacerbating issues related to air quality and urban heat island effect. Moreover, the anticipated rise in vehicular traffic will contribute to pollution and noise, diminishing the tranquility of our neighborhood.

In considering the long-term financial implications, it's essential to recognize that catering primarily to student housing may not attract the affluent homeowners needed to sustain property values. Instead, the influx of transient residents could lead to a decrease in property values over time, as the neighborhood becomes perceived as less desirable due to overcrowding and associated issues.

In addition to these concerns, I would like to highlight several other potential issues that could arise from the proposed amendments:

1. **Strain on Public Services:** The increased population density could overload public services such as waste management, emergency response, and utilities, leading to longer wait times and decreased service quality for residents.
2. **Parking Shortages:** With more dwelling units per property, there may be a shortage of parking spaces, leading to congestion on residential streets and difficulty finding parking for both residents and visitors.
3. **Loss of Privacy:** Additional dwelling units could lead to a loss of privacy for existing residents, as more people occupy the same amount of space, potentially impacting sightlines, noise levels, and overall sense of security.
4. **Impact on Schools:** An influx of new residents, especially students, could put strain on local schools, leading to overcrowded classrooms and decreased educational resources for students.
5. **Decreased Sense of Community:** The transient nature of student housing may result in a decreased sense of community cohesion, as residents come and go frequently without establishing long-term connections with their neighbors.
6. **Potential for Overdevelopment:** Allowing four dwelling units per property may open the door to overdevelopment and speculative real estate practices, leading to the degradation of the neighborhood's character and charm.
7. **Legal and Regulatory Challenges:** Implementing such significant changes to zoning regulations may pose legal and regulatory challenges, potentially leading to conflicts and litigation within the community.
8. **Impact on Property Taxes:** A change in the demographic makeup of the neighborhood, particularly if it leads to a decrease in property values, could impact property tax revenues for the municipality, affecting funding for essential services and infrastructure projects.

These comprehensive concerns highlight the need for careful consideration and thorough community engagement before moving forward with the proposed amendments. I appreciate your attention to these matters and look forward to further discussions on how we can address these issues together.

Thank you for taking the time to address these concerns.

Subject: 4 as of right
Good morning Councillor,

I wanted to reach out regarding the upcoming vote on 4 as of right. I believe allowing 4 units would be a huge benefit in reducing the housing shortage and alleviating the housing crisis we are currently seeing in Oakville and throughout the province as well.

I'm a renter ,and because of the housing availability shortage my rent has been rising steadily. More than half my paycheck goes to rent and I believe increasing housing availability (by voting for and allowing 4as of right) would go a long way towards making the basic need of housing more affordable for Oakville residents.

A lot of neighbouring municipalities have also passed 4 as of right and we would be keeping up with the region in taking measures to reduce the housing crisis in Oakville. I hope you will vote for allowing this!

Thank you,
Sanya

Attachments: [image.png](#)
[image.png](#)

Dear Mayor Burton,

I have written to you along with many other residents in the Special Housing Area of Sheridan College many times in these past weeks. The by-law amendment proposal for rezoning my neighbourhood from RL5 (detached) "AAA" to RM1 Regs for townhouses is upsetting to me. Why, because who in their right mind takes a viable, safe and quiet neighbourhood and destroys it. This does not make a viable option when addressing affordable housing.

This image clearly shows what any street in the "Special Area" could look like in the future. Some of council have responded that we are over reacting to our statements of being targeted and threatened by the proposal from March 8. Their point of view is it will take years to accomplish. I am explaining to you that these real threats by the Oakville Planning Department to us who live in College Park. When you review the image below you will understand our point of view and the anxiety that it causes.

I am pointing out the images presented for the proposed changes. As can be seen in the image above, the area shown can be viewed as College Park with the existing 291 homes. The wiping out of many of them is presented clearly. When viewing the image with the bottom being Sheridan College and the top of the image is to the north bordered by Upper Middle Road. Place yourself in our shoes. Why wouldn't we feel threatened and have despair? The attitude and the silence by many on town council is disturbing. Ignoring our emails and pleas leads us to the conclusion that those on council have an unknown agenda or worse, are willing to sacrifice an area of town to gain of HAF monies. The attempt to label us with NIMBY has been successful in demonizing those who oppose the proposal. Again another sense of being targeted and feeling helpless. We are not against the need for higher density housing and affordable housing. Not at all.

Our area was designed and accepted by the town of Oakville in the early 1980's. My home was built in 1986. It's a little late to come to the conclusion that it was a mistake and the town needs to fix it. If it is not broken, do not fix it. This is a wonderful place inside the great town of Oakville where we raised our family. It is not one of the more expensive areas to purchase. There are many other areas that are far more costly to buy. We do have younger families living here, with their children playing outside. That will all change with the middle to higher density proposal. Especially if it is for transient residents who are young adults seeking student residential housing. It would be irreversible and detrimental.

I am requesting an in person meeting prior to the May 6th meeting and vote for all of the residents who are in the Sheridan College Special Area. Communication is key and enable us to hear from you and to be heard ourselves. If there is misinformation which leads to fear and anger then please explain to us the reasoning. Simply stating that other levels of government require 800M walking distance is not good enough. I have written to you before and do not need to repeat myself regarding this issue. Bring us along in your understanding from all points of view. Please have mercy on us.

If you wish to contact me, please feel free. My wife Cheryl and I would love to meet with you.

I do respect the challenges that the town of Oakville is facing. I do respect the enormous task before you.

Thank you for your time,

Mark Baber. Queensbury Crescent.

Subject: Vote no to the proposed 800 metre Sheridan special zoning
Date: Thursday, April 4, 2024 5:43:50 PM

Dear Councillor McNeice,

We urge you to Vote No to the special zoning motion around Sheridan College.

It was not unexpected that not one councillor offered up their neighbourhood for this bylaw at the Mayv4 meeting. In fact, it was a wise decision by each of you.

We ask how tearing down homes in a vibrant, safe, family oriented neighbourhood, complete with new splash pad and play equipment courtesy of the Town, makes planning sense. The many young families who have moved in seem to agree that this area is pretty wonderful. They deserve to have the same great experience as earlier residents had.

If the zoning was a mistake (over 35 years ago), we put it to you that it was a fortuitous one for the town. Our homes have created a buffer to the creation of a student ghetto as has occurred in Brampton. The town does not have to work to put the genie back in bottle because our neighbourhood refuses to let it out.

We've heard that we shouldn't worry because it won't happen. The optics are that the town is making decisions that have no basis. We ask how taking now and future decision making power away from Council makes for good planning. Individual applications can be considered on their merits at the time of application.

There are many answers to student's housing issues that do not include destroying a neighbourhood. The ratepayers have many good ideas. We want to make sure that a Brampton doesn't happen while addressing an issue that Sheridan College has not since 2009. Sheridan must come to the table to tell the Town and its ratepayers how it is planning to solve its problem, especially in light of the low cost loans which the Federal Government is offering in the fall. The plans are approved and the money is there. It's time for the College to step up to the plate and build. This is good planning coming together.

We are not NIMBYs. We back onto Sheridan College.

We look forward to Council keeping all of Oakville a great place to live.

Myra and John Willis
Parklane Road.

Subject: Please vote against Four Story Buildings in inconsistent neighbourhoods

Councillor McNeice,

Since my colleagues and I have not heard back from you regarding your stance on the vote to accept or decline the proposals for “4 as of right” and “four Storey buildings” in the Sheridan College area, I wanted to contact you individually from the other councillors.

While I am not totally against these ideas for increasing housing units to help with the current shortage, I am strongly against them being applied to a fictitious “Sheridan College Housing area”. This is not about NIMBYism but about making drastic, irreversible changes to the fabric of already established communities, completely incompatible with such proposed changes.

Appealing to your strong background in urban planning and design, it’s clear that the College Park residential neighbourhood, which was planned, developed, built and sold over 40 years ago, was never intended for such use. The nature of the plan is not appropriate for additional facilities that would be required to support infrastructure, parking or “transient” residents, such as a dominantly student population.

Aside from the need to avoid demolition of well maintained, family-oriented homes of long time, tax-paying residents with multi level, multi dwelling units as a short-sighted solution, there are other options to increase housing density without requiring any additional property.

I have explained some of these options in previous emails but the most obvious ones are building residential units above existing commercial buildings and engaging Sheridan College to be accountable for providing additional student residences, using the vast space available within their current property.

I’d be happy to meet with you in person to discuss these issues and I do implore you to vote against this reckless proposal, without the analysis and long term perspective that good urban planning demands.

Thanks, Ron Bell

.....
Planning Team - still awaiting a reply and anticipating you are interested in considering other options to the housing density issue (and HAF application) than the current proposal that will severely damage the nature of existing, 40 year old, established neighbourhoods.

Glad you are open to input from the public - we are all in it together.

(Clerk, please ensure this email is included in the Town records).

Thanks, Ron

Subject: Requesting Reply to Four Storey Buildings alternative

Dear Mr. Sunderland and colleagues,

I'm following up on an email I sent on Mar 21 that may have been overlooked. The intention of this email was to raise awareness of alternatives to "Four Storey Buildings" for increasing densification around Sheridan College, in hopes of revising the Action Plan for the Town's HAF application.

For brevity, I've included an excerpt below, regarding using the proposed C1 revisions to allow up to 3 storey residential units on top of existing commercial buildings.

As referenced in the email, we have developed a parameter driven spreadsheet (attached) to demonstrate different scenarios and validate our estimate that

this solution could provide up to 400 one and two bedroom residential units, just within the Sheridan College area!

Based on the basic HAF funding formula, this would be eligible for over \$8M and much better solution than the Four Storey Buildings proposal, which is extremely detrimental to the existing, established community in the Sheridan College area.

We're hoping you would provide a response to this information and would be willing to meet to discuss in more detail.

Thanks for your consideration,

Ron Bell, Peter Wei and Gopi Pillai

Oakville Residents, Wards 5 and 6

=====

Excerpt from Mar 21 email:

Subject: Sheridan College Zone and Four Storey Buildings in Existing Community – ALTERNATIVES

- ...
- Using the C1 provision already proposed in the current Action Plan to allow 3 storey **residential builds above commercial properties; town-wide.**
- As a starting point... to address the initial request of density in the Sheridan area...

Building Residential on Commercial (Sheridan College area)

- With a small working group, as an example, we identified **7 locations within 800m of Sheridan College** (or slightly outside that radius) that could be suitable for this alternative.
- For these potential locations, we determined square meters of the commercial building footprint and using an 80% utilization, with 3 storeys above the existing commercial site and a mix of 1-bedroom and 2-bedroom units, **we estimate over 400 units could be realized!**

Subject: Fw: 4 story buildings NOT required for HAF funding application

Hon Mr Fraser,

It's clear that you are not understanding the issue we are rejecting.

Yes, 3 or 4 units in an existing single dwelling unit will help increase density and provide more housing options. And four story apt buildings will help to do the same.

However, there needs to be respect for existing neighbourhoods that were designed and built for single detached homes and for the residents of those communities, who paid millions of dollars in them on that basis, as an investment in their own future. You can not demolish existing well maintained homes to cram in a few apartment buildings and call that responsible urban planning.

Aside from the lacking infrastructure, there are valid concerns that the value of those current properties will be greatly degraded, to the detriment of citizens planning for their families and their future.

These types of structures are suitable for new development or vacant properties or communities that were designed for and already have a mixture of housing units consistent with four storey buildings.

This is not nimbyism but respectful, responsible and thoughtful urban planning, with consideration for existing neighbourhoods and residents, whose rights you were elected to protect.

Please see more information and concerns outlined below. I will also be forwarding another

email that attempts to be collaborative and offer some alternatives to this proposal that will help increase housing density without damaging existing neighbourhoods.

Respectfully, Ron Bell

Subject: 4 story buildings NOT required for HAF funding application

Mr. Knoll and Mr Grant,

I wanted to follow up my previous email regarding proposed by-law amendments related to the "Special Policy Zone", in particular the allowance of 4 storey buildings within the "elusive" 800m radius of Sheridan College.

After reading the HAF initial requirements and the correspondence between Minister Fraser and Mayor Burton, I have the following comments:

- The initial requirements from CMHC for a HAF application was for the Town to provide a list of 7 initiatives to increase housing capacity, which could come from the long list they provided or from the Town's own alternatives.
- This is what guided the Town's initial application, comprised of 7 initiatives that did NOT include either the "4 as of right" or the "4 story buildings" in Sheridan College area.
- The letters from Minister Fraser "suggested" or "requested" those 2 initiatives be "considered" to enhance the application. There is NO statement that either of those proposals are required to have a successful application.

So, Mr. Knoll, your previous reply to me that they are "...prerequisites for receiving funding from the Canada Housing Acceleration Fund..." is simply NOT correct. I'm sorry if you were under that impression, possibly from Brad Sunderland or Mayor Burton.

I see that the Town submitted a revised Action Plan, with 4 additional initiatives, that included the 4 as of right (town-wide) and the 4 story buildings (Sheridan 800m radius). These are # 8 and #9 on the revised plan.

After reviewing applications from other municipalities, I see that several have included action items to increase the (provincially mandated) 3 as of right to 4 but NONE have added anything about 4 story apartment buildings for students to reside near their post-secondary institutions or to be allowed in existing communities with only single detached houses.

Particularly of note, is Guelph, who proposes to support their university when they seek financial assistance from government sources and they will waive development fees for their plans to build their own residences. This is the extent of what Oakville should be doing to assist Sheridan College, when they already have ample space on their property to expand existing residence buildings and to add hundreds,

possibly thousands of other units.

There is absolutely no justification to go so far as to undertake allowing apartment buildings be built

in existing Oakville communities, where they would be completely inconsistent with the urban design and contribute to the degradation of property values of tax paying citizens who have invested millions of dollars in their communities.

With this information, **I urge both of you, Mr. Knoll and Mr. Grant, to vote against the proposal which would allow 4 story buildings to be inappropriately built in the current College Park community of single, detached houses.**

I have more to say on this topic and will offer alternatives to help improve eligibility for HAF funding in subsequent communications.

Thank you for your support,
Ron Bell (Ward 5, Oakville)

Subject: Sheridan Special Zone & Pending Vote
Date: Sunday, April 7, 2024 5:42:59 AM

I'm following up on my April 4, 2024 email and writing to you as a very concerned citizen and life long Oakville resident. As noted in my correspondence I've also been given the honour to represent Ward 5/6 as founding board president of Oakville's newest residents association. You will also hear from our growing team and directly from this we advocate for. Rather than repeat all I'll note :

- 1) Please list me as an advocate at the next available meeting on this matter. I now consider myself a subject matter expert and have the support of the CORA board and our impacted neighbourhood. As a cycling enthusiast I like to think I have travelled almost every inch/trail. We want to see Oakville return to its past glory as the best place to live in Canada versus our current downward trend as we watch Burlington and others surpass us..
- 2) My offer to help continues and will arrange around my work schedule to meet and help on this very key legacy decision. m. 289-885-4301 I've extensive contacts and resources and want to help the town I've called home and represented internationally in sport, with local businesses and have met and been honoured by Oakville's two previous mayors and provincial Premiers. I also have spent the past month engaging with subject matter experts, hundreds of students, our MP, MPP, my counterpart Residential Association presidents and many very concerned residents
- 3) I also work for the Global leader in the key Water Industry (Veolia) and Oakville's fastest growing top 10 employer. Did you know Veolia has access to 50,000 employees that focus on making a Ecological transformation, recently sold Halton land and has potential more, has world leading engineers, finance, project managers, plus exists off the Oakville water grid, maintains acres of land with trails, promotes sustainability, strives to only buy local to minimize our carbon footprint, we paid \$300,000 for a traffic light the town was supposed to pay for and we have underutilized basketball and beach volley courts we could look to share with the town and your ever shrinking parklands per capita . Sadly our local living interns have to commute over 1 hour within Oakville to go less than 10 km which is something that needs correction.
- 4) We also strongly disagree to have our special zone bundled with other matters as each should be separate and stand on its own. Our team has provided numerous fir better alternatives than the current proposal and how to utilize as much of the existing infrastructure rather than tearing down homes.
- 5) I remind the council and yourself that the appropriate studies have not been done and our homes are on a downward slope. Further these homes as I and many can attest were not properly built with tons of back fill crammed around the foundations resulting in excessive flooding and your proposal and subsequent plans will create a flood plain. Doubling Oakville's population as we will over a short time without the appropriate infrastructure and lack of appreciation of the resources, notably water, can become disastrous as many other regions/towns/cities are finding. This is in part why Veolia's Water Technology division is exploding in growth.
- 6) Our residents also want to understand how this money will be used should we decide to meet the ever changing demands from the federal government. We feel our tax dollars are being misused as they attempt to bribe voters for their self serving interests and ignore the clear will of the majority of the voters. Further per the National they are expanding into areas beyond their scope in housing and local bi-laws. We ask you to stand up for all voters in Oakville including our "special" not sacrificial lamb zone.
- 7) Reviewing the history of residents association it is clear other areas of Oakville have protected their zones and rest assured we will do all in our power to play catchup and receive the benefits of these historically protected zones. Working with many of these associations we will now unite on this matter with more to come.
- 8) Sheridan and other underutilized municipal lands, malls and office buildings "must " be part of the solution(s) as we have and will continue to provide. These alone will offset the need of a nonsensical bi-law to appease a bribe from the Fed's. Sheridan can no longer sit idia on massive underutilized land and unnecessary parking. Why is it ok for Sheridan to force their students excessively into our homes and not allow for non students in this crisis to lease or buy their unused land? If you like I can share stories of the student ghettos and feedback from my alma mater or the disastrous planning in Kingston around Queens or Hamilton around McMaster.. Other towns/cities have many examples and have done far less for their money.

We appreciate the challenges of this matter and I look forward to discussing with you and again welcome you to walk this neighbourhood. Per a famous quote the "Power of the People is Greater than the people in power." Hence we encourage you to use the amazing people of Oakville and our/their recommendations of far better alternatives on this matter.

Thanks for your time and I look forward to discussing this further.

Derek Zapp

Nottingham Drive Oakville, part of the truly "special neighbourhood,

Derek Zapp

Thu, 4 Apr, 08:40 (3 days ago)

to marc.grant, jeff.knoll, Anita Anand, Town, mayor, jonathan mcneice, seah.o'meara, ray.chisholm, cathy.duddeck, dave.gittings, janet.haslett-theall, peter.longo, allan.elgar, tom.adams, natalia.ishchyna, nav.nanda, scott.xie, stephen.crawfordco, sean.fraser, electgarycarr

Well, your voting Oakvillians, very strongly urge you to support your ratepayers by voting no to the motion of a special building bylaw concerning 800 meters around Sheridan. Why?

I've waited 1 month to the day since being the last delegate to speak on this matter to council on March 3 in order to properly research, provide feedback and alternatives. While I agree the residents in this area are "special", we don't intend to allow you to use our tax dollars and votes from the last election to be your experimental sacrificial lambs and reverse many of your campaign statements. We have observed & conversed with you and are now noting this rushed proposal. We observe 3 levels of government who argue/campaign and clearly can't work effectively together. We have also within days formed Oakville's newest residents association, though please note our members will communicate individually until such time as our insurance is finalised and we deal with this top priority first. My findings to date:

1. As a lifelong resident I've spoken with hundreds of each group of neighbours, Sheridan students, co-workers, residents association presidents, our MP office and many subject matter experts. I have also been correspondence/organising with approximately 1,000 friends living in or have lived in Oakville for an event within the month. The response as you are hearing is overwhelming shock to the poorly communicated proposal on what you want to do to Oakville to get the \$25 million over 4 years. I suspect this may be the biggest local response to any matter. Respectfully, I'll not apologise for the high volume response I noted was to come on the proposed Housing Accelerator Fund (HAF) at the March 4th council meeting. As you've now realised this subject truly matters to the voters.
2. As reported on the CBC National news last month the housing crisis is in large part due to the 1 million incremental foreign temp workers in 3 years, + 750,000 international students, +300,000 Ukrainians, + extra asylum seekers all in short order with no true housing plan or workers to create the supply. Those coming are good people and not the issue, rather than lack of a plan. Marc Miller noted "there is more we can do". Reactively on May 1st the number of foreign workers will be reduced except for those that can help with housing, healthcare & agriculture. Randy Boissanault noted: We already have 1.2M unemployed for 650,000 jobs. The lack of a strategy has us mismatching the people coming with the wrong skills and geography. Canada is the second largest country yet we only seem to want a policy to cram the vast majority in the GTA? Effective policy and cooperation can drive a more logical solution. Canada/Oakville continue to slide down the list of best places to live with these no strategic mistakes.
3. As a finance executive my interpreted misuse of my/others tax dollars is always of grave concern, particularly when many of you are now going back on your campaign statements and/or promises used to get elected. Further your prozed blanket bylaw that removes planning decision making from the elected council and puts it in the hands of the developers or staffers. Having managed the budgets in excess of Oakville's, I offered for free to help on financial matters with no response. We now decided to spend more of my/our tax dollars on consultants after 7 months of seeking little to no voting public input. Further of our tax dollars circle back to Sheridan College who like many schools have exploited to a degree foreign students with double tuitions and little to none of the cash put towards housing with no increased density on campuses. We are reviewing the numbers given the initial response we received from Sheridan on this and their indication they will simply operate within the bi-laws you provide.
4. Further, I chose to reduce my carbon footprint and come work in Oakville for its fasting growing company Veolia (previously Zenon/GE Water/Suez), that are world leading experts on Water for drinking, sewage, Industrial and recycled, along with a leader in Ecological transformation Deeply concerning and contrary to our carbon footprint and simple economics there is no logic in knocking down homes to replace them with 4 story apartments. Better alternatives have been sent to you by the another founding board member that emphasize the use of existing underutilised houses, hotels, vacant lands, Sheridan College lands and innovative or proven solutions like co-ops, shared housing, like Calgary funding the repurposing underutilised commercial & municipal lands and more to come. There have been no studies on water/sewage, the risk of flood plains to a neighbourhood that allowed builders to use excessive backfill versus soil and other resources. Ask or read about London or Paris and what it is like for sewage spills to occur in local water sources and homes.
5. It is also not to over react to the crisis and understand the basic supply demand actions incurring in the market and new innovations to home ownership such as companies like Ourboro and families adjusting to multi-generational homes with under existing utilised housing

From feedback we understand some have expressed an attitude that it doesn't matter because it will never happen so don't worry about this one little item and don't talk to the press. Well we are concerned with incorrect reported data and the suggestion Oakville only gets the money with the latest proposal that exceeds the 7 required actions to get the HAF. It does matter because the optics is that the Town is proposing an unnecessary bylaw to the detriment of an established family oriented neighbourhood and allows for unregulated developers or our silent neighbour Sheridan College to make erroneous or self-serving short term decisions that can not be reversed. Oakville by default I feel is owed HAF as we are more than doubling the provincial average for growth and 33,000 plus units in process and counting. While I appreciate humour, we didn't find it funny when our honourable elected Mayor noted his professor wife said the only difference in 3 versus 4 as a right was \$36,000,000 (subsequently now \$25,000,000). You forgot to note the revised proposal plans on the 289 single family homes. Appreciating honourable Mayor you had to miss the March 4th meeting with regrets, we now look forward to your direct feedback with our neighbourhood also and invite all to walk this special neighbourhood or have a call or coffee here.

We respectfully also disagree with assertions of a strong local bi-law enforcement team. Many examples were given though my favourite was the absentee landlord who chopped down a large mature tree only to dump a truck of gravel on the front lawn to make a makeshift driveway for all the cars required for all the illegal borders. We have many more examples to come. You may also have heard in excess of 100 of the Ward 5 & 6 residents attempted to walk to the Town Hall on March 4 in person only to learn the meeting was virtual. As councillor Elgar noted the town over 7 months scrambled to submit a plan on the next to last day with a proposal made that had virtually no public input. We as noted are here to provide thoughtful and better alternatives and encourage your direct 2 way communication with Minister Fraser considering the input provided to date and to come.

Apologies for the slightly lengthy memo, though I've learned one listens to understand a matter and then respond in a timely manner to effect necessary change to avoid mistakes that we all can make.

We look forward to being at the May 6th??? meeting to see this motion be defeated. Short follow-up messages will also be sent individually tomorrow to provide input on our meetings/discussions within great Oakville and every Ward.

Town Clerk further to my earlier request please consider this again my application to be an in person delegate, particularly after being forced to go last and not in person on March 4.

Regards,

Derek Zapp

Mayor, Councillors:

Three take aways from the last meeting on the 8th April 2024:

1. The meeting made it clear that the tranches from the HAF will be conditional on progress on achieving the agreed housing goals. Have any of you considered, or better, quantified, the probability of meeting the goals set (and will thereby receive the funds as promised), in an environment whereby the Federal and Provincial governments are at odds with each other, and the Town is dependent on the participation of the development industry? This has not been addressed. All this is on the assumption that the Feds still include Ontario to receive HAF.
2. All the presentation material continues to avoid mentioning total rebuilds, except a graphic showing townhouses being built in the Sheridan College on a number of assemble and joined lots, Something should be included to show that these are a distinct possibility on single home lots, and they may be simple, cheap cubic buildings with no aesthetic appeal.
3. May I add "minimum" before "1.0 meter" and the phrase "any street facing" before "entrance" when setting out the safe access requirements. This will avoid the possibility of the entrance being on the side of the house with demands for a 1.0 meter side yard clearance. Refer to screen-shot below.

Additional Dwelling Units – ZBA

Effect of Zoning By-law Amendments

- Updated definitions: "additional dwelling unit, attached" and "additional dwelling unit, detached" and revising terminology throughout the Zoning By-law
- Permitting in addition to the primary dwelling unit:
 - a maximum of three *attached additional dwelling units* within the detached dwelling; or
 - permitting a maximum of two *attached additional dwelling units* within the detached dwelling and one *detached additional dwelling unit* within an accessory building.
- Regulating safe access requirements – 1.0 metre exterior path of travel to the entrance
- Updated parking regulations that would require a minimum of 4 parking spaces for a property with 4 dwelling units.
